

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

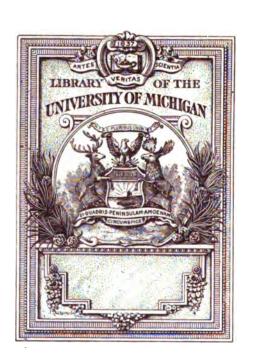

We also ask that you:

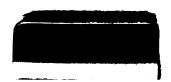

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + Refrain from automated querying Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

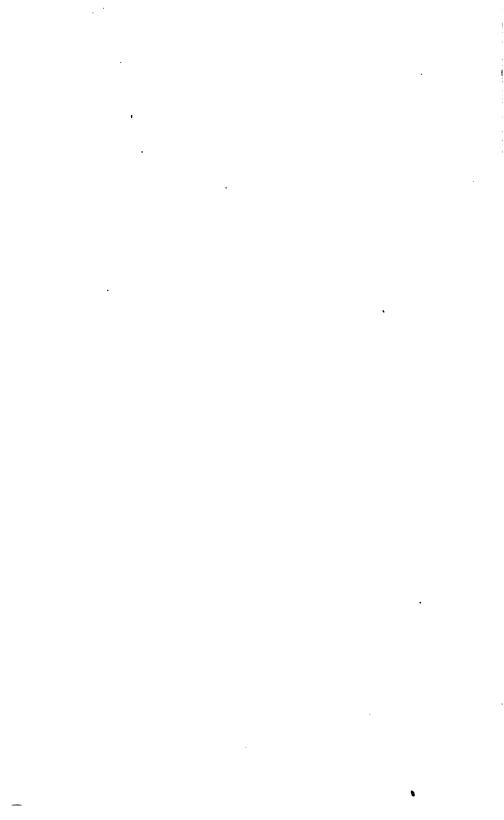

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at http://books.google.com/

Number of Fruit Trees not in bearing2,	523,905
Number of acres planted for Timber	20,285
Number of rods of Hedging	831,741
Number of bushels of Coal raised	666,582
Value of Minerals raised, not including Coal	\$31,875
Value of Manufactures\$7,	
Value of Agricultural Implements and Machinery	707,027
Number of acres in Sorghum	21,452
Number of gallons of Syrup from Sorghum	443,605
Number of pounds of Sugar from Sorghum	8,386
Number of hives of Bees	87,118
Number of pounds of Honey taken1,	128,899
Number of pounds of Beeswax	51,434
Number of pounds of Grapes raised	390,400
Number of galions of Wine made	80,779
Number of pounds of Hops raised	27,847
Number of pounds of Tobacco raised	758,626
Number of acres of Spring Wheat	827,487
Number of bushels harvested	175,784
Number of acres of Winter Wheat	116,965
Number of bushels harvested1,	,108,781
Number of acres of Oats	577,540
Number of bushels harvested15,	928,777
Number of acres of Corn	,727,777
Number of bushels harvested48,	
Number of acres of Rye	48,992
Number of bushels harvested	662,888
Number of acres of Barley	51,804
Number of bushels harvested	950,696
Number of acres of Flax	12,111

Number of bushels of Seed harvested	75,721
Number of pounds of Lint	,112,758
Number of gallons of Linseed Oil	890
Number of acres of Hungarian Grass	87,894
Number of tons of Hay therefrom	68,698
Number of acres of Tame Grasses	302,899
Number of tons of Hay therefrom	225,849
Number of tons of Hay from Wild Grass	718,119
Number of bushels of Grass Seed	62,114
Number of acres of Irish Potatoes	40,198
Number of bushels harvested	,780,811
Number of bushels of Sweet Potatoes	26,222
Number of bushels of Onions	207,638
Number of acres in all other crops	202,788
Number of Hogs of all ages	,037,117
Number of Cattle of all ages	
Number of Milch Cows.	310,137
Number of pounds of Butter made14	538.216
Number of pounds of Cheese made	
Number of Work Oxen	
Number of Horses of all ages	316,702
Number of Mules and Asses	-
Number of Sheep in 1864	•
Number of pounds of Wool shorn in 18642	
Number of Sheep in 1865	
Number of Dogs	
Value of Sheep destroyed by Wolves and Dogs	
	y010

TABLE

Showing the average yield of some of the Staple Products in the several Counties in the State of Iowa in the year 1864, as returned in the Census of 1865:

ADAIR COUNTY.

Average number of bushels of Spring Wheat per acre	6.55
	None
Average number of bushels of Oats per acre	21.05
Average number of bushels of Corn per acre	26.05
Average number of bushels of Rye per acre	10.89
Average number of bushels of Barley per acre	None
Average number of bushels of Irish Potatoes per acre	60.90
Average number of pounds of Wool shorn in 1864, per sheep	8 35
ADAMS COUNTY.	
Average number of bushels of Spring Wheat per acre	7.
Average number of bushels of Winter Wheat per acre	9.25
Average number of bushels of Oats per acre	21.66
Average number of bushels of Corn per acre	81.20
Average number of bushels of Rye per acre	7.14
Average number of bushels of Barley per scre	12.
Average number of bushels of Irish Potatoes per acre	40.
Average number of pounds of Wool per sheep, shorn in 1864	2.40
ALAMAKEE COUNTY.	
Average number of bushels of Spring Wheat per acre	11.20
Average number of bushels of Winter Wheat per acre	12,42
Average number of bushels of Oats per acre	24.
Average number of bushels of Corn per acre	26.20
Average number of bushels of Rye per acre	10.16
Average number of bushels of Barley per acre	12.04
Average number of bushels of Irish Potatoes per acre	98.88
Average number of pounds of Wool per sheep, shorn in 1864	2.80
APPANOOSE COUNTY.	
Average number of bushels of Spring Wheat per acre	7.16
Average number of bushels of Winter Wheat per acre	6.96
Average number of bushels of Oats per acre	28.05
Average number of bushels of Corn per acre	17.60
Average number of bushels of Rye per acre	18.50
Average number of bushels of Barley per acre	None
Average number of bushels of Irish Potatoes per acre	17.40
Average number of pounds of Wool per sheep, shorn in 1864	2.90

REPORT

OF THE

SECRETARY OF STATE,

IN RELATION TO THE

CRIMINAL RETURNS

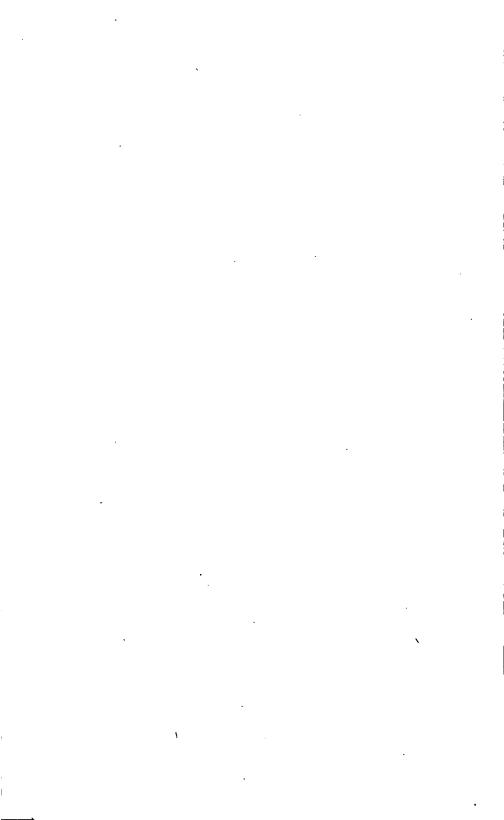

OF THE

STATE OF IOWA,

FOR THE YEARS A. D. 1864-5.

JAMES WRIGHT, SECRETARY OF STATE.

DES MOINES: F. W. PALMER, STATE PRINTER. 1865.

STATE OF IOWA, OFFICE OF SECRETARY OF STATE, Des Moines, 15th November, 1865.

To the General Assembly of the State of Iowa:-

In compliance with Section 64, Chapter 6, of the Revision of 1860, I have the honor to report to you an abstract of the Criminal Returns of the State of Iowa, for the years 1864 and 1865, which report embraces all the returns which have been received up to this date.

Respectfully submitted,

JAMES WRIGHT, Secretary of State.

WRIGHT COUNTY.

The Clerk reports that there have been no criminal prosecutions in the County during the year. No costs reported.

No Prosecutions.

A STATEMENT

Showing the crimes for which persons were prosecuted, and the occupations, character or habits, and nativity of the persons prosecuted, in the State of Iowa, for the year ending the 31st day of October, A. D. 1864, as far as reported by the Clerks of the District Courts:

THEIR CRIMES.

Six cases were for the crime of murder; 4 murder in the second degree; 5 manslaughter; 1 arson; 15 assault with intent to kill; 17 assault with intent to inflict great bodily injury; 4 assault with intent to commit rape; 1 assault with intent to rob and steal; 67 assault and battery; 18 assault; 8 burglary; 1 robbery; 9 conspiracy; 9 counterfeiting; 4 perjury; 11 adultery; 55 larceny; 4 rape; 19 willful trespass; 18 trespass; 8 seduction; 1 obstructing railroad; 1 manufacturing intoxicating liquor; 67 selling intoxicating liquor; 1 selling and giving intoxicating liquor to Indians; 15 intoxication; 281 nuisance; 8 false pretense; 2 theft; 1 horse stealing; 81 malicious mischief; 4 gambling; 85 permitting gambling; 16 illegal voting; 8 having counterfeit money; 8 riot; 1 keeping house of ill fame; 1 forcible defilement; 1 breaking jail; 5 contempt of court; 4 obstructing highway; 8 under bonds to keep the peace; 5 misdemeanor; 1 threats; 1 resisting an officer; 1 shooting stock; 1 malicious maiming of beasts; 3 ill fame; 1 offering challenge; 16 neglecting to drill; 1 burning prairie; 5 aiding prisoners to escape; 4 disturbing the peace; 28 crimes not reported.

THEIR OCCUPATIONS:

Farmers, 190; millers, 4; grocers, 37; saloon keepers, 64; merchants, 38; whisky sellers, 6; hotel keepers, 31; loafers, 4; laborers, 51; teamsters, 6; house-keepers, 10; laboring girl, 1; druggists, 8; horse dealers, 2; carpenters, 7; wagon maker, 1; blacksmiths, 8; servant, 1; wheelwright, 1; baker, 1; gamblers, 2; lawyer, 1; shoemakers, 6; masons, 6; mechanics, 2; saddler, 1; distillers, 8; stage driver, 1; clerks, 12; butcher, 1; boatmen, 2; sportsman, 1; soldiers, 3; broom makers, 2; drainer, 1; milliner, 1; saulder, 1; pauper, 1; boy, 1; teachers, 2; sheriff, 1; physicians, 3; engineers, 3; none, 6; prostitutes, 9; unknown, 64; not reported, 155.

THEIR CHARACTERS OR HABITS.

Good, 180; very good, 8; generally good, 16; tolerably good, 6; moderately good, 3; previously good, 1; not good, 87; bad, 86; steady, 9; unsteady, 1; sober, 6; temperate, 88; intemperate, 18; moral, 4; immoral, 2; dilatory, 1; not loyal, 1; wild, 1; fair, 14, genteel, 1; doubtful, 1; moderate, 7; industrious, 8; trifling, 1; vicious, 1; loose, 6; medium, 21; drinking, 2; gambling, 3; low, 4; indifferent, 2; regular, 4; dissolute, 6; excellent, 1; not bad, 1; strangers, 2; rough, 1; quarrelsome, 3; dissipated, 1; hard set, 5; nix, 3; unknown, 81; not reported, 229.

THEIR NATIVITY.

The reports of nativity are very meager—only about one-half of the cases are given. Of the cases given, 86 are said to be natives of America; 58 of the United States. Where the State is given, 6 are of Illines; 30 of Indiana; 4 of lowa; 5 of Kentucky; 2 of Louisiana; 1 of Maryland; 3 of Massachusetts; 1 of Mississippi; 5 of Missouri; 15 of New York; 26 of Ohio; 9 of Pennsylvania; 1 of Rhode Island; 2 of South Carolina; 1 of Vermont; 2 of Virginia; and 2 of Wisconsin.

Of the foreigners, 1 was of African descent; 4 of Bohemia; 8 of Canada; 9 of England; 7 of France; 41 of Germany; 2 of Hungary; 57 of Ireland; 1 of Norwsy; and 8 of Scotland.

READ AND WRITE.

Of the cases reported under this head, 400 could read and write; 45 could not; 1 could in Dutch; 1 could not read; and 1 could read.

STATEMENT

Showing the number of cases of Criminal Prosecution in each County in the State of Iowa, and the sentence in each case, for the year ending the 31st day of November, A. D. 1864.

The undersigned cannot close this Report without renewing the suggestion made in the Report to the 10th General Assembly, in reference to the importance of the collection of the Criminal Statistics of our State.

An extraordinary effort was made to induce the Clerks of the District Court in the several counties, to make the Report contemplated in Section 349 of the Code, but failed to bring out a full Report. It seems to me that this matter is of so much importance that it demands the special attention of the General Assembly. Would it not be wise to refer this matter to the several District Attorneys, requiring them to collect all facts appertaining to criminal prosecutions, and present them to the Attorney General, to be by him properly colleted and reported to the General Assembly. This seems to me to be the natural way in which to collect and report all facts connected with Criminal Prosecutions.

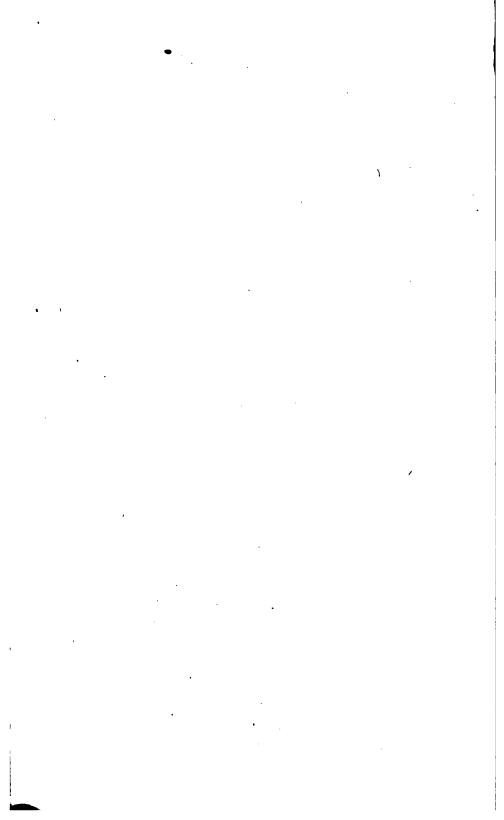

Respectfully submitted.

JAMES WRIGHT, Secretary of State.

of Farm

S.C.

OFFICE SEC'Y AND SUPERINTENDENT IOWA STATE AGRICULTURAL COLLEGE AND FARM, COLLEGE FARM, JANUARY 1, 1866.

To the Honorable Senate and

House of Representatives of the State of Iowa:

In pursuance of law I have to make the following report of the proceedings of the Board of Trustees of the Iowa Agricultural College and Farm for the year 1865. Also, I herewith transmit a brief history of the Institution from its organization in 1858, up to the present time, together with the reports of the Executive and Building Committee, and Architect, as follows, to-wit:

REPORT OF THE SECRETARY

OF THE

IOWA AGRICULTURAL COLLEGE AND FARM.

According to instructions, I beg leave to make a plain and concise statement of the condition, history and wants of the College and Farm, from 1858 to 1866.

At the session of the Legislature of 1858, an act was passed providing for the establishment of a State Agricultural College and Farm, with a Board of Trustees, which shall be connected with the entire agricultural interest of the State. M. W. Robinson, Timothy Day, John Wright, G. W. F. Sherwin, Wm. Duane Wilson, Richard Gaines, Suel Foster, J. W. Henderson, Clement Coffan, E. H. Williamson, and E. G. Day, were appointed the first trustees. Clement Coffan and E. H. Williamson would not serve. Peter Melendy and John Pattee were appointed to fill their seats.

The institution is managed by a Board of Trustees, who are appointed by the Legislature, one being taken from each Judicial District in the State, and embracing the Governor and President of the State Agricultural Society, being in all fourteen members.

The Board serves without pay for their services. Its officers are, a President *pro tem.*, a Secretary and Treasurer, and an Executive Committee of three to act during the interim of the meetings of the Board.

In 1858 the Legislature passed an Act, appropriating ten thousand dollars for the purchase of a Farm on which to locate an Agricultural College. A farm was purchased in 1859 in Story County, situated about midway between Nevada and Boonsboro, and about thirty miles directly north of Des Moines.

The Cedar Rapids and Missouri Railroad is now running directly through the farm, coming into it on the east side about ninety rods north of the south line, and running diagonally through it, bearing north-west, and leaving it on the north line within about twenty rods from the north-west corner, dividing it so as to leave about one hundred and sixty acres on the north side and about four hundred and eighty-eight acres on the south side of the Railroad. The farm contains six hundred and forty-eight acres, and is admirably adapted to the purposes of the institution, embracing all the leading varieties of soil in the State. It is well watered by Squaw and Clear creeks running through the farm, Squaw creek on the east, Clear creek on the west sides, affording an inexhaustible supply of pure stock water.

Near the center of the farm there are several fine springs, affording a good supply of water. The timber is principally black walnut, oak, elm, white maple, linn, cotton-wood, ash, hickory and numerous other valuable varieties.

The farm contains six hundred and forty-eight acres lying in a body, being about four hundred rods long from east to west, and about two hundred and fifty-nine rods wide from north to south. After deducting the one hundred and fifty acres above described, there remain four hundred and ninety-eight acres of prairie land suitable for grass and grain. There is probably not far from one hundred and eighty acres of low bottom land, about one hundred of which is covered with timber; the remainder is equally divided between wet and dry bottom.

The low land in the timber is a rich, deep, black, sandy loam, with clay subsoil, but not inclined to hold water on the surface. Next west adjoining the timber is a fine smooth, level tract of low land, remarkably well adapted for grass, but could, by a judicious system of drainage, be converted into a most productive corn land, not ex-Beyond this, to the north-west, is a large tract celled in the West. known in this State as second bottom land, being level, dry and very rich, and remarkably productive for almost every crop grown in this latitude. The soil is a mixture of black sand, fine gravel. and rich black alluvium and prairie soil proper, comprising, perhaps the most desirable soil known to the agriculturist. this is a large tract of level prairie, the soil being dry, slightly intermixed with fine gravel in places, with clay subsoil, being a fair representative of the prevailing prairie soil of the State. On the north-west corner of the farm is a tract of perhaps forty acres of clay soil, most of which is covered with a heavy growth of oak.

walnut and hickory timber. Though called clay soil, this land is a fair specimen of what is known in this State as "barrens" and "timber land." The soil is a mixture of prairie and clay, with heavy clay subsoil, and is considered the best wheat and fruit land in the Western States. On the south side of the farm is about ninety acres of high rolling prairie, intermixed with gravel, and well adapted for almost any grain crops, being warm and dry, the ravines which intersect it, carrying off all surplus water in the wettest seasons. The gravel contained in the soil is mostly on the surface, and is turned under by the first plowing, nearly disappearing after cultivation. There are five sand and gravel banks on the farm, furnishing an inexhaustible supply for building purposes, and for grading roads, walks and yards.

There is also on the farm good clay for making brick convenient to where the College is now being built.

THE IMPROVEMENTS

consist of a good, substantial, brick farm house, with a basement. of stone, making a cellar under the whole building. The house is completed except painting, and when finished will cost about four thousand dollars. The brick were manufactured on the farm. There is also a good barn on the place, well finished and painted, of good hight, and is forty-two by sixty feet in size, capable of providing storage room for grain, and shelter for the necessary teams and stock connected with the farm. There is a good stone basement under the barn, and a large yard inclosed by a substantial fence. Also a fine smoke and ash house fourteen feet square, built of brick.

A great portion of the work and material used in the crection of these buildings was furnished in payment of voluntary subscription by citizens in the vicinity.

There is about four hundred acres of the farm inclosed by a substantial fence, a part of which is built by boards and posts, five (5) boards high, and the remainder of rails, staked and ridered, eight rails high. The fences are built of good material and are put up in a very substantial manner. Of the land enclosed about one hundred and fifty-one acres are under cultivation.

There is a fine young orchard of about four hundred thrifty trees, near the house, inclosed by a good fence. This experiment has sat-

isfied the people in the vicinity that the prevalent opinion that fruit cannot be raised upon our open prairies is entirely erroneous. Fine apples have been grown upon many of these trees, which had been planted out but four years, on level, open prairie. To be successful, it only requires ordinary care, such as one would bestow upon a corn crop, and the farmers are profiting by this demonstration placed before their eyes. The trees on the farm were donated by Mr. Jas. Smith, the well known nurseryman of Des Moines.

About seventy-five grape vines have been planted near the orchard, of several different varieties, among which are the Concord, Clinton, Isabella and Catawba. They are doing well, making a fine growth and producing some fruit.

Building material can be found in abundance on the farm and in the immediate vicinity. The necessary wood to burn the brick can be procured from down timber, which is fast going to waste, and the best kind of clay and sand for the manufacture of the brick is found in abundance on the farm. Stone can be had within three and a half miles, and lime within six miles of the farm.

The farm, which has been fully described, was purchased at a cost of \$5,379.12. In consideration of having the college building located at that place, the citizens of Story and Boone counties made liberal donations of lands, money, labor and material to the amount of about seven thousand dollars, to assist in improving the farm and erecting the necessary farm buildings.

DONATIONS.

Story county donated ten thousand dollars in the bonds of the county, bearing seven per cent. interest. There is also appropriated the proceeds of the sale of five sections of land in Jasper county, known as the Capitol lands. The value of the lands is about \$17,000.

It was expected that the Legislature of 1860 would have made an appropriation sufficient to commence the erection of suitable college buildings, but as the financial condition of the State would not justify it, an appropriation was not asked for. At the session of 1862, an appropriation was not expected, as the whole finances of the State were needed to meet the extraordinary expenditures incident to the suppressing of the rebellion. Hence nothing had been done to add to its prospective revenue since the Institution was organized, until the last session. We have done what we deemed prudent in opening a farm and erecting thereon buildings suitable for a dwelling for a farmer, and also shelter for the crops and animals.

Beyond the expenditures necessary to place the farm under a fair state of cultivation, the Trustees did not feel justified in making appropriations from the limited amount in their hands, but preferred reserving the best of the assets for an endowment to meet the expenses of the Institution when in operation, hoping that when it had the ability the State would make the needed appropriation for college buildings. But, during this time the people of the State generally supposed that the buildings were erected, and that the college would soon be opened to the public; and many applications have been made to receive students. not been for the extraordinary condition of the financial matters of the State, such would doubtless have been the condition of the Institution on the opening of the present year. It is now about seven years since the purchase of the College Farm. If all this could not have been done, a general expectation or hope at least, was felt by its friends generally, that the farm would be open for experimental husbandry. Even this could not be accomplished under the circumstances without involving an expenditure which it was thought would not be instified by the people of the State, unless the college institution was fully provided for.

In July, 1862, Congress appropriated to the several loyal States in the Union, for agricultural colleges, 30,000 acres of land for each Senator and Representative in Congress. The amount under this grant to the State of Iowa was 240,000 acres. Any State accepting this grant is required by the terms of the grant to erect the necessary college buildings without using any of the proceeds of the lands for that purpose, within five years from the time of acceptance of the grant. The State of Iowa, at the special session in September, 1862, accepted the grant, with this and other conditions imposed therein. The lands have been selected by an agent every way competent, appointed by the Governor and approved by the Board of Trustees of the College, as required by the acceptance law of the State, and they have been approved and certified to the State.

They embrace some of the best unentered lands in the State,

and when prepared for sale will command the attention of the immigrants. As the interest on the proceeds of the sales of these lands is exclusively devoted to meet the annual expenditures of the Institution, there will be a fund soon created to sustain the Institution. This munificent grant having relieved the Board from any anxiety in regard to the future endowment of the Institution, they felt that a portion of the reserved assets might safely be used to place the farm in a condition to experiment upon crops; the purchase of several of the leading races of improved animals of all kinds, and testing their value by crossing on native breeds; best mode of feeding, shelter, &c., and in beautifying the farm with useful trees and shrubbery, and preparing fully for the work contemplated in the establishment of the Institution.

Such is a brief history of the Institution under the management of the Board of Trustees, which is almost exclusively confined to the farm and the operations thereon. The next point is the college proper, and the course of studies to be pursued therein, which are specified in the organic law as follows, with some other provisions in regard to students, &c.

The course of instruction shall include the following branches, to-wit:

Natural Philosophy, Chemistry, Botany, Horticulture, Fruit Growing, Forestry, Animal and Vegetable Anatomy, Geology, Mineralogy, Meteorology, Entomology, Zoology, the Veterinary Art, Plane Mensuration, Leveling, Surveying, Book-keeping, and such mechanical arts as are directly connected with agriculture. Also such other studies as the trustees may from time to time prescribe not inconsistent with the purposes of this act.

The Board of Trustees shall establish such professorships as they may deem best to carry into effect the provisions of this act.

Tuition in the College herein established shall be forever free to pupils from this State over fourteen years of age, and who have been residents of the State six months previous to their admission. Applicants for admission must be of good moral character, able to read and write the English language with ease and correctness, and also pass a satisfactory examination in the fundamental rules of arithmetic.

The trustees upon consultation with the professors and teachers shall from time to time establish rules regulating the number of

hours, to be not less than two in winter and three in summer which shall be devoted to manual labor and the compensation therefor, and no student shall be exempt from such labor except in case of sickness or other infirmity.

OBJECT OF THE INSTITUTION.

The Iowa State Agricultural College has for its object, to associate a high state of intelligence with the practice of Agriculture and the industrial or mechanic arts, and to seek to make use of this intelligence in developing the agricultural resources of the country and protecting its interests. It proposes to do this by several means.

1. As a purely educational institution its course of instruction is to include the entire range of Natural sciences, but will embrace most especially a practical bearing upon the every day duties of life, in order to make the student familiar with the things immedistely around him, and with the powers of nature he employs and with the material through the instrumentality of which, under the blessings of Providence, he lives and moves and has his being; and since Agriculture, more than any other of the industrial arts combined, it follows that this should receive by far, the highest degree of attention. The course of instruction is to be thorough so that it will not only afford the student the facts of science, but will discipline his mind to habits of thought, and enable him fully to comprehend the abstract principles involved in the practical ope-In doing this it is not deemed possible to educate rations of life. every agriculturalist, artisan, mechanic and business man in the State, but to send out a few students educated in the college course, that they, by the influence of precept and example, may infuse new life and intelligence into the several communities they may enter. A single individual who is thoroughly educated in the principles and practice of an art followed by a community, will often exert a more salutary influence upon the practice of this art by the community, than would result from sending the whole community to a school of lower order than that which he attended. A single practical school of the highest order in Paris (the Ecole Polytechnique), during the last generation, made France a nation celebrated alike for profound philosophers, great statesmen, able generals and military men, and civil engineers. If one high school of practical character is established, subordinate schools, affording the elementary education of the latter, will follow in due time.

2. As a practical education the Trustees of the Iowa Agricultural College have adopted the fundamental principle, that whatever is necessary for man to have done, it is honorable for man to do, and that the grades of honor attached to all labor, are dependent upon the talent and fidelity exhibited in performing it. It is further considered essential as a part of the student's education that he be taught the practical application, in the field and laboratory, of the principles of his studies in the class room; and manual labor is also necessary for the preservation of health, and the maintenance of the habits of industry. An incidental but not unimportant result of the operations of these principles is a reduction of the cost of tuition by the value of the labor, so that the College can take students at very low rates of admission.

All students, without regard to pecuniary circumstances, are, therefore, obliged to perform manual labor as an essential part of the College education and discipline and training. In these respects consists a most essential difference between the idea associated with manual labor and that of all other attempts made heretofore to combine manual labor with study. Instead of the idea of poverty and want being associated with those that labor, that of laziness and worthlessness is associated with those who refuse to work efficiently, and the experience of established institutions has already most assuredly shown that no young man of whom there is any hope for future usefulness in life, is insensible to the disgrace which thus attaches to the lazy, who will work only as they are watched, and cheat their fellow-students by refusing to do their share of the labor assigned them, and nothing is more conclusively settled than that those students who are most studious and industrious in class, work the most efficiently, and are the most trustworthy in the performance of their daily work.

3. As an Experimental Institution our College has an unbounded field for labor. The principles of Agricultural Science, which shall ultimately constitute the subject of instruction in its class rooms will be a prominent and important branch of it. The development of no other department will yield richer and more lasting results, or confer more substantial benefit upon agricultural practice than this. Much time, however, is required to make thorough

and reliable experiments—they will not pay at once. As well might the farmer expect to reap his crop the day he sows his grain. They will, however, ultimately pay a thousand fold, as have the practical application of the sciences of electricity, heat and optics in the present day, paid for the half century of apparently unpractical, purely scientific investigations that led to the results now obtained through them.

The design of this institution is different from all other educational institutions in the country, excepting one in Pennsylvania, and one in Michigan, now in successful operation. By the union of labor and study, they are both placed in their proper position, and thus only are exhibited in their true dignity. Here they are taught to walk together, and that separation is degrading to both. The student's mind and hands are first prepared to promote skill and success in the important and honorable occupation of cultivating the soil, but he will be almost equally fitted to fill with honor any other position in life. There is thus supplied a practical and equal education so much needed by the great body of our farmers, and cheap enough to be embraced by all. "The farmer who claims such an equal education for his son, feels an imperative necessity for an institution such as this. He sees that the son of a farmer who has been a four-years' course at our old Colleges, returns with his eyes and his thoughts, and the best of his mind directed away from the objects which worthily and usefully occupy his father and his brothers. He is useless and inferior in the sphere of his home; he cannot labor; he must go from home; he is driven from it; he can do nothing but enter a profession, and in any profession he may enter, if he cannot make a conspicuous mark, he is a miserable thing at best, and almost certain to fall into ruinous habits and to become their victim. And the unhappy and disappointed father loses not only the cost of his education, his own struggles and expended energy, but in three cases out of four, the son himself. How different the case in circumstances which such an institution as ours is destined to establish. The boy in great part aids to work out his own education. Instead of dragging on his father, he aids him; instead of wasting his physical abilities, through want of exercise, he labors and develops them; while his mind is being stored with both practical and refining knowledge, his hands are educated to expertness in a thousand operations, and his body to grace and

strength. How delightful will be the meeting between the graduate of our Agricultural school and his father and brothers. He has stores of information for them, and there is mutual interest, and subjects of conversation in everything around. The proud and gratified father will bless the means by which his highest wishes have been accomplished." So plain is the need of this course of training, even to the dullest mind, and so plain is the method of establishing it, it is wonderful up to this day, that such schools are only commencing in this country.

The inquiry will naturally be made in regard to the cost of educating and sustaining a scholar in the college for one year. In the Farmers' High School of Pennsylvania, the price for board, lodging, washing, fuel and lights, is fixed at \$200 per annum. The cost in our institution would not exceed the sum from which would be deducted the amount credited for labor on the farm. The tuition is made free by law.

THE' PRESENT BOARD OF TRUSTEES.

President-Wm. II. Holmes, Polk county.

Secretary-Peter Melendy, Black Hawk county.

Treasurer—M. W. Robinson, Des Moines county.

Members—Suel Foster, Muscatine county; Thomas Holyoke, Poweshiek county; James A. Bronson, Jones county; John McDonough, Clarke county; Joseph McGowan, Appanoose county; P. Henkly, Fayette county; P. Cadwell, Harrison county; L. Q. Hoggett, Story county.

Ex-officio Member-Gov. Wm. M. Stone, Marion county.

Executive and Building Committee.—Wm. H. Holmes, Peter Melendy, James A. Bronson.

I herewith submit a statement, exhibits and receipts, and expenditures of the farm and college building from the commencement in the winter of 1858, to the first day of January, 1866:

" Robinson bill	•	75
" Murry, January meeting Capitol	4	00
m	\$35,962	17
Total receipts \$ 59,834 89		
Total expenditures	- \$ 24,662	17
Receipts of College Lands and cash from State:		
Received from Auditor 1864-1865\$20,000 00		
Received from Government 240,000 acres		
of land, estimated value at \$2,00 per acre 480,000 00-	500,000	00
Of these lands there has been leased 57,436.34 acres		
at a total value of \$109,459.44 upon which there has		
been paid, advance interest \$7,746.13 as an endow-		
ment to the Institution.		
Expenses of College foundation and making brick	20,000	00
Making a grand total of receipts from State, donations		
from counties, individuals, and Government		89
Total expenditures up to date	55,172	22

\$504,662 17

Thus it will be seen, the financial condition of the Institution is in a healthy state. The State has given to the farm proper \$10,000, and she has property for this small outlay amounting to \$59,834.39. The land is worth \$10,000 more than the State gave for it, thus making the farm proper worth to-day \$69,834.39, and with the munificent grant from the Government, valued at \$480,000—makes a grand total value of \$567,834.39.

The design of Agricultural Colleges is so little understood by the people generally, it would not be amiss to state briefly their objects. They are intended to develop and adapt a system of instruction which shall embrace to the fullest extent possible those departments of all sciences which have a practical or theoretical bearing upon agriculture and agricultural interests; which, while it shall be sufficiently thorough to afford good mental discipline, shall also afford a larger share of practical knowledge peculiarly adapted to the necessities and calling of a farmer, and which none of the other classes of colleges are competent to perform. Science and art should go hand in hand. We find men all over the enlightened world working at agricultural sciences, who know too little about agricultural practice, whilst almost the entire agricultural community know nothing about science. These great interests can only be effectually united in agricultural institutions of learning, where all that science teaches can be brought before those who are devoted to agricultural practice.

The education of our farmers as such, beyond every other class of our community, is the worst provided for; hence none are more liable to imposition as the result of their ignorance of scientific instruction. No branch of human industry is suffering so much for want of the application of scientific principles in its various operations as is Agriculture at the present time. It is only necessary to instance the general ignorance which prevails in the veterinary art—the treatment of diseases of animals, a knowledge of which would save thousands of dollars annually to the State.

Where is agriculture practiced most successfully? In those counties where farm schools and colleges exist to the greatest extent. To quote the words of Prof. Pugh, of the Pennsylvania Farm School, who visited the principal farm schools in Europe, "Proud old England, energetic Scotland, rising Ireland, extended Russia, decaying Austria, little Denmark, and despotic Franceall Europe, from the Mediterranean to the Baltic and the Baltic to the Urals, is alive on the subject of agricultural education, and what science has done, is doing, and is capable of doing for agri culture. And we may now come back and ask ourselves what republican America, what this great agricultural nation, with her millions of broad acres, has done and is doing for agricultural education and agricultural science, and what science has done for her. Where are her agricultural schools? Where are her agricultural colleges? Where are her agricultural investigations? which are to help the scientific men of the old world to develop the great principles of agricultural science, that must one day be to the farmer what the theory of navigation is to the mariner, or the principles of surveying to the man who measures land. Where are the agricultural bureaus to collect agricultural statistics and enable us to know just what the country is doing and what it is not? We ask and wait, and echo answers 'Where!'" These

questions are as pertinent to Iowa as to Pennsylvania, where they were uttered. Indeed, more so. A Pennsylvania farmer in Iowa is looked upon as one worthy of imitation in any community in our State. If a State farm school is needed there, as it is acknowledged to be by the expenditure of more than \$100,000 to establish one, its necessity is four-fold greater here.

The amount mentioned as necessary to put a Farm School in successful operation is so small that not a mill of tax would have to be added to the present tax. That it will be properly expended you are referred to what has been accomplished with the small sum of \$10,000 appropriated by the State. It was the first movement of any importance which had ever been made by the Legislature of the State, recognizing a return of a small portion of the money-most of which came from the tillers of the soil-by giving it to infuse and diffuse through their sons an enlightened system of Agriculture. It is now recognized as one of the Institutions of the State, and as it represents the leading interests of the State it should at least be fostered to an extent equal to any of the others. But its friends have not pressed it, principally because the others needed immediate aid to sustain them, and the finances of the State were required therefor to their utmost limit. This difficulty is not now in the way, and to secure all that is needed it is only necessary for our people to make known their wishes through petitions to the Legislature. May it not be hoped then that they will take this matter in hand at once and secure a fair proportion of the money which is obtained from agriculture to be returned to aid in promoting this great interest, which is admitted by all who have examined it, to stand in the most earnest need? It is peculiarly a Farmers' College, intended to elevate the profession of the farmer, and unless it is recognized and urged as such by the farmer upon the attention of the Legislature, it will never amount to anything.

"Such institutions as ours are experiments," says the doubter. Admit it in that sense, and what is proven by it? Absolutely nothing. On the contrary, our most useful and profitable modes of culture, discoveries in mechanics, in surgery, in medicine, in navigation—in brief, in every department of life are the results of experiments—toilsome and expensive experiments—and experiments are continually going on, and new developments are daily being made, the results of which tend to the welfare of man. Are

we so perfect in obtaining from the rich soils of our State "all that is hidden therein" that we need no further information? It is generally admitted that we are not. Then let us experiment and experiment, especially when the cost is fully within our means, until we attain as near perfection as is destined to the finite mind. Let those who doubt this mode of accomplishing the desired end present a better, and it will be adopted. Until then let us make the best use of the lights around us and the means in our possession.

But what have we upon which to base our enterprise. We can exhibit to the people of the State, a farm near 650 acres in a state of improvement and cultivation, with sufficient capabilities to sustain every individual who can be accommodated in a College building that costs the sum of \$100,000, even if such a building is completed within eighteen months from this time. Also a fund which will at that time show an actual or good prospect of an annual revenue of upwards of \$12,000 annually, sufficient, with the support received from the farm, to sustain five professorships.

All this was done, thanks to many friends of the enterprise, in and out of the Legislature, upon the basis of the small sum of ten thousand dollars appropriated by the State. We must not stop here, is the hope of every well wisher to the prosperity of our highly favored State, and it is not necessary that we should. Our reputation also as an enlightened agricultural people will suffer in the eyes of her sister States, if the effort is now abandoned. May it not be confidently expected then that every friend to the agricultural development of the State, will give our infant institution his influence and support, and make its objects and aims better known to those for whose especial benefit it is intended?

REPORT OF THE SUPERINTENDENT.

To the Board of Trustees of the Iowa State Agricultural College and Farm:

Gentlemen:—In compliance with the law creating the offices of Superintendent and Secretary, I beg leave to make the following report:

I was elected to fill the position of Superintendent and Secretary of the Iowa Agricultural College and Farm, on the 16th day of January, 1865. I consented to hold and perform the duties devolving upon the two offices until the next meeting of the Board, which was held at the Farm on March 22d, at which time I begged to be excused from serving as Superintendent and Secretary for various reasons, one of which was, that I could not move on the Farm, the law requiring the said officer to live on the Farm, and as shown from the minutes, I was unanimously retained as Superintendent and Secretary, to fill the offices the best I could without moving on the Farm.

I therefore beg leave to make a full statement of my duties as Superintendent. I have spent considerable time in looking after the interests of the Farm. I have made ten trips to the Farm, and six trips to Clinton, three to Dubuque, two to Chicago, one to Davenport, and one to Muscatine, two to Des Moines, and one to Fort Dodge, making in all twenty-four trips—making in time one hundred and thirty-five days. I have spent twenty days in office writing up minutes, attending to correspondence, and making out reports.

FARM.

The following is a statement of the work on the Farm since the first day of January, 1865, up to the first day of January, 1866, giving the costs of the same, and the receipts.

I thought it best not to sow much wheat, consequently there was

but fourteen acres sown of Tea and Fife wheat. Field marked "A" on the plat was sown to Tea on stalks, and stands thus:

SIX ACRES.

To breaking and clearing up stalks—to one day of man and	team,
at \$3 per day	\$ 3.00
To seed wheat (10 bushels)	10.00
" å day's sowing wheat	1.12
" 1½ days' harrowing	4.50

Value of 2 tons of Hungarian hay 15	00
_	80 6 20
Net profit on produce	\$1,338 69

The following amount of labor has been done on the farm outside of field work. During the first four months of the year it required the entire attention of one man to take care of the stock, as the cars were running through the farm, and the danger of stock being killed made it necessary to thus employ a man. Ffty-five days were spent in odd jobbs, attending to stock, lumber, cutting wood and posts, hauling manure, working in orchard, building fence, &c. This amount of work done from January 4th up to March 24th.

Four days spent in grading about house, sowing grass seed-re-

sult, a nice lawn; five days spent in plowing, harvesting, ditching and sowing grass seed in west barn yard—making a fine grass plat; nine days sowing grass seed and harrowing, on prairie east side of farm—the result, a good fair patch of timothy; nine days after lumber, seed wheat, and repairing fences; six days killing caterpillars in orchard, preparing willow cuttings, husking corn, &c.; five days setting out willow cuttings (about one mile). required much labor to prepare the ground. The willows have done well, and bid fair to make a good fence. It is the intention of the Executive Committee to plant the west and north sides of the farm with a belt of willows.] Five days digging pit for cattle scales and hauling material for the same; four days setting out fruit trees; four days setting out shade trees in lawn in front of farm house; six days setting one hundred evergreens in nursery; three days setting out small fruit trees and shrubbery in garden; seven days preparing ground and setting out 114 dwarf and standard fruit trees and 34 grape vines; ten days digging foundation of wood shed, hauling stone, sand, and attending masons; five days hauling timber and lumber for wood-sheed, raising wood-shed, laying up fence around College foundation, unloading lumber, &c.; six days shearing sheep; nine days digging foundation, hauling material for verandah; four days repairing well; six days spent in killing potato bugs; five days cleaning out willow hedge; 21 days in garden among fruit trees; up to 23d of June: Seven days making sheep pens and trimming orchard; twelve days digging drain and laying tile from house cellar; 91 days digging foundation for smoke house, hauling brick and sand for same; four days hauling lumber at mill; three days grading and hauling brick for pavement; eight days digging foundation for privy, and hauling brick, sand and lime; twelve days for lime, moving wool, making hay rack, making gates and hanging; 81 days after evaporator, setting same, selling land, &c.; eight days after castings for cane mill, hunting stock, &c.; sixteen days building hog sheds, sheep racks, sheep yards, hunting borers in orchard, and grading around out-buildings; thirteen days trimming and laying down grape vines, taking ewes to Grinnell, mulching trees, &c.; three days to Des Moines with sorghum; six days grinding feed. Up to December 31, making in all 282 days.

AMOUNT OF LABOR EMPLOYED ON FARM DURING THE YEAR, FROM JAN-UARY 1st, 1865, TO JANUARY 1st, 1866.

In summing up the work on field crops, &c., I am satisfied, from careful observation, that it has cost nearly one-third more than it would in ordinary seasons, and owing to the heavy rains in the spring months the result is not so satisfactory as it would have been under other circumstances.

In the sorghum account there has been some outlay that has not been charged to that account—several hours were spent in setting the mill and building the arch for evaporation; defective parts of the mill broke, therefore causing some delay in mending. We used Skinner's Climax Adjustable Sugar Mill, manufactured by E. W. Skinner of Madison, Wisconsin. It has peculiar features and

merits, and deserves a special recommendation. We give a description. It differs from other mills in two important points. 1st. In the use of bearers and weights to regulate the pressure of the rollers instead of set screws or keys. 2d. In the arrangement of its driving gear on the top of the mill and in attaching the sweep to the standards bolted to the periphery of the crown wheel. The advantage of this arrangement of the gearing will be apparent to all who have had much experience in the use of sugar cane mills; but it must be seen in operation to fully appreciate the advantage gained by the use of the bearers and weights. They insure a constant unvarying pressure of five to eight tons, as desired, on each end of the lower back roller. This presses the largest, as well as the smallest stalks equally dry, and with much less power, it is claimed, than is required by any other mill, which is doubtless the fact. They also guard against breakage. The examining committee of the Illinois State Fair tested its efficacy on the largest and smallest stalks run through side by side, and by handsfull run through indiscriminately. In each case the begasse was much dryer than from the set screw or rigid mills.

Another advantage is claimed for this mill, which becomes apparent in making syrup from juice pressed by it. When two or more stalks fall in cross-ways or on top of each other the adjustable roller will ease up and allow the lump to pass through without extracting the rank green juice from the bark or joints. A rigid mill, if keyed up sufficient to pass single stalks tolerably dry, requires great power to carry such knots through, and the extra pressure takes from the bark or rind its disagreeable juice which is deleterious in making good syrup.

The weight of the mill is eleven hundred pounds. It has three rollers sixteen inches long, and ten inches in diameter. It is well and substantially planned and put together.

Mr. Skinnner also manufactures a large sized adjutable mill for large works or plantations, a model of which was on exhibition at the Illinois State Fair. This mill has a compound leverage which gives great additional pressure, without corrresponding increase of weight. Either mill can be geared to run any power or speed. We regret that we cannot give the prices of the several sizes made by Mr. Skinner.

COOK'S EVAPORATOR.

We used one of *Cook's Evaporators*, furnished us by Ransom Bartle, of Independence, Iowa, at one half the cost, and it has given good satisfaction, and we can cheerfully recommend it to the farmers of Iowa. The quality of syrup is very fine, clear and transparent, and of a rich, delicious flavor.

STOCK.

The stock has not done as well as could be expected, owing to the fact, we had not the convenience of taking care of the same as we should have done. I could not make the improvements desired, owing to the want of funds.

The following statement will show the condition and number of fine stock, together with the common stock now on the farm; together with the increase, cost of keeping, &c.

I did not think it advisable to purchase the remainder of the stock recommended at last meeting, for good reasons; first for the want of funds; second, for the want of proper buildings to take care of the stock. One of our fine Durham heifers lost a calf—in calving. The cars on the railroad killed one of our fine Leicester ewes, worth \$150. I have not presented bill for several reasons, one of which is, I was doing all in my power to have them fence the railroad running through the farm, and for this cause did not want to have any trouble until it was accomplished.

HORSES.

IMPROVEMENTS.

The farm house is now finished, with the exception of painting the inside work, which we would recommend to be immediately done.

VERANDAH.

A beautiful verandah has been put up since our last meeting, in front of the farm house, at a cost of \$300. It is built substantially,

and it relieves the bare walls of the house, and will be a protection to it.

A WOOD-HOUSE AND WORKSHOP

has been erected, east and adjoining the back part, on the lean-to of the house. It has been built of wood and put up in a substantial manner, at a cost of \$656.75. It is well painted, with blinds to the windows, with a division in the center—one part for woodhouse and the other for workshop, and room for the hands to spend their leisure hours. Length of building 18 × 30 feet.

PRIVY.

A good double privy has been built of brick, 10 × 10, in a good, substantial manner, at a cost of \$150.

SMOKE AND ASH HOUSE.

A neat and substantial smoke and ash house has been built of brick, 8×12 feet, got up in a tasty style, suitable for model building, at a cost of \$130.

BOOK CASE.

A book case has been put into the office the entire length of the north side of the office, made of good black walnut, with cupboard and solid doors below, and glass doors above, with room for 2,000 volumes, at a cost of \$200.

PAVING.

The area between the wood-house and main building has been paved, making a good dry walk, at a cost of \$25.

CATTLE SCALES.

A set of Fairbanks' four-ton scales have been put in the barnyard, at a cost of \$200, which I thought expedient to have on the farm.

TREES AND SHRUBBERY.

There have been several hundred ornamental and shade trees, and shrubbery, set out. I deemed it essential to make an ample lawn, with here and there a tree, with shrubs for fragrance, and evergreens to relieve the golden of the summer day; with bordered walks and quiet nooks, the embowering shade of trees, with

beautiful trailing vines, and shrubs, and flowers. A tree undoubtedly is one of the most beautiful objects in nature, in its many shapes; one of the greatest sources of interest and character in landscapes. By the judicious employment of trees we may effect almost any amount of alteration and improvement within the scope of landscape scenery.

GRAPE VINES, &C.

The following is a list of grapes that have been set out the past year: 6 Delawares, 2 Isabellas, 4 Hartford Prolifics, 4 Logan, 4 Diana, 6 Rebecca, 2 Iowa. We have mislaid the list of fruit trees and cannot give it now. Would recommend experimenting in the horticultural department.

TAME GRASS.

The amount of tame grass sown on the farm is not large, and I would recommend the seeding of all the meadows and pastures in tame grass as soon as it can be done. Whole amount of land sown, $43\frac{1}{2}$ acres. On old ground—Timothy, 12 acres; Timothy and Clover, 4 acres; Clover and Blue Grass, $2\frac{1}{4}$ acres; sown on prairie soil and harrowed in, and is doing well, 25 acres. Total, $43\frac{1}{4}$ acres.

EVERGREENS.

There has been a large lot of small evergreens experimented with the past year, which have not done well. We have now about 160 Cedars that are growing nicely; 600 Balsam Fir, Norway Spruce, Pines, White Cedar and Hemlock that are doing well, and will, if care is taken with them, make good, symmetrical trees.

DRAINS.

The cellar has been drained, taking about one hundred feet of four-inch tile (the small tile were used, but would not do). The cellar is now completed, drained, and in good condition, at a cost for 100 feet of tile at 25 cents per foot, of \$25; cost of labor, \$21.81. Total cost, \$46.81.

BREAKING.

The breaking done on the farm for the year 1865, amounts to 29 acres, 18½ acres of old ground which had lain idle for three

years and was equivalent to new ground, 10½ acres of new sod. There was employed for breaking the above, one yoke of cattle and one span of horses. Time taken, two men and teams 18 days, at \$6.00 per day, \$108.00 at a cost of \$3.72 per acre.

We would recommend the breaking of at least 50 acres per year until all is broken up.

Whole number of acres of old ground broken, 126. New, 29. Total, 155 acres.

WILLOWS.

There has been about one mile of willow cuttings set out on the north side of the railroad, and along the west side of the farm. The season was favorable for starting the cuttings, and if they have a fair chance this coming season, will make a fine belt for a wind breaker. We would recommend the planting, on the north line of the farm the entire length, this fine willow for a screen, back ground and protection from north and west winds. The cuttings planted this year were obtained by Mr. Foster, from Overman & Edwards, of Illinois, as a gift to the farm. The cost was but the transportation.

FENCING.

There has been about 437 rods of post and board fence built this year (1865), commencing at the south-east corner of the orchard fence, running south to the south line, thence east on the road to the east line of the farm; thence north 50 rods, half the distance to the railroad. The other half was to have been built by Mr. Hoggett, which has not been done.

There are on the farm 240 rods of post and board fence, of post and rail fence 148 rods, of Virginia rail fence 374 rods, as follows:

and rail ience 148 rods, of virginia rail ience 374 rods, as i	ollows:

Paid on contract of building fence	39 50
,	

8901 33

There has been built on the line of the railroad a good fence, post and board, the entire length, south side of the railroad, about one mile, and the men promised to build the whole length on the north side of the road,—thus fencing the entire road through the farm. By thus fencing the road, it gives us about 170 acres of fine bottom and upland pasture. I made several trips to Clinton on the fence matter, to induce the railroad company to build the fence along the line of the road.

I would recommend the fencing of the entire farm; it will take about 690 rods of fence; and also to leave a thirty foot road around the north, east and west sides of the farm. We would recommend the fencing of the fields as the plat of the Superintendent shows the divisions.

COLLEGE LANDS.

A resolution was offered at the last meeting, requiring the Executive Committee to sell or lease the College lands, and to have the same patented.

We have appointed the Hon. Geo. W. Bassett, as General Agent, with instructions to plat, &c., in accordance with the resolution. Below find report of Mr. Bassett.

LAND OFFICE OF THE IOWA AGRICULTURAL COLLEGE, FORT DODGE, IOWA, DECEMBER 31, 1865.

To Peter Melendy, Secretary of the Iowa Agricultural College:

In compliance with your request, the following report respecting sales and leases of the lands belonging to the College, and included in the grant made by act of Congress, approved July 2d, 1862, is hereby submitted for your consideration.

These lands, in all, amounting to two hundred and twenty-four thousand one hundred and sixty-nine 37-100 (224,169 37-100) acres were, on the 15th day of July last, by order of the Executive Committee, first offered for sale or lease, under the provisions of

chapter 117, of the acts of the 10th General Assembly of the State of Iowa.

At the present date, December 31, 1865, there have been leased 57,436.34 acres, at a total valuation of \$109,459.44, upon which there has been paid advance interest, \$7,746.13. In a majority of cases advance interest was collected upon leases from the date up to January 1, 1867, making the date of payment of interest uniform on all leases, as a matter of convenience both for this office and for the lessee.

The available endowment of the College now affords, in annual interest payable at this office, an income of \$6,567.56.

There remain of the total grant, undisposed of, 166,733.03 acres of about the same average value as that already leased, making the total value of the grant, under the present appraisement, about \$427,266.85. Though the sales may not be so rapid, yet the lands will, under the present mode of disposition, in a few years be made available and afford an ample endowment, placing the institution upon a permanent basis, and rendering it self supporting.

The leases were made in conformity to the provisions of the act of the 10th General Assembly, above referred to, for a term of five years, at six per cent. per annum, payable in advance, upon the appraised value of the lands made at the date of the lease with a right of purchase to the lessee at the expiration of the term. A copy of the form used is herewith transmitted.

Much inconvenience was at first experienced from a want of proper books of record, plats, maps and blanks, but that inconvenience is now removed, and we have prepared and in use at this office a "Register of Lands," in which is recorded the entire grant in quarter sections, with the number of acres in each tract, and the appraised value. Also a "register of sales and leases," in which are entered the sales and leases, with date, name of lessee or purchaser, a description of the tract and valuation, and the amount of interest or principal secured. One book of township plats, two books for sectional plats with the College lands marked thereon, a cash book, and a map of the Fort Dodge and Sioux City Land Districts.

The lands having been offered in the market at a favorable time, when an unprecedented immigration was tending to the Upper Des Moines Valley, a rare opportunity was offered for the disposal of

the grant, while the facilities offered to actual settlers by the admirable method of leasing have greatly tended to the settlement of this part of the State. Only about one quarter of the entire grant has been disposed of, and it is generally desired that the remainder shall not long be withheld from occupation by those seeking homes in our State. No absolute sales have been made, and no lands offered since the sixth instant, the date of the receipt of your order withdrawing them from market.

GEO. W. BASSETT,

Agent for the sale of the Iowa Agricultural College Lands.

RECOMMENDATIONS.

REE CULTURE

Should be encouraged in our State. No branch of agriculture in our State could be made so profitable as this in proportion to the labor and capital expended, and we would recommend the Executive Committee to procure at least six stands of pure Italian bees, and that steps be taken to build a model apiary.

A writer says: This interesting branch of husbandry is progressing with the increase of population and presents a much higher average per inhabitant than Illinois or Wisconsin in 1859. For Iowa in that year it was 141-100ths of a pound, Illinois 81-100 of a pound and Wisconsin only 29-100ths of a pound. Iowa ranks over Illinois 60-100ths of a pound, over Wisconsin 1 12-100ths of a pound and over both together 41-100ths of a pound. This is a very flattering exhibit for Iowa over her Western sister States. Whether our climate is more favorable or that our farmers give bee-culture more attention we are not advised, probably both have their infinence. We merely state the facts, leaving for others to give the causes. It is a branch so remunerative that we are astonished greater attention is not given to it. The average product per hive in Iowa in 1862, was nearly 13 pounds.

FENCING AND PLATTING THE FARM.

I would recommend the platting and dividing the farm into fields and lanes, according to the Superintendent's plat. I think the land on the south side of the orchard fence should be used as lawns for our fine stock, to be kept at the proper seasons, and that

we group native and foreign trees promiscuously through the ground, taking for the centre of the group, the oak and the chesnut, which are among the largest and the noblest of our trees; the spruce, hemlock, ash and beach, locust and hickory, the cottonwood, sycamore, walnut, soft maple—the arrangement of these should be the subject of careful study. Groups should be always composed of one principal tree, larger and taller than the rest, with others grouped around as subordinates. Plant trees most certainly, and wherever they would be a beauty or a refreshment, let their roots begin to pierce the mould above which their branches may year after year wave with a fascinating grace and variety—like which there is nothing else in nature. There are many things that we might mention, but time will not permit.

All of which is respectfully submitted,
PETER MELENDY, Superintendent.

REPORT OF THE EXECUTIVE COMMITTEE.

To the Honorable Board of Trustees of the Iowa State Agricultural College:

Gentlemen:—Your Committee would respectfully beg leave to make the following report for the year 1865:

The duties of the Committee for the last year have been laborious, requiring much time to discharge the many important obligations devolving upon us.

The infancy of the institution has been carefully matured and sustained by the many friends who have constantly given it their fostering care, expending their time, their labor and private resources, without hope or desire of public preferment, or reward, though it has attained the stature, the vigor, and the dignity of manhood. The capacity of our connection with the interests of the institution, and knowing the wants of the same, compel us to make a lengthy and minute report of every department of the Farm and College, and to call on the Trustees and the General Assembly for aid to enable us, your committee, to accomplish the great work for which it is destined. We have met with much opposition and complaint from many quarters, and with this all, we have removed many false prejudices of the community to develop and elucidate this great work of elevating labor.

Your Committee have had several meetings at the Farm and College. The many duties we had to perform, passed at your last meeting in March last, we have attended to, as the reports herewith attached show. We present to your honorable body the report of the Superintendent and Secretary, report of the Secretary, the history of the Institution from the organization up to the present time, report of the Farmer, report of the Building Committee, report of Architect, report of Brick Maker, report of Agent of Agricultural lands, all of which we hope you will find elaborative enough.

We have deemed it of the utmost importance for the interests of

400 00

the Institution to thus make a full history, and objects of the Institution from its organization to the present time, thus placing all information that the people of the State require to understand the objects of the Institution, of its progress and operations. The periodical meeting of your body is a fit time and an appropriate occasion on which to impart this information in detail.

And we would especially call the attention of the Board to the financial condition of the Institution. We would like to have made more improvements, and to have put the farm in a better condition. It has been thought best to proceed slowly and certainly, as a measure of economy and prudence, rather than involve the Institution.

Your committee was instructed to appraise the lands in Story and Boone counties. We submit the following:

APPRAISAL OF "DONATED LANDS" IN STORY AND BOONE COUNTIES

NOW REMAINING ON HAND.

	536 160
٠	
	696
ıe,	and
30	00

00	00
25	00
	 ne, 30

and thirty-three cents.....

JASPER COUNTY.

To Sidney Wellems, n. ½ sec. 4, T. 78, R. 20—320 acres, at fourteen dollars and forty cents; four hundred and eighty dollars down, four hundred and eighty dollars in 12 months, four hundred and eighty dollars in 24		
months	1,440	00
Total amountPaid down	•	
Balance due	1,646	661

TITLES AND SUBSCRIPTIONS.

Your committee have examined the most of the titles of the lands donated in Story and Boone counties, and find them all right. We have also placed the subscription lists in the hands of John Scott, of Nevada, to collect. We find a number of the amounts can be collected. We are not able to make a full report as to the amount of good, and the amount that cannot be collected.

CHANGE OF ROAD.

Your Committee have made arrangements to exchange lands with P. L. Foster in changing the road on the south side of the Farm, so soon as the Legislature will give us the authority. Your Committee have expended about twenty dollars in making road on the south side of Farm. The amount appropriated is \$100. We deem it essential that the road should be immediately finished to prevent travel across the Farm.

SETTLING BRICK ACCOUNT.

Your Committee have settled with Chamberlain & Bronson in the matter of making brick, as follows: by paying them \$268, thus closing up the unsettled account.

STORY COUNTY BONDS.

Your Committee have attended to the matter of requesting the Board of Supervisors of Story County to levy a tax for the purpose of taking up the bonds of said county now held by us as a donation to College and Farm. We made the request, and we un-

derstand that they have made a levy for the tax for the amount of \$1,000, for the next year.

BILLS ORDERED PAID.

Your Committee have drawn orders on the Treasurer for the amounts ordered to be paid at your last meeting.

Your Committee would most respectfully submit the following report of receipts and expenditures on Farm account for the year 1865:

RECEIPTS AND EXPENDITURES

By the Executive Committee, for the year 1865.

REPORT OF BUILDING COMMITTEE, 1864.

To the Hon. Board of Trustees of the Iowa State Agricultural Farm and College:

Gentlemen:—Your Committee would beg leave to make the following report: Your Committee was elected on the 15th day of June, 1864, to perform the important duties devolved upon them. We have met at the farm eight times. At our first meeting in June, we advertised for bids for the excavation and stone work. The bids were opened on the 11th day of July, 1864. We let the excavation to W. J. Graham at 24½ cts. per yard; stone-work to Scott & Kerney, of Des Moines, at six dollars per perch of twenty-five feet, and for surface work seventy cents per foot for cut-stone, door and window sills.

We employed Mr. John Browne as architect at fees of five percent. on the cost of the building, with the proviso in the contract as follows: "This contract may be discontinued at the option of either party." We let a contract to Mr. Warner, of Boonsboro, to furnish all the joists, studding, square and roof timbers, at \$26.50 per M., delivered at the building. The contract was drawn up and signed by the Building Committee, and left with John Browne to get the contract signed. This Mr. B. neglected to do.

Mr. Graham failed to get the excavation done in time for the stone masons. The time for the work to be finished was the first week in September. We put on the job the farm hands and teams and finished the work. Mr. Graham complains of our architect not attending to his duties, therefore putting the work back. We have paid Mr. Graham one hundred dollars. The excavation by Mr. G. was 1428 yards of surface work.

STONE WORK.

Messrs. Scott & Kerney have laid something over 400 perch of rough wall, estimated at \$4.50 per perch, amounting to \$1,800.

They have also finished about 200 feet of cut-stone sills, at 70 cents per perch, worth \$140. There are about one hundred and seventy-five perch of stone on the ground. It will take about one hundred perch more to finish the rough work. They failed to get their contract done, which was the middle of November. They claim damages from Mr. Graham. Your Committee have paid them \$2,500.00.

BRICK WORK.

The brick contract was let to Chamberlin & Co., of Jones county, to burn seven hundred and fifty thousand, at \$5.85 per thousand, and the College furnish the wood. The first kiln of 200,000 was burned well, but unfortunately too much lime gravel was in the clay which burst the brick; in accepting this kiln there was a deduction of 10 per cent. We have paid them on this kiln \$1010.00.

The second kiln contained about 100,000 of better made than the first, but not as a burn. We have paid \$451.00 on this kiln. The kiln is on the land of Mr. Porter, formerly owned by W. J. Graham, adjoining the farm. We will have to pay to Mr. Graham 20cts per thousand. The first hundred thousand nothing to be paid on.

The whole amount paid to Chamberlin & Co., is \$1,338.82.

CARPENTER WORK.

The carpenter work has been done by the carpenter on the farm, Mr. Kellogg. The work done has been principally the doors, and window frames. We were not furnished the plans, nor the estimates on the carpenter work by our Architect. We were compelled to employ Mr. Kellogg by the day. The carpenter work has cost \$250.00; lumber \$100.00.

ARCHITECT.

In consequence of neglect of duty to the interests of the College, we discharged Mr. Browne early in September. In October we wrote to Secretary Wilson, to call on Mr. Browne for the plans and specifications. Mr. B. refused to deliver them.

We thought it necessary to employ another architect to report at the meeting in January, the condition of the foundation, and if FROM WHOM RECEIVED.

necessary to recommend changes, and to make new plans and specifications, and estimates, for which we have paid Mr. Browne \$350. We employed Mr. Edwards, who went to the farm in December, and who will make a report to your Honorable body. In discharging Mr. Browne, we thought it for the interest of the Institution.

J. A. BRONSON,

REPORT OF THE BUILDING COMMITTEE, 1865.

Your Committee laid before this Board in March last, a statement of their doings in the way of making contracts and preparing for the prosecution of the work on the College building. As soon as the season would permit, work on the foundation was resumed, but on examination, the walls showed that the work of last year was entirely worthless, owing to the manner in which it was put up, and the materials used in its construction.

Under the direction of the architect, (Mr. Dunham,) the old walls were torn down and the excavation enlarged, and new, substantial walls put up.

Your Committee acted upon the supposition that the foundation was all important, and that should we consent to the erection of walls upon the foundation then begun, we should be justly chargeable with a disregard of the interests of the institution and of the State.

The work now done is (in our opinion) of the best quality, and the foundation all that could be desired.

The excavation in 1864, was hurriedly done and the dirt left in heaps immediately about the foundation site, in consequence of which the water was running into the foundation from some distance about the same. In order to remove this difficulty, Mr. Robertson was directed to do the necessary grading, and, in the meantime to place the dirt excavated by him, where it would be wanted so as to avoid similar difficulties in the future, and at the same time secure an early completion of the grading.

The failures in the manufacture of brick for the first year were to us all a source of trouble and disappointment; fears were entertained that we should not be able to get such brick as should be used in the construction of such a building.

After a careful examination of the material on and about the College Farm by the Architect and Mr. Robinson, it was decided to open a new yard on the farm. This was attended with considerable expense, but we are gratified in being able to say that we have succeeded in obtaining a better article of brick than can be found anywhere else in central Iowa at a cost below what common

brick are now selling for at this and other points in the State. It is to us a source of satisfaction to be able to say that the work done this season is so much accomplished towards the completion of the College building. We have now about eight hundred thousand brick ready for the walls.

The foundation is all in, making twenty thousand feet of stone work. A coal vault in the rear of, and attached to the center of the building is finished. The grading around the building is all completed and in readiness for such improvement as may be determined upon in the spring.

The following statement will show the receipts and expenditures of the Committee since the commencement of the last year:

REPORT OF C. A. DUNHAM, ARCHITECT IOWA AGRICULTURAL COLLEGE BUILDING.

To the Building Committee and Board of Trustees of the Iowa State Agricultural College:

GENTLEMEN:—In making this report, I will give you a statement of all which is worthy of note, that has been done upon the College Building, and the condition of the works when they came under my direction, also of certain changes which have been made in the plans of the building.

On the first day of February, 1865, I received the appointment as Architect for the College building from Hon. W. H. Holmes, Chairman of the Executive Board. In his letter to me he suggested that the form and dimensions of the lecture room might be greatly improved, and authorized me to make any other improvement in the original plans, which I might deem beneficial, curtail-

ing the cost wherever it could be done without injury to the convenience and general appearance of the building.

Upon inspection of the original drawings, it was found that the Lecture Room was in such a form that it would be impossible to use it for the purpose for which it was intended. There was no place to put the speaker's stand, so that what he was talking about could be heard understandingly half way across the room, and it could not be seated so as to accommodate one-fourth of the number of scholars, with a full attendance.

The stair-cases came next under my observation; found them to be one-half the usual width of stairs in buildings of this and similar classes. They were arranged in the worst form conceivable. I enlarged that part of the building and put in two good, broad stair cases easy of ascent and descent, and giving by the arrangement two more external doors to rear of the building.

The Library and Laboratory were next taken in hand. Upon inspection of the original plans you will find four small rooms where there are but two in the plans now presented. As Chemistry is one of the most important studies to be taught in the institution, I concluded that it should have as large a room as could be made for it without changing its location or increasing the size of the building. The same might be said of the Library.

The towers were found to be of great size and out of proportion to the balance of the building. At the external angles of the towers there were large, meaningless buttresses, looking like strangers in a strange place. The dimensions of the towers were diminished seven feet each on the ground, which will reduce the cost considerably. The buttresses were discarded; also the large balconies of a costly character of design and workmanship. They were to be constructed of wood liable to decay in a few years, unless given the best attention, with paint and brush, and the use of them is more than I have been able to discover. They certainly could not have been intended for ornament; if so it was a bad in-In the northeast tower the construction of two of its sides was found to be most remarkable, some 16 feet in height was found to show brick walls erected upon a light wooden partition, supported by what was intended to be a truss, without any mechanical principle of construction being properly applied to resist the load which it was designed to sustain. I doubt very much

whether it would sustain its own weight any considerable time. The walls will now receive their support from iron columns. All of these changes were made in the plans, and submitted on the 22d day of February, 1865, to the Building Committee at the College Farm, and on that day I saw what had been done the year previous on the College building. The foundation walls were about one-fourth built, some were up their full height, they were covered in on the top with straw, and well protected around their bases. The walls looked very good, what could be seen of them; there were a few slight fractures which I could not account for at the time, but which will be accounted for hereafter. Met with the Committee and the changes were discussed.

Mr. Melendy suggested that there should be a Museum room close to the Lecture room, where anatomical and other specimens should be kept close at hand, to be readily introduced upon the lecturer's stand whenever wanted to illustrate and convey more forcibly the ideas of the lecturer. For arrangement of room see plans accompanying this report. The next most important change was the abandonment of the system of heating the building by steam, which would cost not less than thirty thousand dollars, three fifths of the estimated cost of the whole building, besides the entailment of heavy expenses annually; a first class engineer would have to be employed to attend to it, one who could do all the necessary repairs, or otherwise in case of a derangement of its proper working, or bursting of pipes, &c., there would have to be a machinist from some city to do the necessary repairs, while the whole school might be left in a very cool condition for some length of time. Mr. Melendy advocated the system of warming the building by hot air furnaces, on the principle of great economy and yearly savings to the Institution, and it was approved by the other members of the Committee. In making excavations for the furnace cellars it became necessary to take down some of the walls that were built, and then the cause of the fractures was discovered. appears that the excavations for the cellar and foundation walls had been made just the size that the building was to have been. The contractors made single-faced walls, using the best stone on the inner face, where it would show their work to best advantage. In many places the walls were several inches thicker at the top than they were at the base. Those parts of the wall between the

bank and the inside course of stone were found to be filled with all kinds of stone rubbish, occasionally bedded in mortar composed mostly of sand and loam. If there was any lime in its composition my eyes failed to discover it. You all know that it requires the best wall where it has the greatest weight to sustain. The walls referred to were exactly the reverse, and let me say to you, there never could have been a brick wall twelve inches in thickness, built upon it two stories in height, without its falling down or fracturing so badly that it would have to be taken down; and it was of such bad workmanship, and partly of such bad materials, that it had to be all rebuilt this past season, and now in place of them you have goed, substantial, double-faced walls, built true to a line on both sides, well bonded and tied together. In the original plans there was no provision made for the thorough ventilation of the rooms.

In the plans now submitted, the rooms are designed to be ventilated as follows: Opposite to where the warm air is admitted into the rooms, registers will be placed in the floors, of the same size as those that admit the warm air, opening to flues in the walls which will lead the vitiated air to the roofs; it will there be thrown off through ejectors. There will be small registers placed near the line of the ceiling in each room opening into the flues above mentioned.

A few other items I wish to say a few words about, in regard to the defects in the original plans. The author of the specifications says the principal roofs must be covered with slate, but the towers and dormer windows are to be covered with pine boards, not exceeding ten inches in width, and their joints covered with moulded battens, three inches wide, a style of finish not much used on public buildings in this country to my knowledge. The sashes to the dormer windows could only be raised about five inches to admit air, which would make the attic rooms anything but desirable study or sleeping apartments on a hot summer day or night. The cornice to the building was to have been of the most elaborate design and workmanship, and of a style wholly unsuited to a building of this character. The elevations are so different in design that it is almost impossible to believe that they were for the same building; in fact it would be impossible to work them up together, nor do they agree with the story plans. The second section or form of roofs was not developed in the drawings, or referred to in the specifications. The form of the roofs was to be of a very expensive kind, requiring two sets of timbers; this has been made straight in the design accompanying, using but one set of timbers. There was but one external door, on the principal story floor plan, now there are three.

I trust that you will excuse me for thus going into details, but I wished to be thoroughly understood, in the reasons for the changes being made. A few words about the brickmaking and the present condition of the works and then I am through. The bricks that were made in the year 1864, were good solid bricks, but were tilled with lime pebbles, and when the rains came in contact with them, and afterwards the frost, the lime in the pebbles slacked and burst out pieces, destroying them for facings for the building, but they will answer every purpose for the interior walls. On the 22d day of February, 1865, the Building Committee received propositions from several brickmakers, and finally made a contract with S. A. Robertson, of Des Moines, who has proved to be master of his profession, to make one million of brick, the number necessary to complete the building. After looking over the ground, I directed him to make a new yard and use the top soil instead of the bank clay, which was used the year previous, and the institution has been well paid by so doing. They will have a superior quality of brick, the best I have seen west of the Mississippi river. There are now made 850,000. The stone foundation walls are one foot above the final grade line, over eight hundred perch having been built the last summer. They have been all covered in and the premises properly graded. Accompanying this will be found detailed estimates of costs for erecting and completing the balance of the work on the building. Accompanying this estimate will be the drawings as now approved by the Committee. These estimates are taken and based upon quantities measured on the plans and drawings by a builder of large experience. The cost of workmanship and materials has been ascertained with great labor and considerable trouble. All of which is very respectfully submitted.

Your obedient servant,

C. A. DUNHAM,

Architect Iowa State Agricultural College Building. Burlington, Iowa, Nov. 22, 1865.

REPORT OF SUPERINTENDENT OF BRICK.

DES MOINES, January 1, 1866.

To the Executive Committee of Agricultural College and Farm:

Gentlemen:—The undersigned would respectfully make the following report of his operations as Superintendent of making the brick for, and laying the same on the College Building, and such other work as was required by you.

At your request I went to the College Farm in February last to make an examination of the condition of the work, and having made such examination concluded a contract with you, which was modified by a subsequent agreement in the month of April.

The first thing to be done was to determine the site for a brick-yard. After a careful examination of the clay and the brick made therefrom the year previous, I was satisfied the old yard should be abandoned—there was too much limestone in the clay, the brick would crack and crumble. Making a thorough investigation, I selected a site in the timber as the most eligible location, notwith-standing it would cost heavily to clear and grade the same. Good brick you must have, and I saw no better chance for gaining that object, and so reported to you, and you were pleased to approve of my selection. Mr. Dunham, the Architect, examined the ground selected, and joined with me in recommending the same to your favorable consideration.

In the month of April, work was commenced on the yard and pushed forward as rapidly as possible and we were ready for brickmaking in May. There being no suitable place for boarding and lodging the men employed, it was necessary to build suitable buildings, and in accordance with your instructions to build the same with the least possible expense compatible with the health and comfort of the men, a building, 16×60 feet, was commenced upon my arrival on the ground. There was a difficulty in procuring lumber, and thereby the work somewhat delayed, and here I must give my thanks to Mr. Graves, the farmer, for his efforts and advice in procuring material. The buildings were completed early in May. The necessary bedding, cooking utensils, &c., were procured, cooks employed, and from that time on, the men were

well satisfied, and I think considerable money saved, besides having the men close to their work.

Being so far from any large mart of trade, much difficulty occurred in procuring provisions, tools and other necessary articles; hence delays were sometimes unavoidable and expenses were somewhat increased; but, upon the whole, I think those of you who know the difficulties were well satisfied to find the total expenditures much less than would have been expected, under the circumstances.

Owing to a change in the plan of the basement of the College, it was necessary to do a large amount of excavation—more than had been done the year previous—and I was also ordered to enlarge the area of the old cellar and basement some eighteen inches around the entire building where mason-work had been done before. This was a work of much difficulty, and, necessarily, slow and tedious, but absolutely necessary to make a two faced wall. And in making this excavation, I moved the earth to the east side of the building where it was needed to fill and terrace.

The architect also ordered me to grade around the entire building. This required a fill on the east side and south and part of the north ends, and the removal of the dirt which had the year before been placed on the west side, and there also make two feet of an excavation.

There was some work required around the Farm House, and at your request I built foundation for portico, pointed up building, built smoke-house and privy, and did some paving. All the brick used came from College Building.

Notwithstanding the extremely bad weather during the greater part of the first four months—hard on brickmakers and masons—losing thousands of brick on account of the heavy storms and rains—the character of the clay and the scarcity of covering lumber—yet, I think I can, with some little pride, refer to the amount of work done and the quality of brick made. The clay was difficult to work, cracking in the yard, and at times I almost despaired, but after experimenting, working and trying, first-class brick were made, and can be made hereafter.

On the 16th day of August I received a notice from you to suspend operations, the money appropriated by the General Assembly being nearly exhausted. This was a grievous disappointment.

Everything was working harmoniously, the weather was fine, and I had hopes of making up during the fall months for the delays and vexations of the spring and summer months, and thus reduce the cost per thousand of the brick at least one-third. Personally, also, it worked a hardship. I had given up my business in this city, and it being too late to make new arrangements, lost the best part of the season. Before I left the Farm, the tools used in the work were gathered together and safely stored away, the boarding house goods and chattels cleaned and packed, and all things left in good shape for a renewal of operations in the spring. The missing and broken tools, and articles, I am happy to say, made but a small list.

The accompanying exhibit will show the amount of money expended by me, and the different purposes for which expended.

In closing my report, I must give to the Executive Committee my warmest thanks for their kindness towards myself, and the readiness with which you, so far as possible, furnished me with advice and funds to push forward the work. I am also under many obligations to the architect, Mr. Dunham, a gentleman whose skill, judgment and honor need no enconium from me.

Account of work done and money expended under direction of S. A. Robertson on Agricultural College and Farm during the year 1865.

OPINION OF THE ATTORNEY GENERAL

[A question having been raised as to whether the Agricultural College lands are taxable, the opinion of the Attorney General was solicited, and that officer has kindly communicated it as follows.]

OFFICE OF ATTORNEY GENERAL,)
DES MODRES, IOWA, Jan. 25, 1866.

Hon. W. H. Holmes, President pro tem., and Peter Melendy, Secretary, &c., of the Ioroa Agricultural College—

GENTS: You ask if the lands granted by the State of Iowa to the Iowa Agricultural College by Chap. 117 of the 10th General Assembly, are liable to taxation under the revenue laws of the State.

These lands were granted by the United States to Iowa for a specific purpose. (See Act of Congress, July 2, 1862.)

The State of Iowa accepted the grant for the purpose specified, and on the 29th day of March, 1864, an Act was passed by the General Assembly granting these lands to the Iowa Agricultural College; and in said Act it is provided that said College should have authority to lease "for a term of ten or more years, any of said lands—the lessee to pay six per cent. interest per annum upon the appraised value of said lands, with the privilege of purchasing the same at the expiration of the lease, at their appraised value at the date of the lease."

All the rights of the lessee are derived under and by virtue of leases made in accordance with the terms of the foregoing provision.

It is provided in the Code, Sec. 712, that "lands bought from the United States or this State, and whether bought on credit or otherwise, are liable to taxation."

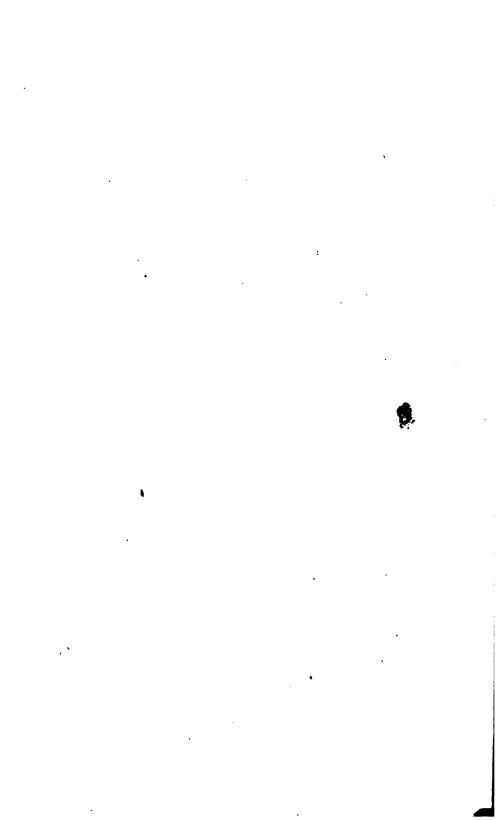

The only question then, is whether these agricultural lands are under the law, and the contracts given bought on a credit or otherwise.

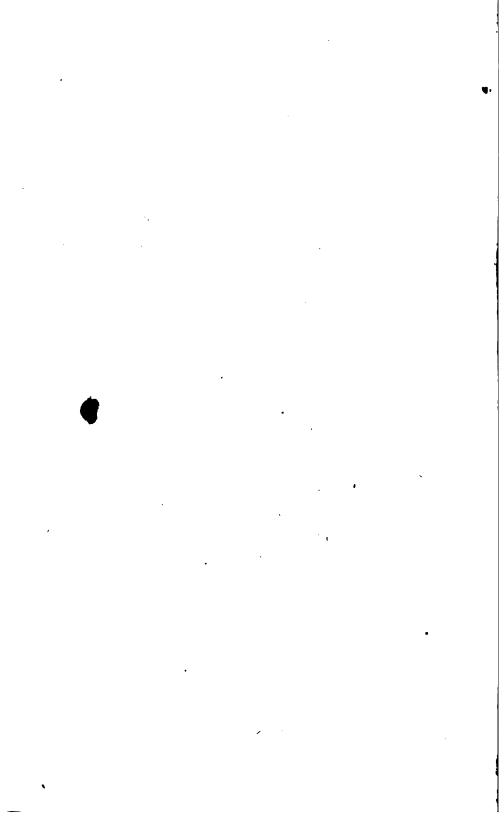

My opinion is they are not. The persons holding the leases are not purchasers—they have neither paid for the land, nor have they agreed to pay for the same.

The lease may be an agreement to sell, but it is not an agreement to buy, for no one is bound to pay.

My opinion therefore is that these lands are not subject to taxation under any law now in force.

F. E. BISSELL, Attorney General.

TRUSTEES' REPORT.

To the General Assembly of the State of Iowa:

Though not specially required by law to report to your Honorable Body, the Trustees of the "Institution for the Education of the Blind," beg leave to present some matters for your consideration, which to them seem essential to the future prosperity of the Institution.

Hon. Norman W. Isbell and Hon. Rush Clark, appointed Trustees by the Act of the 10th General Assembly, approved Feb. 27, 1864, failed to qualify, and Gov. Stone appointed Robert Gilchrist, of Benton county, and Joseph Dysart, of Tama county, to fill the vacancies.

When the present Board organized in August, 1864, they tound the condition of affairs such as to require important changes in nearly every department. The position of Principal was tendered to and accepted by Rev. Reed Wilkinson, whose character as a ripe scholar and successful educator had been well attested by eminent citizens of our own and other States. Experience has shown the choice to be a happy one. He immediately introduced order and system throughout, and established a rigid yet parental discipline, which has been well maintained. His zealous and persistent efforts to raise the moral tone of the Institution have been crowned with success.

A majority of the Board attended the annual examination in May last, and were highly gratified with the proficiency exhibited by the pupils in the various branches usually taught in common schools and Academies, as well as in music, trades and handicraft. It was apparent that diligent exertions had been made to secure thoroughness in all attainments.

The appropriations heretofore made have been exhausted upon the main building, work-shop, and other improvements. About twenty stoves are used to warm the rooms. It is plain that there are just so many chances for the destruction of the Institution buildings by fire. In similar Institutions in adjoining States, a heating apparatus takes the place of these stoves, thereby avoiding this almost alarming risk of fire, as well as the frequent damage to the clothing of the pupils, by coming in contact with overheated stoves. We consider that safety and economy both require the purchase and introduction of such an apparatus at an early day.

There is no insurance on the building or furniture. The Trustees doubt whether, under the law, they have authority to cause it to be insured.

It has been found necessary to keep some cows and a team at the Asylum, but great inconvenience has been felt for want of a barn for shelter, and for storage of hay and grain for their use. We therefore ask you to make an appropriation of three thousand dollars for the construction of a barn, wood sheds, hog pen, fencing, and other incidental improvements.

The appropriations made by the 10th General Assembly for the current expenses of the Institution were based on the prices of the necessaries of life and merchandise, at the time of its sitting. You are well aware that these have greatly advanced since that time: hence it has been almost impossible during the last year to keep the current expenses within the limits of the appropriation. We see nothing to indicate the speedy return of former low prices; and in our judgment forty dollars per quarter for each pupil for the next two years will be necessary to keep up the current expenses of the Institution.

The duties of Matron are arduous. The mental, physical and moral endowments necessary for the position, but few possess. Happily for the interests of the Institution, these are found to be possessed in an eminent degree by the present incumbent, Mrs. N. A. Morton, whose rare executive ability, motherly care, and tender sympathy for the sick, entitle her to the highest praise. The Trustees consider \$250.00 an inadequate compensation, and would suggest that the salary of Matron be raised or the restriction removed, so as to allow the Board to fix her salary, as in case of all other officers and employees except the Principal.

If fostered and sustained by you in the future in the same liberal manner as hitherto, the Blind Asylum of Iowa will, ere long, be

entitled to the first rank among the charitable institutions of the country.

JAMES McQUIN, JOSEPH DYSART, ROBERT GILCHRIST, ELIJAH SELLS, JAMES CHAPIN,

REPORT OF THE SUPERINTENDENT.

His Excellency, William M. Stone, Governor of Iowa:

Sir.—In compliance with an Act of the Tenth General Assembly, the seventh biennial report of the Iowa Institution for the education of the blind is herewith presented.

In discharging this duty, I am happy to report a continued and increasing prosperity of this noble State charity. I am happy to report also, a cheerful and hearty co-operation of the Trustees, Teachers and officers, in the effort to carry out the designs of its benevolent founders.

The result, by the blessing of God, has been most propitious. Our numbers have constantly increased. Content, order, and general happiness have prevailed; and the progress of the pupils in science and literature, in the mechanic arts and general culture, has been most gratifying to their friends, and eminently satisfactory to visitors from abroad who have favored us with their calls.

While thus cheered and strengthened by success achieved, we do not forget that we are not perfect. But we aim at perfection—and confidently hope, by patient and persevering efforts, to raise many a young man and young woman from a state of comparative helplessness and dependence for support on the charity of others, to a positinn of honor, usefulness and the ennobling independence of self support.

OUR NUMBER.

The whole number enrolled for the time covered by this report, is sixty-three—a number as great, if not greater than has been reported at any former period. Of this number five have finished their course and left; five are temporarily absent, and one has died. The remaining fifty-three are now members of the Institution.

Eighteen of the number now present are new pupils, having never been here before.

For diligence in study, for energetic efforts for improvement, and for success in mastering the several branches of science and art, to which their attention has been directed, they are rarely excelled by any school or academy for the seeing. With teachers to guide them who are "apt to teach," they learn as fast as the seeing. And justice to the pupils requires me to say that their zeal for knowledge and persevering application to study, are worthy of all praise. The exceptions to this remark are very few indeed. The great majority evince a due appreciation of the privileges here accorded them by a wise and liberal legislation.

TEACHERS AND OFFICERS. .

This institution has six teachers besides the Principal. Two for the branches usually taught in academics—two for music, and two for the mechanical departments. Each teacher is amply qualified for his or her trust, and is kind and faithful in the discharge of every duty. This is manifest to every visitor. Their works praise them.

Nor should less be said of the Matron and Steward. Both are persons of experience, and exercise the duties of their office with a faithful and wise reference to the comfort of the household, and the best interests of the Institution.

GOVERNMENT.

This is parental, patient, kind and decided. The discipline of the Institution aims at two things,—a proper restraint, and the formation of a good character. It is deemed to be as much the duty of the educator to aid his pupils in the formation of correct principles, as to aid them in the acquisition of useful knowledge. To train, and store the intellectual powers with knowledge, and neglect the morals, is to put a sword into the hands of a mad man. While, therefore, our principal object is to discipline the mind and store it with knowledge, the formation of character is not neglected.

COURSE OF INSTRUCTION.

This embraces, in addition to music, and the reading of Raised Print, instruction in all the branches included in the Common School system of the State.

It embraces, also, Algebra, Geometry, Intellectual and Moral Phylosophy, Chemistry, Natural Philosophy, and the theory of Surveying. Especial attention is given to Music, for the reason that many of the blind are expected hereafter to give instruction in this science as a means of support. And for the same reason, all the pupils are taught some handiwork or trade. The males are taught to make brooms and brushes, and the females bead-work, knitting and sewing. In these several branches of industry they make very great proficiency.

CURRENT EXPENSES.

The appropriations made by the last Legislature for current expenses, although very liberal, in view of what was then expected, as to the price of labor and the expense of living, yet as things have turned out, have proved quite insufficient for carrying forward the Institution with ease and comfort, to say nothing of advantage. We have had to economize in every possible way to get along at all. In a course of retrenchment we have discarded not only all luxuries, and some comforts, but have even lessened that degree of variety in articles of diet which is generally deemed essential to a healthy state of body and mind. Nor do we see any end of high prices near at hand. It is hoped, therefore, that the Legislature will be inclined so to increase their appropriations for our current expenses, that they shall correspond to the increased expense of living, since their last appropriations were made.

MUMBER OF BLIND IN IOWA.

The number of blind persons in our State is about three hundred. In view of this fact, it might very naturally be supposed that a larger number than we now have, ought to be here. And so there should be. But the consideration of a few facts will modify our judgment on this point. This Institution is a School, and not an Asylum; an Academy, and not an Almshouse. A large part of the blind of the State are too old to go to school. A larger part, perhaps, too young. A third class are too feeble and sickly; and a few have been educated in the older States before coming to Iowa. When, therefore, the whole number in the State has been discounted to the amount of the sum total of the classes named above,

the number left of suitable age, health and capacity, to receive an education, is quite small,—considerably less than a hundred.

This opinion is the result of careful observation and inquiry. During the last vacation, the Superintendent spent forty days traveling in the service of the institution. During that time, he traveled with herse and buggy more than 1,100 miles, and thoroughly canvassed seventeen counties in the eastern part of the State. The information gained by this canvass led to the above named conclusion. The percentage of our whole number of blind, now in a course of education, is greater than in some other and older States. Greater than in Ohio or Illinois, yet there are undoubtedly many at home who ought to be here, and would be, if the character and object of the Institution, and its facilities for giving an education were more fully known.

MISCELLANEOUS ITEMS.

The appropriations made by the last legislature for improvements, have been carefully applied to the objects for which they were intended.

But our wants are not fully supplied. Other improvements are greatly needed to remedy present inconveniences, and to add the needful facilities for carrying out properly, the purposes for which this institution was founded. Among these, I may mention a new piano forte, and some instruments for the Band. So great is our need in this regard, that nearly one-fifth of the pupils, who need lessons in the use of these instruments, cannot be accommodated.

But the Trustees in their application to the legislature for special appropriations, will specify the particular objects for which they are asked.

Tables or Schedules exhibiting the receipts and expenditures of the institution for the last two years, will accompany this report. All of which, it is hoped, will be satisfactory.

The Trustees, with equal regard to economy and utility, have taken great pains to improve the Asylum grounds. Almost all are put under cultivation; and more than 300 trees, ornamental, shade and fruit, have been planted and are doing well.

In concluding this report, allow me to remark, that the citizens of Iowa have reason to be proud of their noble State charities. They are paying institutions. Iowa has made herself a noble

record by the part she has borne in our late struggle for national life and existence. But her wise and benevolent legislation, as exemplified in her Common School System, and her Asylums, has contributed not less really, if less abundantly, to give her that enviable position which she now occupies amongst the rising empires of the West. To her youthful vigor and manly virtues, they give grace and beauty. They give her self-respect at home and consideration abroad. They give increased value to her lands, and attract the better class of immigrants from every country to her hospitable home. These valuable results are secured, so far as this Asylum is concerned, by a tax of only four cents per annum on each \$1000 of the taxable property of the State. These investments pay them. They are among the most remunerative of all investments of public capital.

The following tables exhibit the number of pupils who have been and are now connected with the Asylum, and such facts respecting them as the law requires. Also the receipts and expenditures for the time now reported, will be found under their appropriate heads.

Respectfully submitted,

REED WILKINSON, Superintendent.

VINTON, December, 1865.

From September 1, 1864, to December 1, 1865, the current expenses are as follows:

\$2,950.00
664.50
325.00
74.00
1,382.92
423.86
906.57
174.49
575.97
83.05
192.95
5,082.08
187.51

Live stock purchased	214.99
Music, and musical instruments	
Fuel	1,270.64
Livery stable bills	9.00
Periodicals and printing	
Stationery	7.75
Beads for Industrial Department	
Sundries	146.70
Medical attendance	135.00
	\$21,970.38

The mechanical departments have been well sustained, whether we judge of them by the mechanical knowledge gained by the pupils, or the amount of work done.

As I have not the means at hand of exhibiting in detail the condition of these departments for the first eight months of 1864, I give their expenses and receipts from September 1, 1864, to December 1, 1865, only.

MALE DEPARTMENT.

Received for brooms, &c., sold	1,144.34
Expended for materials, same time	575.97

Choir, from 4 to 5 each day.

Recreation, from 5 to 6 o'clock each day.

Supper at 6 o'clock each day.

Music from 6 to 7.

Class in English Literature, from 7 to 8 each day.

Class in theory and composition of Music, from 8 to 9, Monday and Thursday.

On Sabbath, Bible Class from 8 to 9 o'clock A. M.

On Sabbath, Lecture from 3 to 4 P. M.

Pupils attend church at such places as they or their parents or guardians prefer

NOTICE TO APPLICANTS.

This school is strictly educational, and not for the treatment of disease. The annual term commences the first Wednesday in September and closes the fourth Wednesday of June, giving July and August as a vacation in which the pupils visit their homes and friends.

Scholars from Iowa, of suitable age and capacity for education, and who conform to the regulations of the institution, will receive their boarding and instruction at the expense of the institution. Their friends will be expected to furnish them with a competent supply of clothing, and to be at the expense of their traveling to and from the institution.

Pupils may be admitted from other States upon payment of \$170 per annum.

Applications should be addressed to Reed Wilkinson, Principal, Vinton, Benton county, Iowa, and should contain answers to the following questions:

1st: What is the name, age, residence, nativity and cause of blindness of the applicant? Who is the nearest friend, and to what post-office should the reply be sent?

2d: Is the applicant of sound mind, free from contagious diseases, and of sufficient physical strength to receive an education?

3d: Is he or she totally blind? If not, is the degree of blindness such as to prevent the acquirement of an education in a school for the seeing?

4th: How has the applicant been heretofore employed? What instruction has he or she received, and at what age did he or she become blind?

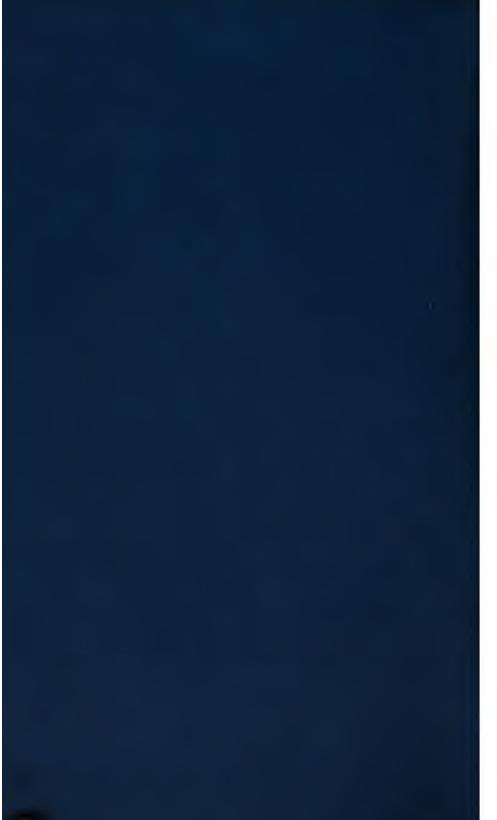

5th: Who will provide clothing for the applicant, and take charge of him or her during vacation?

Upon proper answers to the foregoing questions, parties interested will be notified as to the result of the application.

NOTE.

The thanks of the teachers and pupils of the Iowa Institution for the Education of the Blind, are hereby tendered to the proprietors of the following newspapers: "Iowa State Register," "Cedar Valley Times," and "Vinton Eagle," for a copy of each sent weekly and gratuitously to the Institution.

REPORT.

To His Excellency, Wm. M. Stone, Governor of the State of Iowa:

The Trustees of the Iowa Hospital for the Insane respectfully submit their Third Biennial Report.

The Trustees have, at length, the satisfaction of reporting that the Hospital is finished, in all its departments, and ready for the reception of its full complement of patients.

It appears from the report of the Superintendent, which is herewith submitted, that, at the date of the last report, there were in the hospital two hundred and sixteen patients; that there have been admitted since, two hundred and sixty-nine; that four hundred and eighty-five have been under treatment; that there are now remaining in the Hospital two hundred and eighty-four. During the same period one hundred and fifty-six were discharged, and fifty-five died. Fifty were discharged as recovered, fifty-nine as improved and thirty-seven as unimproved. The whole number admitted since the opening of the Hospital has been six hundred and eighty-two, and the whole number discharged, three hundred and ninety-eight.

1864, amounted to	\$52,615.84
Expenditures	53,128.12
Excess of expenditures over receipts	512.28
The receipts for the fiscal year ending October 31,	1865, includ-
ing eleven months, amounted to	\$64,324.18
Expenditures	63,384.87
Excess of receipts over expenditures	939.31
At the date of the last report, the price per week ch	arged for the

board and treatment of patients was three dollars. The advance in the cost of provisions and the wages of attendants, compelled the Trustees to increase the charge to four dollars, at their meeting in September, 1864; and at the present meeting they have found it necessary to raise it to four dollars and twenty-five cents per week.

The Act of the Legislature "making further appropriation for the Hospital for the Insane," approved March 22, 1864, appropriated twelve thousand dollars "to extend and repair sewers; for pavement around Hospital, to finish wards, to furnish wards, to construct cisterns, for planting trees and improving grounds, for omnibus, &c., for patients and contingent expenses." In applying this appropriation, the Trustees were embarrassed by the great and unprecedented advance in the prices of materials and labor above what they were when the estimates were made, upon which the appropriation was based. They were further embarrassed by an unexpected demand for large and indispensable contingent expenses. It was discovered that the boilers were much damaged from the use of the impure water, much impregnated with lime and magnesia of the artesian well. To save them from total ruin, it was found necessary to re-set and make extensive repairs upon them, at an expenditure of nearly two thousand dollars. The coal in the coal-house had, several times, been discovered to be on fire. On examination, it was believed that the coal was ignited by contact with a heated flue which passes under it from the boiler to the chimney. It was considered indispensable to construct a new coal house without delay in a safe situation, and at once to remove the coal to it. These unforeseen and unavoidable contingent expenses absorbed a large proportion of the appropriation. As all the purposes of the appropriation could not be answered, the Trustees applied it to provide for the most urgent wants of the institution. as follows:

Finishing, furnishing and painting the unfinishd	
wards	\$4,311.74
Repairing and re-setting boilers	1,765.40
Additional steam coils and flues	654.86
Coal house and cistern	4,275.50
Worthington pump	600.00

Improvement, and additional cooking apparatus	268.00
Bell	125.00
Total	2.000.00

No money has been expended for extending the sewers or laying a pavement around the Hospital. The rain running down the sides of the building has so softend the earth, that the wall in many places has settled, thereby doing much damage; and besides the water frequently penetrates under the wall into the basement and becomes stagnant or flows off in the fresh air ducts, vitiating the air passing through them to ventilate the different wards. When the last report was made, it was thought, that a pavement around the building would remedy the difficulty; but, on further examination, it is believed that a pavement would be inadequate to the purpose, and that it will be advisable to dig a drain around the building of sufficient depth to carry off the water. It is estimated that a drain, while it will be more effective, will be less costly than the pavement.

The sewers under the Hospital are so imperfectly constructed, and so frequently get out of repair, the Trustees are satisfied that it will be necessary to abandon them altogether. They pass under the ventilating air chambers, so that the deleterious gas escaping from them are forced into the apartments of the inmates, corrupting the air they breathe and endangering their health. It is believed to be expedient to substitute cast iron pipes for the brick sewers under the Hospital, all uniting in a common sewer at some point exterior to the building. By this arrangement the escape of noxious vapors, from which so much danger is to be apprehended will be prevented. The necessity of this improvement is more urgent from the approach of that dreadful scourge of the human race, the cholera.

The use of the water of the Artesian well has proved so destructive to the boilers and water pipes, that it is necessary to entirely dispense with the use of it in them. In order to have a constant supply of suitable water for washing, and for steam purposes, it will be indispensable to construct another cistern of sufficient capacity to preserve all the water that falls from the roof.

Dr. Patterson, in a communication which accompanies this report, recommends an appropriation for furniture, for repairing and

painting the roof, for painting the casings of the windows, and the wood work of some of the wards, and improving the grounds and shrubbery. In this recommendation, the Trustees entirely concur.

The original plan of the Hospital contemplated its being lighted by gas, and all the gas pipes for the purpose have been laid, but the works for manufacturing gas have not been introduced. In the mean time the building has been lighted by lamps burning kerosene. The danger from lighting by this means, a building occupied by the insane, has occasioned the Trustees much anxiety, but the delay has, in part, been made in order to ascertain the success of a new invention called the "Automatic Gas Apparatus," which, it was represented, would save the very considerable expense of constructing gas works, and, at the same time furnish an abundance of light, at a much less annual cost. From the information which the Trustees have obtained, they are convinced that this apparatus has proved entirely successful, and that it is expedient to introduce it here. The cost of constructing gas works, it is estimated cannot be less than five thousand dollars, while the cost of introducing this apparatus will not exceed eighteen hundred dollars.

The appropriations necessary to make the repairs and improvements recommended, are estimated as follows:

For digging drain	700.00
For cistern and connections	2,500.00
For reconstructing sewers	2,500.00
For painting and repairing roofs	1,800.00
For repainting wards	850.00
For furniture	2,500.00
For grounds, fencing and shrubbery	1,500.00
For apparatus for lighting	1,800.00
For contingent expenses	1,500.00

15,650.00

The Trustees deem it of the utmost consequence, that a considerable sum should be appropriated for contingent expenses. In an institution so extensive as this, accidents involving the necessity of making unforeseen repairs must inevitably happen, which will, unless provided for, cause serious embarrassment.

The Trustees have to report a serious cause for regret in the re-

tirement of Dr. Patterson from the office of Superintendent. At the commencement of their labors, they were deeply impressed with the idea that the success of the Hospital, in accomplishing the humane design of the Legislature in establishing it, must chiefly depend upon the selection of a Superintendent. With this impression, they thought the widest fields of choice should be open. The names of many eminent physicians of the United States were before them. After much inquiry and deliberation they elected Dr. Patterson with high anticipations as to the results of his administration of the difficult trust to which he was called. former reports of the Board, and this, show that their anticipations have been fully realized. The talents which fitted him to shine in any profession, he devoted with enthusiasm to the study and practice His learning, experience, and skill qualified him for eminence in any department of it, but he paid his particular devotion to those obscure, mysterious, and terrible maladies which assail the reason, and improve or destroy the functions of the soul. They lament that circumstances have forced him to abandon a department of the profession where he had already acquired so much fame and accomplished so much good.

The Trustees have also to lament the resignation of Dr. Dewey, of the office of Assistant Physician. Dr. Dewey entered upon duty with Dr. Patterson, at the opening of the Hospital, and has, at all times, been his faithful, skillful and efficient assistant. He has discharged the various duties of his post to the entire satisfaction of the Superintendent and the Trustees. They part with him with regret.

In filling the vacancy occasioned by the resignation of Dr. Patterson, the Trustees acted upon the same principle that governed their conduct in electing him. They embraced the widest field of choice. They elected Dr. Mack Ranney, Assistant Physician in the McLean Asylum, at Somerville, Massachusetts. Dr. Ranney has had much experience in the department of medical practice to which he is now called, under Dr. Ray, Superintendent of the Butler Hospital, at Providence, Rhode Island, and under Dr. Tyler, Superintendent of the McLean Asylum, and he is most highly recommended by those distinguished physicians.

Dr. Ranney has entered upon duty, and the Trustees have

reason to believe that he will discharge the duties of the office is a manner equal to their high expectations.

The act for the incorporation and government of the Hospital for the Insane, appointed seven Trustees, two for two years, two for four years, and three for six years. The longest term, six years, has not elapsed, yet in this brief space, four of the seven have died, Col. Samuel McFarland, Dr. John D. Elbert, Dr. D. L. McGugin and Mr. Harpin Riggs. The survivors feel, with deep sensibility, this fatal and admonitory incursion of death into their narrow circle: they participate in the grief of the bereaved families of their late associates, and they lament the loss sustained by Iowa, of so many citizens, whose virtues pointed them out for selection for the work of putting in operation this greatest of the charitable institutions of They cannot refrain from paying some tribute, slight indeed, to the memory and the worth of their departed colleagues. Col. McFarland was the youngest member of the Board, yet he had attained the foremost rank among the legislators and politicians of He was the author of the law under which we are now acting, and prepared the code of by-laws by which the institution is now governed. No member of the Board had more weight or influence than he. When his country summoned him to arms, he obeyed her voice with alacrity, and led his regiment to the field of battle, where he fell gallantly fighting at its head.

Dr. Elbert was a pioneer in the settlement of the State; he had been a member of the Territorial Legislature, and President of the Council. His generosity, his kindness of disposition, and his public spirit made him a suitable guardian of an institution of charity; and his cordial good humor made him an agreeable companion in every circle.

Dr. McGugin occupied the highest rank as a physician, and he devoted his fine talents with zeal to the advancement of medical science and to the improvement of medical education. He gave the first impulse to the movement which resulted in the establishment of this magnificent Institution. He made a journey in the winter to the Capital of the State, to deliver an address before the Legislature on the necessity of erecting a Hospital for the Insane.

Mr. Riggs was a man of practical and solid sense, and remarkable capacity for the transaction of business. The City of Mount Pleasant and the County of Henry had employed him in various

responsible offices, the duties of which he discharged with exemplary fidelity. It was fortunate for the county to have a citizen so upright and so gifted, and it was creditable to the people to employ him in their service.

IOWA HOSPITAL FOR THE INSANE, Nov. 1, 1865.

DR. PATTERSON'S REPORT AND RESIGNATION.

To the Board of Trustees:

Gentlemen:—Owing to circumstances connected with the health of my family, and according to notice given you three months ago. I now resign the office of Superintendent of the Iowa Hospital for the Insane, and shall desire to vacate the place on or before the first day of October next.

By request of your Board, before leaving the institution, the following brief statement is respectfully submitted:

The last General Assembly of the State appropriated the sum of \$12,000 for finishing and furnishing wards for patients; for additional cisterns, for sewerage, and for other necessary improvements and repairs.

This appropriation being insufficient to accomplish all that was desirable and necessary, the money was expended under your general direction for such purposes, and in such manner as seemed to promise most benefit to the institution, as follows:

For finishing four wards,\$	1,580	00
For painting and paints,	1,240	70
For furniture,	1,491	04
For repairs and resetting boilers,	1,765	40
For additional steam coils and flues,	654	36
For coal house and cistern,	4,275	5 0
For Worthington Pump,	600	00
For improvements and addition to cooking ap-		
paratus, /	268	00
For bell,	125	00

Total, ... \$12,000 00

Many minor improvements are included in the above condensed statement, such as grading and fencing grounds, planting shrubery, improvements in sewerage, digging additional well, &c., &c.

Many necessary repairs have been made from the Current Expense Fund; thus, as in former years, unjustly increasing the cost of support. All these extraordinary expenses should be fully met by special appropriations.

All vouchers on account of all expenditures have been examined and approved by a committee of your Board. Bills due the institution, on account of support, are more than equal to outstanding accounts against it.

In regard to the immediate future wants of the institution, I am obliged to report that the past wet season has shown the necessity for constructing an under drain alongside most of the outer walls of the buildings, in order to keep the basement dry and prevent the walls from settling. A pavement around the entire buildings will also be needed to aid in carrying off the surface water, and thus more perfectly protect the foundation walls.

The water from the artesian well being strongly impregnated with lime and other substances, is particularly destructive to the boilers, and the steam and water pipes; therefore another cistern of great capacity should be added, so as to save all the rainwater that falls on all roofs.

The improvements and extension of sewers mentioned in our last report have been commenced and will need to be completed.

The sulphurous carbon that falls from the top of the smoke stack upon the iron roofing, together with the action of the elements, is already damaging the roofs, threatening rapid destruction unless they are protected by paint, which should be done as soon as possible.

Some of the wards which have been longest occupied by patients, and numerous window casings and other wood-work, greatly need repairing, and all the wards need additional furniture.

The fencing about the grounds, now advanced toward completion, should be finished. The grounds should have additional shrubbery, further extension of walks, roads and grading.

The estimated amount of appropriations needed for these desirable and necessary improvements, is as follows:

For pavements around buildings	\$1,000	00
For under-draining	600	00
For large cistern and necessary connections		00
For improving and extending sewers	2,500	00

For repairing and painting roofs	1,800	00
For re-painting wards, &c	850	00
For furniture	5,000	00
For fencing	1,500	00
For grounds and shrubbery	1,000	00
	16,000	00

For the benefit of those who will succeed me, as well as for the good of the institution, I am moved to say that the salaries of the resident officers are not equal to their labors and great responsibilities. The salary of the Superintendent should not be less than \$2,000 a year. The State of Illinois pays the Superintendent of her Hospital for Insane \$2,500 a year, and does not pay too much.

Five years ago I was elected to the office of Superintendent of this Institution. The statute under which I was elected fixed the term of office at six years, and the salary at \$1,500 a year. At its extra session in 1862, the Legislature reduced this moderate compensation to \$1,200 a year. That this reduction should have been made to take effect during the term for which I had been elected, I feel to be unjust. Having labored to the best of my ability, the State should have fulfilled what was regarded, when I accepted the office, as its part of the contract. This is my only cause of complaint since my connection with the institution, and if the next Legislature think it just, even this may be remedied.

Of all the beings made in God's image, those bereft of reason most need human sympathy and protection. As a rule, it is from their misfortunes, not their faults, that so many stumble and fall, where all of us walk insecurely. For those who cannot plead for themselves, we bespeak a continued generous support from a generous Christian people.

In taking leave of the Trustees I have to thank them for numerous personal kindnesses, and uniform official support. During these first critical years in the history of this Institution, our best efforts have been earnestly engaged, and in common with you all I shall ever feel a warm interest in the continued success of this noble State Charity, which, from its first organization, has shared so largely our labors and sympathies.

Respectfully your obedient servant,

RICHARD J. PATTERSON,

IOWA HOSPITAL FOR THE INSANE, Sept. 6, 1865.

DR. RANNEY'S REPORT.

To the Board of Trustees of the Iowa Hospital for the Insane:

GENTLEMEN: - During another biennial period, this Hospital bas been quietly and successfully fulfilling its mission to those suffering citizens of the State who have needed its care. The system of moral treatment and general management, so fully described in previous reports, has been carried out with excellent results. judicious combination of labor and recreation, a proper discipline and regulation of habits, attention to diet, and a due regard for the general laws of health; the avoidance of restraint, as far as possible; the employment of attendants of a high order of general and moral worth; the removal of whatever would tend to excitement and irritation, have been followed by quiet and order in this large household—to such an extent, indeed, that no misfortune of a very serious nature has occurred. So positive, indeed, is this result, and so well known to your Board, as well as to the numerous visitors to the Hospital, that I feel I hardly need mention it here.

By a change in the law, the period embraced in this report is twenty-three months.

Since the opening of the Hospital, six hundred and eighty-two patients have received its care and benefits. Three hundred and ninety-eight have been discharged, leaving two hundred and eighty-four under treatment at this date. At the date of the last report, there were in the Hospital two hundred and sixteen persons; one hundred and seventeen men, and ninety-nine women. Since then there have been received one hundred and twenty-seven men, and one hundred and forty-two women; in all, two hundred and sixty-nine; and there have been discharged ninety-eight men, and one hundred and three women; in all, two hundred and one; leaving in the Hospital, on the 31st October, two hundred and eighty-four—one hundred and forty-six men, and one hundred and thirty-eight women.

Of those discharged, there were regarded as recovered, fifty—nineten men and thirty-one women; fifty-nine were more or less improved—twenty-eight men, and thirty-one women; and thirty-seven appeared not improved—twenty-four men, and thirteen women. There have died, twenty-seven men, and twenty-eight women—in all, fifty-five. Of these, four died of exhaustion from chronic insanity; three of acute mania; fifteen of diarrhea and dysentery; nine of consumption; ten of epilepsy; four of general paralysis; four of erysipelas; two of apoplexy; and one each of softening of the brain, abscess of the lungs, peritonitis, and diabetis.

The following tables, extracted from the records of the Hospital, will be found to be of interest:

The large mortality from diarrhea and dysentery—our great foes—should engage attention, and lead to measures to prevent or diminish it, if possible. That something can be done in this direction I feel sure; and strong reasons exist why there should be no delay. In the production of these disorders, much is due, undoubtedly, to the imperfect construction of sewers and air-ducts,—an evil which experience proves can be remedied by a moderate outlay.

Something should be done to increase our small but well selected library. I deem, this a very important matter, and our wants in this respect become every day more pressing. To a large number of our patients the hours of hospital life could hardly be tedious, were they furnished with a proper supply of reading, judiciously

chosen; for pleasant reading brings cheer even to the most inclement weather, and, when night shuts in, the book, the magazine or the newspaper comes to break in upon the monotony that might otherwise prevail.

I would also suggest that measures be taken without delay to embstitute gas for our present mode of lighting the Hospital. The cost, it is believed, would be but slightly enhanced, while we should have at command—which is very desirable—a much greater amount of light. However little danger there may be in the use of kerosene in private families, there can be no doubt, I apprehend, of most serious objections to its use in such a family as this.

The weekly, social and other entertainments have been kept up with great regularity, and are a source of incalculable benefit to the household. They are looked forward to with earnest interest, and any interruption is felt to be a great deprivation. Means for making these weekly entertainments still more beneficial, useful, and instructive, are wanting, and it is hoped they will not be withheld.

Religious services continue to be held every Sunday afternoon in our chapel. Rev. Dr. Kern, of the Methodist church, and Rev. Dr. Gunn, of the Baptist church, and Rev. J. W. Picket, of the Congregational church, officiate alternately.

Work of no inconsiderable value is done by many patients; but its chief value lies in the health and vigor that it brings with it. In addition to common employments, considerable fancy work is done by the ladies and their attendants, which, it is hoped, will swell our small but useful "amusement fund."

Employment is found to act beneficially, by recalling the wandering mind from its unrealities to the common relations of life. It is intended that it shall be so limited that it shall not be wearisome, and so judiciously varied as to call into action powers latent or obscured.

I take this occasion to offer a few reflections, which may not be unprofitable, or out of place here.

The history of American institutions for the insane will ever be a matter of interest and pride. Previous to a half century ago, only one or two of these institutions existed in this country. Upon everything pertaining to the disordered intellect, the utmost ignorance and darkness prevailed; and, with the ancients, many believed insanity to arise from some supernatural cause, or to be a

direct judgment for the violation of some human or divine law. Where these false and superstitious notions obtained, the unfortunate victims of this disease were subjected to a treatment from a contemplation of which we gladly turn! But this dark picture, the . legitimate result of the rude social systems of those times, is enlivened by the noble efforts and wonderful achievements of two men, whose names have come down to us, and will be transmitted to posterity to mark eras in the history of insanity. Though trammeled and misguided by ignorance and bigotry, St. Vincent de Paul in some degree rescued the insane, in some portions of Europe, from being wholly outcasts, unfit for compassion or sympathy, and looked upon with terror. He proclaimed that humanity and charity, as well as Christianity, demanded protection for the disordered mind. He moved the hearts of the people, and relieved the suffering of multitudes of his fellow-men. For more than a century, to him and the pious monks, his contemporaries and successors, were the insane committed in large numbers; and, though ignorantly, and perhaps barbarously as viewed at this time, they no doubt discharged their trust, in many respects, with great fidelity.

Such was the state of things relative to the insane on the continent of Europe, when the illustrious Pinel appeared. Full of the ardor, enthusiasm and confidence of a reformer, guided by the training of the best schools, and the teachings of science, and liberating a large number in Parisian hospitals from shocking treatment imposed by ignorance and fear, Pinel instituted the modern treatment of the insane,—a rational and humane treatment, which, perhaps, has reached its highest developement in this country.

Long after the advent of this celebrated man, however, and the success, wherever it was introduced, of his system, so marked by kindness and humanity, the condition of the insane, with a tew shining exceptions, was almost wholly unalleviated. The Parliamentary inquiry of 1815 revealed what it were painful to dwell upon, but it marked an era in progress; and although great advances have been made, the work of improvement is still going on.

Within a few years of the period first named, several important institutions sprang into existence in this country, and, as their records will show, took a position far in advance of similar institutions abroad,—a position that, perhaps, they have ever since well maintained. Making all proper allowance for a few unfortunate

exceptions, it yet remains indisputably true that nowhere has this branch of the healing art been less trammeled, less incumbered with empiricism, than in this country; and to this fact much of the success attained is unquestionably due.

With the success that has followed treatment has come the call for hospitals in successive new States, -a call which has been promptly met by the erection of structures, each in some or many of its appointment better adapted than preceding ones for the purpose for which it was designed. Cheap and plain buildings have been pulled down to give place to the most commodious establishments, adorned with pleasing architecture without, and embellished with decorative art within, and whatever can most gratify the eye, please the fancy, tend to divert the wandering mind to healthier channels, or relieve it of some of the burden it bears. These institutions are a part of the glory of the nation, prompted by the highest motives, the dictates of humanity, and a wise political economy. They will be for long years a priceless boon to all classes in society, and especially to the suffering poor. From the history of hospitals and asylums throughout the country it can be shown that Iowa has not gone too far, nor been to too great expense in providing for the most afflicted portion of her population, the mentally diseased.

The mystery in which disorders of the mind were shrouded, having been at length dispelled, much of the enlightened treatment of the present time began to prevail,—I mean, of course, in . well regulated hospitals,—for the term "enlightened" is sadly inapplicable to the treatment which has prevailed in poor houses and private families. The fact once established, that insanity is the result of a diseased brain, or diseased organism acting upon the brain, the way was clear for rational treatment, so that, at the present day, insanity is as intelligently and successfully treated as most other diseases. It is like other bodily diseases in this respect, -that the earlier treatment is adopted, the more successful will be the result. But, unlike other bodily diseases, it requires, for the highest success, removal of the patient from home and its associations, even isolation, in some cases most complete, perhaps for weeks and months. By removal to the hospital the double advantage is gained of conserving the influence of mind over matter by withdrawing the patient from the prolific sources of his disorder, and the substitution of new, pleasing, and healthier mental occupation for the vagaries of mental disorder. Under no other circumstances can the mind so successfully free itself from the tendency to unhealthy action. Here the numerous derangements of the physical functions—invariable accompaniments of insanity—can be most successfully treated, and repugnance to treatment, if it exists, best overcome. Here is afforded the first opportunity, perhaps, after the development of disorder, to exert a strong and healthy moral influence. Here the advantage which experience and intimate knowledge give the hospital director is of incalculable benefit. The patient finds in him, at least, a friend who understands and can farthest enter into his feelings, emotions, and beliefs, disordered though they be. Here, during the first remission of the disorder, can often be laid the foundation of recovery. Here he is removed from those toward whom his distrust and dislike, perhaps hatred, may be greatest. It is probably within the experience of every hospital director, that patients are friendly and confidential with him, while ready to inculge in indiscriminate abuse of their families and friends, who have sought only the best welfare of their unfortunate relatives. The insane may not only manifest aversion and dislike, but they may become dangerous. Indeed, delusion and unreasoning mental action are often, if not always, dangerous. The catalogue of tragedies springing from such causes is extensive, and the experience of the officers of this institution attests the correctness of this view.

The care exercised over those who are suicidal is not the least of the benefits the hospital confers. In some hospitals this is a large class, and one which causes the greatest anxiety, and calls for unceasing vigilance. That suicides will sometimes occur in hospitals and asylums, is shown by universal experience; but the proportion of fatal results to the number of cases treated is very small, while ultimate success in the management of this class of cases is proportionally great.

It is only reasonable to expect that, of the many patients brough: to the hospital, there must be some who cannot be much benefited, and some who will be dissatisfied. This subject might be dwelt upon at length—but I will mention only one, and, as it seems to me, the chief reason of a want of success in any given case; and that is, unreasonable delay at the outset, arising, it may be, from

distrust, or from a want of information—a delay during which the most hopeful period is wasted, and disorder is allowed to become chronic. This is especially true in the mental alienation arising from epilepsy. Of the forty cases now in the hospital, not one came under treatment until three or four years had elapsed from the period of the first attack, and all are probably incurable. As knowledge advances, it is hoped that the danger of such delays will be more clearly seen and understood. Action should be prompt when the first symptoms of mental disorder become apparent; and, with such exceptions and discrimination as have been indicated in previous reports of this hospital, immediate treatment is of the utmost importance, and its necessity cannot be too strongly urged.

As in previous years, the institution has been remembered to a limited extent by its friends, and through them and the press a considerable amount of reading matter has been furnished to patients, wholly, or in part, gratuitously; and in their behalf I would heartily thank the donors and respectfully solicit a continuance of these and similar favors.

W. A. Saunders, Esq., donated \$2, and T. Whiting, Esq., \$5; Francis O. Dow, Esq., Cyclopedia of Anecdotes; Hulda Hoag, a bundle of tracts; Mrs. R. J. Patterson, twenty-eight volumes of books; Dr. J. M. Shaffer, Agricultural Reports; Dr. L. P. Hamline, three volumes "Prairie Farmer," and ten volumes "Country Gentleman"; State Historical Society, "Annals of Iowa," for patients' library.

The following donations from the proprietors were obtained through the agency of A. Morton, Esq., of New York:

Army and Navy Journal, Evangelist, Methodist, Tribune. (weekly,) Harpers' Weekly, Harpers' Monthly, Frank Leslie, Scientific American (\$2 in the price of two copies).

Further donations are:

Congregationalist, Boston; Friends' Review, Philadelphia; Central Christian Advocate, St. Louis; North-Western Church, Chicago; Chicago Daily Republican, Chicago; Home Journal, Mount Pleasant; Burlington Daily Hawk-Eye, Burlington; Washington Press, Washington.

From Dr. Hamlino, we have also received valuable roots, etc.; forty large, fine evergreen trees from Henry Avery, Esq.; a parrot

and cage from A. G. Woodard, Esq.; and from Prof. Gustavus Hinrich, an interesting analysis of water from the artesian well.

To Dr. H. M. Bassett, Mr. George Josselyn, and Mrs. Ann Josselyn, Mr. L. E. Schofield, and Miss Mary P. Barney, I am under obligations for efficiency and valuable assistance in their respective departments. Acknowledgement is also due to the attendants and others employed in the institution, for their general faithfulness to the trusts reposed in them.

Mindful of the responsibilities resting upon me, and trusting in your valuable support, gentlemen, I hope, under favor of Providence, to maintain the high standing the Hospital has reached through the labors of my predecessor.

MARK RANNEY, Superintendent.

Iowa Hospital for the Insane, Mount Pleasant, Nov. 1, 1865.

APPENDIX.

IOWA HOSPITAL FOR THE INSANE, & MOUNT PLEASANT, January 1, 1866.

ADMISSION OF PATIENTS.

The law provides for the admission of two classes of patients, viz.: private patients, and public. The first named class to be supported at private expense, and the second to be supported by the proper county in which the patient has a legal residence.

ADMISSION OF PUBLIC PATIENTS.

Public patients may be admitted into the Hospital by the Superintendent upon the written certificate of the County Judge of the County where such patients reside, with the seal of said County thereto attached, certifying that such patients, [naming them,] upon due examination had before him have been found to be insane, and authorizing said Superintendent to receive and maintain them at the expense of said County. [See Section 1479, Rev. Stat. 1860.]

Any citizen of any County in the State may inform the County Judge that there are insane persons within the County needing care and attention, and when so informed, the County Judge will immediately order an investigation of the case as required by law, and the Superintendent, upon receiving proper application, together with a copy of certificate of insanity and answers to questions in each case, will immediately notify the proper persons when, or whether or not, the patient can be admitted. The Hospital being already filled, chronic cases must not hereafter be sent to it unless first regularly ordered by the Superintendent in each case, as we may here after be obliged to refuse chronic, incurable patients, in order that recent, curable cases may be admitted. Attention to this notice may save the expense of a useless journey to the Hospital, with chronic cases.

All recent cases will always be promptly admitted without previous notice, accompanied by the necessary legal papers.

CLOTHING.

All patients should come to the Hospital provided with a good, substantial supply of clothing, well selected, neatly made, and sufficient in quantity to afford frequent changes. There must be, as required by law, for a male patient, at least three new shirts, a new and substantial coat, vest, two pairs of pantaloons of woolen cloth, three pairs of socks, a black or dark stock or cravat, two pocket handkerchiefs, a good hat or cap, a pair of new shoes or boots, and a pair of slippers. For a female, in addition to the same quantity of under-garments, shoes and stockings, there shall be two woolen petticoats or skirts, three good dresses, a cloak or shawl, and a decent bonnet. Unless such clothing be delivered to the Superintendent in good order, he shall not be bound to receive the patient.

ADMISSION OF PRIVATE PATIENTS.

Private patients may be admitted without any other legal process than the following: Any relative, guardian or friend of the patient may file with the Superintendent a certificate from some respectable physician as to the fact of insanity—a written request from a relative, friend, or guardian, and an obligation, as follows:

PHYSICIAN'S CERTIFICATE.

I have seen and examined to be insane.	and believe

•	

QUESTIONS TO BE ANSWERED, &c.

It shall be the duty of the relatives or friends sending private patients to the Hospital with the assistance of their family physician, and the County Judge sending public patients with such assistance as he may be able to obtain, to annex full and precise answers to as many of the following questions as are applicable to the case, and forward the same to the Superintendent.

- 1st. What is the patient's name and age? Married or single? If children, how many?
 - 2d. Where was the patient born?
 - 3d. Where is his (or her) place of residence !
- 4th. What has been the patient's occupation, and reputed pecuniary circumstances?

The above obligation to be duly certified by the County Judge or Clerk of the District Court of the county where such patient resides, that the signers are good and responsible persons, and able to pay any sum that might be adjudged against them by reason of their signing such obligation, and that their signatures are genuine.

The rate of board for patients from Iowa is \$4.25 per week.

5th. When were the first symptoms of the disease manifested, and in what way?

6th. Is this the first attack? If not, when did others occur, and what was their duration?

7th. Does the disease appear to be increasing, decreasing, or stationary?

8th. Is the disease variable, and are there rational intervals! If so, do they occur at regular periods?

9th. Have any changes occurred in the condition of the mind or body since the attack?

10th. On what subjects, or in what way is derangement now manifested? Is there any permanent hallucination?

11th. Has the patient shown any disposition to injure others? and if so, was it from sudden passion or premeditation?

12th. Has suicide ever been attempted? If so, in what way? Is the propensity now active?

13th. Is there a disposition to filthy habits, destruction of clothing, breaking glass, &c.?

14th. What relatives, including grand parents and cousins, have been insane?

15th. Did the patient manifest any peculiarities of temper, habits, disposition or pursuits, before the accession of the disease—any predominant passion, religious impressions, &c.?

16th. Was the patient ever addicted to intemperance in any form, &c.?

17th. Has the patient been subject to any bodily disease? epilepsy, suppressed eruptions, discharges of sores, or ever had any injury of the head?

18th. Has restraint or confinement been employed? If so, of what kind and how long?

19th. What is supposed to be the cause of the disease?

20th. What treatment has been pursued for the relief of the patient? Mention particulars and the effects.

21st. State any matter supposed to have any bearing on the case. No idiot shall be admitted into the Hospital.

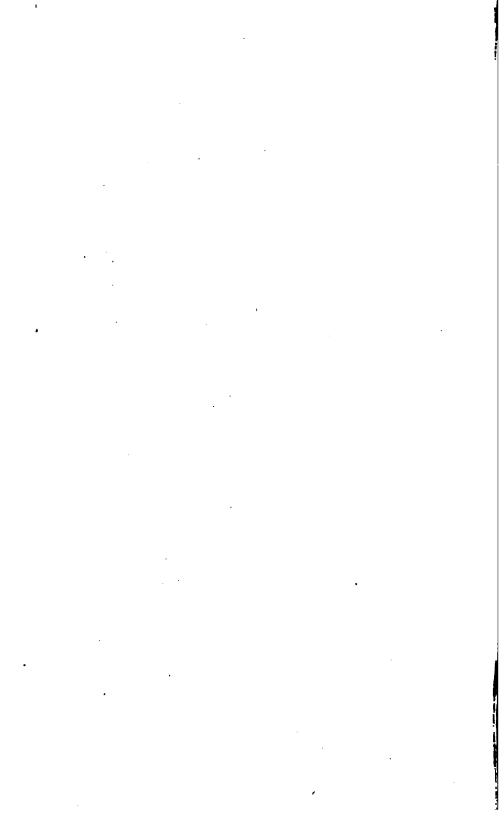

Section 1438, Revised Statutes of 1860, provides that "if at any time it becomes necessary, for want of room or other cause, in the general reception of patients into the Hospital, a selection shall be made as follows:

- 1. Recent cases, i. e., cases of less than one year's duration, shall have the preference over all others.
- 2. Chronic cases, i. e., where the disease is more than one year's duration, presenting the most favorable prospects for recovery, shall next be preferred.
- 3. Those for whom application has been longest on file, other things being equal, shall next be preferred."

SEC. 1439. "Each county shall be entitled to send patients to the Hospital in the proportion of insane persons in the county, and in case that all the insane who may apply for admission, cannot for some cause be accommodated, then in the selection of patients, the provisions of this section shall be regarded, selecting such as may be admitted subject to the provisions of section 30 of this act."

In accordance with the above provisions, room will always be promptly made for the admission of all recent cases.

All communications should be directed to Mark Ranney, Superintendent, Mt. Pleasant, Iowa.

REPORT OF THE TRUSTEES.

INSTITUTION FOR THE DEAF AND DUMB, I LOWA CITY, December 8, 1865.

To His Excellency, William M. Stone, Governor of Iowa:

The Board of Trustees of the Iowa Institution for the Education of the Deaf and Dumb, have the pleasure to report that this Institution, under their charge, is now relieved from all financial embarrassment.

The first of October, 1863, when it came under the supervision of its present management, it was involved in debt to the amount of about fourteen hundred dollars. Its furniture was correctly reported, by a committee of the Legislature, such as is usually found in a common alms-house. It was bare of supplies of all kinds, and all articles of consumption had recently advanced 50 to 150 per cent.

The Legislature promptly increased the general appropriation for the payment of salaries, rents, &c., from \$3,000 to \$4,000 per annum, and the per capita upon each pupil for current expenses, trom \$25 to \$30 per quarter.

From that time to the commencement of the present fiscal year, the 6th of November last, all outstanding claims have been paid, the Institution has been thoroughly refurnished with whatever was deemed necessary for the comfort and health of the pupils, all expenses have been met, and at the date last named there remained on hand the sum of three thousand one hundred and twenty-five dollars and twenty-four cents (\$3,125.24). This amount, however, was subject to the current expenses of the balance of the quarter ending January 1, and to the salaries of the entire quarter, which, when deducted, would leave the actual surplus about \$1,000.

We do not deem it probable that the next two years will be more expensive for the Institution than the last two have been; and, as

all debts are now paid, and the Institution well supplied, we are of the opinion that the per capita appropriation may be safely reduced to the former rate of \$25 per quarter. The additional \$1,000 to the general appropriation, made at the last session, will still be required; as salaries cannot be reduced, and our rents, since the expiration of our former leases, have been doubled, although they are now low, for the amount of room required.

The buildings now occupied are as well adapted to the uses of the Institution as can be expected of those not erected for the purpose; but we would urge the fact that new buildings, complete in all their parts, and adapted expressly to the wants of the Institution, must be had, before it can realize the best results to the unfortunate class for which it exists.

Little can now be done in the way of mechanical employment of the boys, for want of the necessary accommodations, which would be provided in a new set of buildings.

The Institution is now doing all that can be expected of it under the circumstances. The Principal and all his assistants are faithful and untiring in their efforts, and labor to conduct it efficiently and economically; in which latter respect they have certainly succeeded. The report of the Principal will give in detail the operations for the last two years.

The Trustees and the Institution have recently met with a great loss in the death of J. P. Wood, a member of the Board, who has labored for many years for the success of this enterprise. His term of service would have expired in one year, which unexpired term should be filled. The term of G. H. Jerome, as Trustee, is also about to expire, and should be provided for.

We commend again to the watchful care of your Excellency and the Legislature, this unfortunate class, to whom is denied the usual direct intercourse with their fellow-men; and we do so with great pleasure in the fact that the finances of the Institution are now in a condition entirely satisfactory.

In behalf of the Trustees.

N. H. BRAINARD, President.

BENJ. TALBOT, Secretary.

REPORT OF THE PRINCIPAL

To His Excellency, William M. Stone, Governor of Iowa:

The period has again arrived at which the reports of Public Institutions must be presented to the Governor and Legislature of the State; and, in accordance with the law, the Sixth Biennial Report of the Iowa Institution for the deaf and dumb is now respectfully submitted.

Through the kind care of an ever watchful Providence, blessing the bounty of the State, the Institution has been permitted to continue, without interruption, its work of mercy towards the unfortunate class for whom it was established; lifting them, in some measure, out of the mental and spiritual darkness in which they were wrapped, and raising them nearer to an equality with their more favored fellows in the community. The rude shock of war, though it has affected, has not disturbed the operations of the Institution; and, now that peace has again spread her mantle over the land, its friends may hope that this, as well as the other benevolent enterprises of the State, may be permitted to attain an unwonted vigor and prosperity.

To this end the careful attention of the State authorities is respectfully solicited to the present condition of the Institution, and to its claims upon them; and the hope is cherished that such action will result as shall be for the honor of the State, and the good of all concerned.

The finances of the Institution, as will be seen from the preceding report of the Trustees, are in an excellent condition; and a complete classified statement is appended to this report, showing the disbursements from our funds since the date of last report. This statement does not, however, give an exact showing of the expenses of the two fiscal years just closed; as there is included in it all payments on account of arrearages, as well as the actual current expenses of the Institution.

The health of the household has been disturbed by only one serious irruption of disease, in the spring of 1865, when about one fourth of the pupils were prostrated by measles, in an aggravated and complicated form, leaving many of the patients in a low condition from which they recovered slowly. Yet, notwithstanding the general good health of the family, four deaths have occurred among the pupils since the date of the last report, three by disease and one by accident, viz.:

Burnetta Huston, of diptheria, Dec. 28, 1863; age 11 years.

William Powers, drowned, May 30, 1864; age 13 years.

Mary Kosmeyer, of pneumonia following the measles, April 2, 1865; age 17 years.

Harriet Wheeler, of cerebro-spinal meningitis, April 21, 1865; age 18.

It is a source of comfort to the officers of the Institution, and to the friends of the deceased, that they are able to believe that no care or pains were spared to avert these afflictive strokes, and that all the departed had gained an intelligent, and it may be hoped, also a saving knowledge of the way of life.

The officers of the institution are mainly the same as two years ago; the only changes being the appointment of Mrs. Mary M. Askew, of Louisa county, to the position of Assistant Matron, in place of Mrs. C. E. Stone, resigned; and the addition to the corps of teachers of Mr. Conrad S. Zorbaugh, a deaf and dumb gentleman from Ohio, whose natural and acquired facilities for the work of deaf mute instruction make him a valuable accession to our teaching force. Mr. Zorbaugh entered on his duties in January last, and Mrs. Askew in September.

The whole number of pupils in attendance the past two years is ninety-six, of whom sixty-eight, representing 32 counties, were present last year, and sixty-nine, from 32 different counties, have entered during the present term. Ten of these become connected with the school for the first time in the fall of 1864, and eighteen the present session, showing a constant addition of uneducated deaf-mutes to our numbers, and proving that the Institution is still far from having accomplished its work. The number actually present, at the date of this report, is sixty-five, forty-one males, and twenty-four females.

The pupils have been taught, since January last, in five classes;

the smallest number possible, with a due regard to the proper classification and advancement of the scholars. A single teacher can generally manage successfully a class of eighteen or twenty pupils, if they are uniform in capacity and attainment; while even a dozen is too many for one teacher, if they are very unequal in these respects. A true economy of teaching force is to be found, not in reducing the number of instructors, but in increasing the number of pupils, so as to give more to each teacher, and still have them properly classified. These views led the Trustees, on the recommendation of the Principal, to add one to the number of teachers, as soon as the finances of the Institution would allow; which was done during the last year, as has been stated above, and the benefit to the school has proved that they made no mistake in so doing. In fact the same process might be extended still further, with decided advantage to the pupils, if we were not restrained by prudential considerations.

Most of the pupils, it is believed, are doing well, and seconding by suitable personal exertions the efforts of their teachers to repair the misfortune imposed on them by their infirmity.

The main object in a school of this kind, is to teach the pupil the correct use of written language—an arduous undertaking when we consider what and who are to be taught. Our language is, confessedly, by reason of its many anomalies, one of the most difficult to learn; as is fully proved by the obstacles encountered by foreigners in attaining a fair use of it. A foreigner, too, has the advantage over our pupils of the free use of one written and spoken language when he commences the study of English. An ignorant deaf mute has some *ideas*, but no words. He knows persons and things by sight, but not by name. Of the use of words he has no idea. A printed page, even in the simplest language, is as unintelligible to him as the most abstruse set of hieroglyphics ever devised.

And even after he has gained some insight into the use of words, and the value and import of language, his progress can be but slow. A hearing child, in the constant use of ear and tongue, learns unconsciously, or at least without effort, many words which a deaf mute can gain only by the laborious process of writing and re-writing many times, even then failing often to catch the precise shade of meaning intended. So too, in reading or studying, a fa-

miliar word used in a new sense becomes a new word, and is to be learned over again by the same tedious method.

It is generally considered very creditable progress, if a pupil in the course of the time usually allowed him in our State institutions, acquires a fair use of the words most commonly found in newspapers and books; and many fail even of this.

The efforts of our instructors are therefore mainly expended in this direction—teaching the correct use of language in such forms as will be most serviceable in common every day life; that the lack of hearing and the want of speech may so far as possible be made up, and the deaf mute may be enabled to communicate by means of pen or pencil what he can never utter with his lips.

But we aim to add to this great work as much of useful knowledge as can be imparted during the short stay of our pupils. They are therefore instructed, according to their ability, in all the ordinary branches of a good English education; and become quite familiar with the rules and operations of Arithmetic as well as with the facts of Geography, History, Natural Philosophy, Grammar, and Natural History. Higher than this we cannot go, in the present condition of the Institution. Were it manned with a sufficient number of well qualified instructors we could undertake to do what is done in Eastern institutions, and Iowa children would not need as now to go to a distance to get a complete education. But as we are now situated, such an undertaking is neither advisable nor expedient.

A valuable adjunct to our means of instruction has been afforded during the past year, by the gratuitous contributions of newspapers from publishers in different parts of the State, in response to the request of the Principal. They have proved very acceptable to the pupils, especially when the paper has come from the vicinity of their homes, and have been profitable to them in exciting an interest in the news of the day, as also in arousing a keener desire to improve in their studies, that they may be able to read more intelligently. A list of the papers now received will be found in its proper place; but the kindness of the publishers merits this notice in the body of the report and an expression of hearty thanks for the aid they are affording the school.

The moral and religious training of the pupils is provided for by daily chapel services, lectures on the Sabbath, and appropriate lessons to be committed to memory on that day, either from a book prepared expressly for the deaf and dumb, or from the Scripture itself.

No instruction is now given in trades, as it has seemed to the Trustees unadvisable to make any efforts in this direction. We have little space available for shop room, and no pecuniary provision has been made for employing suitable teachers. We are aware that a complete education of the deaf and dumb requires their instruction in some mechanical trade. The pupils now perform all the manual labor that is needed about the premises; yet a further portion of every day might profitably be spent in learning some useful trade, without any detriment to their intellectual progress, and we hope that the time is not far distant when instruction can be given in this department.

The school suffers to a considerable extent, but individual members of it vastly more, from the negligence and apparent indifference of the friends of the pupils, a portion of whom are very deficient in that cardinal virtue, punctuality.

The Trustees, in accordance with the practice of other institutions, have fixed the term of seven years as the period for which pupils shall enjoy the privileges of the institution; but many parents, by long delay in bringing their children to school at the opening of the term, and by taking them home before its close, cheat them out of no small portion of the time allotted to their education. Some of our pupils lose, in this way, two months or more of every school year.

In the scarcity of labor during the past four years of war, the pressure has been very great to draw away from the school all whose services could be valuable on the farm, and it has been impossible, in all cases, to resist this pressure; but it is greatly to be hoped that such cases in the future will be very rare and exceptional, and that all our pupils will be permitted to derive all the benefit they can from their connection with the institution.

A similar difficulty to the one just mentioned is experienced in many cases, arising from the persistent refusal or the criminal neglect of parents to send their children to school till they are so far advanced in years that it becomes almost a hopeless effort to undertake to instruct them.

The age of 12 or 13 is probably the best in most cases at which

as 10; but many of our pupils are sent to us for the first time at the age of 18 or 20, (and even older than that,) when their mental faculties are blunted by disuse, or the rust of age, and the intellect has become comparatively incapable of development. Such tardy pupils make little progress, are speedily outstripped by the more tlexible intellects of their younger school-mates, become discouraged, and drop out of school before they have completed the allotted time, and so never gain that education which the bounty of the State offers them, through this institution.

It is a shame that the penuriousness, or the negligence, or the mistaken kindness of their friends, should do them so great a wrong. It almost seems as if county or township authorities should have power to interfere and take the children from their parents, if they cannot otherwise be brought to the institution betimes.

In other instances, strange as it may appear, this failure to send children to the school at the proper age, arises from ignorance on the part of the parents as to the location, and even as to the existence, of the institution. Though the school is now in its twelfth year, and has, from the opening, been kept in Iowa City, yet within the past nine months several families have been found, not more than thirty miles from the place, with deaf children born in Iowa, and now old enough to be in school, who never till now have become acquainted with the fact that the State has such an institution in successful operation.

It is very desirable that the officers of the institution should in some way be enabled to find all the deaf and dumb of the State, of suitable age for instruction, that their friends may be duly notified as to its rules, and the proper time for sending them. The persons appointed to take the census might be instructed to procure not only the name, but also the post-office address of those families in which deaf and dumb children are found. Ministers, teachers and intelligent citizens generally, might render similar service by sending information of such facts to the Principal. In this way a more perfect communication could be established between the institution and those who ought to share in its privileges.

Our Institution, in order successfully to perform its work, should be able to draw to its aid and to retain in its service a good corps of well trained teachers. And these teachers should be permanently attached to the Institution to secure its highest efficiency.

A part of our teachers, as now, may and should be well educated deaf-mutes. There is no reason to complain of those now connected with the Institution, and no present occasion for anticipating the removal of any of them; but if by the offer of higher salaries elsewhere, they should be drawn away from us, it might be difficult to supply their places. It should be in the power of the Institution, as it is certainly its policy, to protect itself against any such depletion of its teaching force.

But the instructors should not all be deaf-mutes. Well informed and liberally educated speaking persons should also be found among the teachers. In all the Eastern Institutions, a large part of the teachers, sometimes even a majority, are gentlemen who have received a training and education which would fit them for any profession, and some of them would adorn any position to which they might aspire. If our Institution is to stand on a level with others, (and it should, for the deaf-mutes of Iowa have a right to expect as thorough and complete instruction here as they could obtain elsewhere), we ought to have just as competent instructors as there are to be found.

The last Legislature made a move in the right direction, in providing for an increase of the compensation of our teachers, but nothing was added to that of the other officers. All the salaries are still below the proper point, and must be raised before those in charge of the Institution receive a fair return for their self-denying and laborious service. Much more is it the duty of the Legislature to afford us the means of securing in the future such teachers as shall be an ornament to the school, and an honor to the State, by making this Institution equal to any other of its kind.

This report would not be complete without calling the attention of the State authorities to the immediate and growing need of a building adapted to the wants of the Institution.

The buildings we occupy were erected partly for business purposes, and partly for use as a hotel. Though they are large enough to accommodate the number we now have, the school cannot be materially enlarged with our present capacity. Yet an increase may reasonably and almost certainly be expected.

The returns of the State census for 1865, show a gross deaf and dumb population of 376, (a gain of 46 in two years,) of whom one-

fourth at least should be in school; which tallies very nearly with the facts in possession of the Principal, whose records show the names of 98 known residents of the State who are entitled to places here.

The institution should be provided at once with buildings that would accommodate one hundred pupils, and that could be enlarged with the growing wants of the school. While there is no reason to suppose that Iowa either does or will contain more than the usual proportion of deaf mutes, (a little more than one to every two thousand,) we must expect and prepare betimes for that increase in numbers which is sure to come with the rapidly advancing population of the State.

Not only the prospective increase of the school, but the comfort and convenience of those now here, demands an immediate supply of this great want. The arrangements in the domestic department are quite imperfect, and cannot be remedied where we now are. The proper separation of the sexes cannot be carried out as it ought to be. We have little shop-room, no play-ground, no garden, no farm; the shop is in the cellar, the children have to play in the street, and all our vegetables and supplies must be purchased, while we should be able to raise at least a part of what we consume.

Every motive of humanity and of justice urges to speedy action in our behalf. It is deeply to be regretted that the preliminary steps could not have been already taken, and estimates prepared, so that the Legislature could act promptly and with understanding in the matter.

We can only hope that the claims of the institution will be duly considered, and that the present and prospective prosperity of the State will warrant the immediate commencement of the work we so much need.

In this hope, with thankful recognition of what has been done in the past, the institution is once more commended to the attention and care of the Governor and Legislature of the State.

BENJAMIN TALBOT, Principal.

Iowa Institution for the Deaf and Dume, \ Iowa City, December 8, 1865.

ACKNOWLEDGMENTS.

NOTICE TO APPLICANTS.

The Iowa Institution for the Deaf and Dumb, is open to all proper subjects between the ages of ten and twenty-five. Applicants must be free from immorality, and from contagious and offensive diseases. They must also be of sound mind.

Such persons are entitled to receive their board and instruction. at the expense of the Institution, for a period of seven years. Pupils from other States are charged \$140 per annum, payable quarterly in advance.

The annual sessions of the school commence on the third Wednesday of September, and close on the third Wednesday of June.

The friends of applicants will be expected to supply them with sufficient and suitable clothing, so long as they are connected with the school. Every article should be marked with the name of the owner, in indelible ink.

Applications should be addressed to Benj. Talbot, Instructor for the Deaf and Dumb, Iowa City, Iowa, and should state the following particulars:

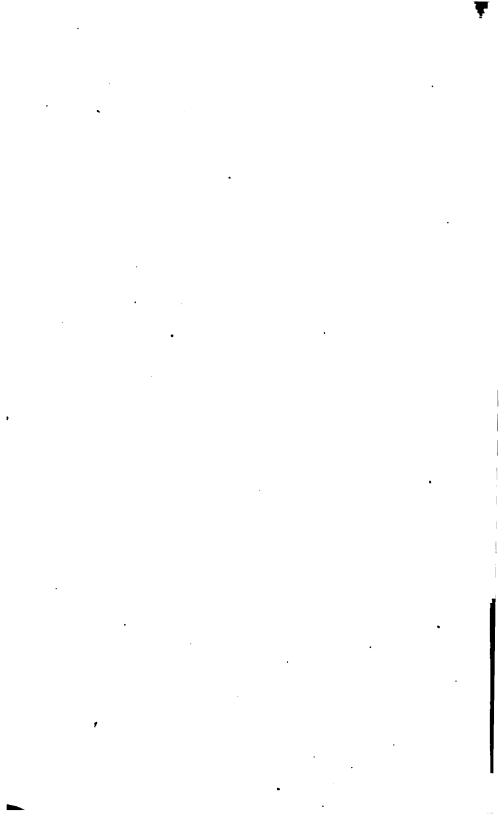

- 1. The full name of the applicant.
- 2. The year, month and day of birth.
- 3. The place where he was born.

- 4. The cause of the deafness; if not born deaf, when and how did become deaf.
 - 5. Is the child bright and active, or dull and stupid?
 - 6. Are there any deaf and dumb relatives?
 - 7. The names and address of the parents or guardian.

BIENNIAL REPORT

0ľ

THE WARDEN

OF THE

IOWA PENITENTIARY,

TO THE

GOVERNOR

AND

ELEVENTH GENERAL ASSEMBLY.

DES MOINES: F. W. PALMER, STATE PRINTER. 1866.

. • • .

WARDEN'S REPORT.

WARDEN'S OFFICE, [OWA STATE PENITENTIARY, Oct. 1, 1865.]

To His Excellency, Governor Wm. M. Stone, and the Honorable the Senate and House of Representatives:

Herewith I have the honor to lay before you my Biennial Report of the doings and wants at this Institution. The past two years have been fraught with extravagantly high prices, consequently our expense general account foots up larger than formerly. We have had to pay double, treble, and even more than five-fold for many of our supplies, which, though every economy has been used possible, figure up largely. The articles of clothing and bedding have been enormous; and yet we have been forced to use a greater amount of clothing in consequence of working the men more than usual on labor that naturally made the wear and tear greater—such as excavating, erecting stone wall, &c.,—but all this has been unavoidable.

The sanitary condition of the Prison is and has been remarkably good, as will be seen by the Physician's Report. We have had but one death.

As we have been working a large number of the men in building yard wall, Warden's house, excavating hill, and various other work outside of the Prison walls, we think it speaks well for the discipline that we have had no escapes. It is even better than we had dared to hope for, under the circumstances.

The rubble stone of the yard wall is all up, but it lacks some twenty-six perch of cut-stone coping to complete the top; and most of the new and all of the old wall needs pointing up with good mortar, to make it as it should be. At this stage the appropriation ran out, and the work had to stop. Had materials and labor not greatly advanced after the appropriation was made, we should

have had enough to have completed the work. As it now is, it will require about \$1,000 to finish up with, and it should be done as soon as possible.

We greatly need stone gatters put in on the west, north and east sides of the yard, for draining purposes—one being already in on the south. This will cost about \$1,000, and I recommend the appropriation.

The Warden's house is pretty nearly completed. It is a neat substantial and convenient edifice, one that we may not be ashamed of in our State pride. It contains fourteen rooms, great and small. besides the cellars. Its cost will somewhat exceed my expectations, owing to the great advance in all kinds of material and labor after the plans were matured and the work commenced; yet we will get it through with the amount appropriated and the help of our Prison labor. In connection with the Warden's house, we have built a good Clerk's office, and a substantial vault, in which to keep the safe, books, papers, etc., pertaining to the Prison. It is a thing that has been greatly needed ever since the institution was established. The house needs a furnace for heating, gas fixtures for lighting, and water-pipes for bathing and washing facilities—all of which will cost somewhere in the neighborhood of \$1,800.

The building in the yard, to comprise convict kitcher, dining Hall, Chapel and Hospital, is being pushed forward as fast as possible, and we expect to occupy it this winter. It is a subatantial edifice, 40 by 104 feet, two stories high, the first to be Kitchen and Dining, second Chapel and Hospital, all to be conveniently fitted up with tables, seats, desks, &c. In the Hospital room will be four substantial iron cells, in which invalid convicts may be left over night with safety, instead of having to carry them to the cell room. We will get the building completed within the appropriation, by tight squeezing, and do well at that.

We are now cutting the stone for and preparing to build the 14 cells, necessary to complete the third tier, and hope to have them done this fall. Materials have been, and are yet, enormously high, and very hard to get, particularly dimension stone so that we have been greatly delayed in the prosecution of our work on that account. We now have 148 cells fit for occupancy, and the 14 we are about to build will give us 162, which probably will be suffi-

cient to do us for the next two years, but it is a little doubtful. In the Spring of 1860, I had at one time 136 convicts; but as the rebellion progressed our numbers diminished. We shall not be surprised to see the numbers run up higher in the next two years than they have ever been; and it would be well to guard against such contingency.

The present way of warming the cell room is very poor, and entirely insufficient to render it comfortable in very severe weather. There is but one small flue on either side to accommodate the draft of two large stoves; consequently the men not only suffer from cold, at times, but are greatly annoyed by smoke; and the creosote that accumulates and runs down from the flues, is a great nuisance. I do not know what would be the cost of a suitable apparatus for properly warming the halls and cells, but doubtless there would be a great saving of fuel after the fixtures were once in, besides being much safer; I therefore recommend its careful consideration.

Since writing the above, have got a little more information about it. It will cost about \$1,500 for heater and pipes for warming the cell room, and \$1,000 for Warden's house.

The cell room should also be lighted with some kind of gas, so that every man could see to read and improve his mind-which is the only true way to effect any lasting reformation in criminals. In winter, the men are in their cells from twelve to fourteen hours out of the twenty-four, and unless they can see to read and store their minds with useful knowledge, they will either hatch mischief or brood over their misfortunes, to the great injury of both mind and body. We now have to keep the halls partially lighted by common lamps; but a poor make-shift, at the best, and affording no light to most of the cells, so that a man can see to read in them. We, some part of the time, in winter, give the men a small lamp in their cells, but the cost is considerable to keep it up, to say nothing of the filth that naturally accumulates therefrom; and we have not done so as much as we should, had subsistence been cheaper. The cost of gas fixtures necessary to subserve our purposes, will be about \$1,600 for cell room, and \$1,000 for Warden's house. there should be a decline in iron and labor, as I anticipate, it will be less.

Our present culinary department is very poorly arranged, and

should, by all means, be supplied with a good range, and other fixtures, the cost of which will be about \$1,000.

Our wash-house is miserably arranged. We require the men to bathe weekly, and the facilities for doing so are two long boxes, supplied with water carried from a cistern, by hand. Five hundred dollars would make it much better, and I ask that amount appropriated for wash-house fixtures.

We now have only eighty-seven convicts in the prison, two of whom are females—one an old woman of sixty-five years, for life; the other a girl seventeen years of age, for one year. We also have men here with their tocks "whitened by the frosts of many winters," and small boys but thirteen, fourteen, and fifteen years old. The gray-haired sinner and the tender youth, all under the same discipline. The State ought, by all means, provide a suitable house of correction, for the reception of these juvenile offenders, where they would not come in contact with old criminals, but receive a different schooling from what we can give them here. I feel that I cannot too strongly present the importance of this subject to your minds.

We often get men here for very short terms, ranging from one month to one year. In my opinion a man never ought to be sentenced to the State Penitentiary for a less term than twelve months at least, and two years were still better. There should be a County Chain Gang, or some other place, to send men for petit larceny, vagrancy, &c., where they could be labored to advantage, and any sentence less than one year, should be there. Short sentences to the Penitentiary are just as degrading as long ones, and only seem to have a tendency to encourage new beginners to try again; while a good long time often cooks their bacon for the future. Limit sentences to a good length and pardon freely for meritorious conduct is my plan.

Our "Diminution Act" is a humane law, and works well. It is a very great incentive to all convicts who have any of the better feelings of mankind left in them, to live up to the rules, in order to save time, and, above all, gain a restoration. A majority of them do it, too. I would recommend its adoption in all States where it does not already exist.

Our Prison Library is not what it should be, but we have a small ibrary fund accumulated, which we design expending soon to re-

plenish it; when I hope to add a considerable number of interesting and useful volumes to the present stock, which I know will be hailed with joy by most of the convicts. A large per cent. of them are fond of reading, and should be afforded every opportunity of storing the mind with something useful, that they may be permanently benefited by being here. And many of them are vastly better in habits and mental culture when they leave; but they need encouragement, and nothing will do it better than education.

There are about eight or ten acres of vacant lands between the prison grounds and the river, which should by all means be added to the State possessions. These grounds belong to non-residents, and I think can be bought reasonable. It is much used and greatly needed in carrying on business here, and would add vastly to the appearance of things, if it was properly enclosed.

The prison yard or enclosure is but 350 feet square, including the space occupied by the shops and other necessary buildings—which are sufficient to labor at least 150 men in—the new buildings for kitchen, dining room, &c., besides several other small buildings. The yard is too small to subserve the purposes for which it is designed; but it may be advantageously enlarged by moving the present wall on to the western line of the prison grounds, which would give us nearly as much more room as we now have enclosed. The cost of doing the work, with the aid of convict labor, would not probably exceed \$7,000 or \$8,000. I think it should be done, and recommend the appropriation.

Our privy sewer empties into a small creek, but a short distance below the south-east corner of the prison yard, and some 950 feet from low-water mark, on the Mississippi river, into which it was designed to run the sewer; but want of funds stopped its farther extention in 1858; since which time it has been considered a grievous nuisance by those owning property in the vicinity, and I have often been threatened with an injunction. If such a thing should happen I know not what disposition could be made of the constantly accumulating filth of the prison. Messrs. P. Miller & Sons, through whose property the creek runs, into which the sewer empties, will give to the State the privilege of extending the sewer to the river; and I think that justice, as well as decency, demands that the work be speedily completed, or the whole thing abandoned, and some other plan devised to carry off the filth.

As for myself I know of no other feasible way of doing it. I therefore recommend an appropriation of \$8,000 for that purpose.

The cell room roof is getting pretty well dilapidated, and needs replacing with a suitable slate covering to make it somewhat fire proof. It has always been in contemplation to so raise the present walls, as to admit of two tiers of cells more being added to the top of those now in the building; but this, I think, will be attended with greater expense to get the same number of cells, than to extend the building on the east, as the south wall of the yard would form the north wall of the addition, and the cut stone in the east end of the present building could be used in the addition, so that really there would only be the stone to get for the south wall of the extension. I am fully satisfied this is the best and most economical way of getting more cells. Besides, it will be much more convenient. Therefore, I shall only recommend that the new roof be put on the present building, and ask an appropriation of \$4,000 for that purpose.

The west end of the cell-room building, now occupied as a Warden's residence, should be built up with cells, and other conveniences for the accomodation of female convicts. As it now is, we have to domicile them in the same room with the men, which is very detrimental to our discipline. There is room for about 86 cells, the size of those now in use—3½ by 7 feet, with a 7 foot ceiling—too small for comfort, surely. It will probably cost \$10,000 to do the work, and I recommend that amount be appropriated for the same.

As our Prison yard is only supplied with water by cisterns and wells, and no fire apparatus of any kind in it, I feel that I cannot too strongly urge upon your honorable body the immediate necessity of an appropriation to supply the yard with plenty of water from the river, so that the building and State property may be secure against loss by fire at all times. The best, and perhaps most feasible way to do this is to force the water into a large cistern or reservoir, to be built on the hill, on the north side of the yard, from which water may be conducted into all the shops and buildings pertaining to the prison. So arranged, the night guard could, in case of fire, flood any room or roof on the whole premises, without waiting for any other assistance; and thus, probably, save thousands of dollars' damage to the State. As insurance companies re-

fuse to issue policies on Penitentiary buildings and property, it behooves us to take every necessary precaution to become secure against fire, as far as possible. Conflagrations in prison yards are very common casualties, and we have had a pretty fair sample of it here; and, without some reliable fixtures to fight it off, may have again. It will cost, these times, something like \$10,000 to do what we want. But when once properly done it will be a permanent fixture, and make us comparatively secure from loss by fire for all time to come, and perhaps save the destruction of \$20,000, \$50,000 or \$100,000 worth of buildings and State property. It is true a common old fogy fire apparatus, for being worked by hand, may be had for a much less figure. But then we might all burn out before we could get men and water enough together to make it available. And then they are a poor make-shift at best, while the other is always cocked and ready for action.

As Messrs. Winterbotham & Jones' contract for the convict labor expired in June, 1864, a considerable time before a new letting was consummated, we had to make the best use and disposition of the labor we could until Mr. Thomas Hale, the present Lessee of the prison labor, commenced working them, which was in January. 1865. During the interval we managed to keep the men profitably employed on the work of improving the premises, excavating, building Warden's house, yard wall, &c.

Thomas Hale, to whom the Commissioners appointed for that purpose by the last General Assembly, awarded the convict labor for the next ensuing ten years, associated with himself in the business Capt. B. W. Davis and Lient. I. Russell, Winterbotham, under the style of Hale, Davis & Co. The new Lessees are now laboring all the men we can spare them from the State work and those set aside for doing chores. I think the new firm are progressing well, and am happy to say they seem to have a due regard to the interests of the State, as well as their own. A true copy of the new contract will be found appended.

With the assistance of C. C. Nourse, Esq., the then Attorney General, we made a final settlement with Messrs. Winterbotham & Jones, in 1864, and wound up everything in as equitable and satisfactory a manner as possible, under the difficult circumstances that surrounded us. The Clerk's report, below, will give the figures.

For general support, with present prices in prospective, we shall

require \$22,000 to last us through the next two years, aside from what we may realize from the convict labor. I therefore ask that that amount be appropriated for the purpose. Should prices recede, we will not need to draw the full amount, as I make it a rule to draw only as bills are made payable.

The way that salaries now stand, we shall need the following appropriations for salaries of officers for the ensuing two years, viz.:

Warden,	\$2,000	00
Deputy Warden,	1,500	00
Clerk,	1,500	00
Chaplain,	1,000	00
Physician,	730	00
2 Night Guards, \$45 per month,	2,160	00
9 Day Guards, \$40 per month,	8,760	00
1 Hospital Steward, \$40 per month,	960	00
1 Turn key, \$40 per month,	960	00
- · · · · ·		

Total,.....\$19,570 00

Should our numbers increase much, we shall be forced to have one or two more guards. And also if we continue our improvements with convict labor, it may be necessary to employ one or more extra guards in consequence. I therefore recommend that a contingent appropriation of \$2,880 be made to cover such emergency. As all are required to subsist themselves, the salaries are altogether inadequate to the amount of labor to be performed. And I have found it very difficult to keep good, reliable men as guards at these rates. Their duties are extremely onerous, through the entire week, Sundays not excepted. Other States, in institutions of this kind, subsist their officers and guards, and require them to sleep nights at the prison or within call, which is as it should be. We know not what emergency may arise during any night to require the presence of all hands aloft, and they should always be accessi-I therefore suggest that subsistence be added to their salaries, as a matter of justice.

All business we have had with other State officers has been of the most harmonious and satisfactory character; and I feel under obligations for courtesies extended.

To my Deputy, Clerk, Physicians, Chaplain, and all other officers connected with the prison, I feel to return my thanks for

the many obligations they have placed me under to them, for the faithfulness with which they have uniformly discharged their several arduous duties.

Just as I had finished my report, I learn that the Messrs. Miller have purchased the above grounds. They will probably sell a portion to the State.

I have just received our Physician's report, in which he recommends that the Hospital Steward shall be appointed by the Prison Physician. This would be well enough, provided the Steward was not required to do guard duty. As it is, I am satisfied that all under officers should receive their appointments from the one great head, in order to save any jars or discord.

E. A. LAYTON, Warden.

RECAPITULATION.

For general support, for two years from Jan. 1, 1866 \$22.000
For officers, for two years from Jan. 1, 1866 6.730
For guards, for two years from Jan. 1, 1866 12.840
For extra guards, for two years from Jan. 1, 1866 2.880
For fixtures for safety against fire 10.000
For converting west wing into cells 10.000
For extending sewer to Mississippi river 8.000
For enlarging yards 8.000
For repairing cell room 6.600
For Warden's house, heating and gas fixtures 2.000
For convict kitchen 1.000
For gutters 1.000
For wall 1.000
For wash house fixtures
Total 909 550

ARTICLES OF AGREEMENT.

Articles of agreement entered into this 21st day of November, A. D. 1864, between Edward A. Layton, Warden of the Iowa State Penitentiary, Edward Johnstone and Joel C. Walker, Commissioners for and in behalf of the State of Iowa, of the first part, and Thomas Hale of the second part.

WHEREAS, Certain sealed proposals have heretofore been made

by the party of the second part for the convict labor hereinafter mentioned, which proposals have been accepted by the party of the first part, for and in the name of the State of Iowa: Now therefore it is agreed—

First—That the party of the first part doth hereby let and hire to the party of the second part for the term of ten years from the first day of January, A. D. 1865, the labor and service of not to exceed one hundred and fifty convicts now or hereafter to be contined in the Iowa State Penitentiary, (if so many there may be under the specifications hereinafter contained,) to be employed by said party of the second part, at the following trades and occupations, to-wit: Coopering and manufacturing Agricultural Implements. Nothing in this agreement shall prevent the Warden from employing a limited number of convicts in shoemaking and tailoring for the use of the convicts.

Second—It is agreed by the party of the first part that for the use of said labor during the term of this lease the party of the second part shall use the following shops now situated in said prison yard, to-wit: all the shops, dry houses and boiler house. And it is further agreed and understood that for said labor, the party of the second part shall pay at the rate of forty and one-third $(40\frac{1}{8})$ cents per day for each convict.

Third—And for the raw material necessary to carry on said trades and work, the party of the second part shall during the continuance of this lease, have the right to use and occupy of the prison yard the following part thereof: all the prison yard north of the south wall of shop No. six (6).

Fourth—The party of the first part further agrees that said Thomas Hale shall have the privilege of going to and from said shops at all proper times to instruct said convicts in said trades, and to carry in and out materials and manufactured articles, or they may employ to do the same, such person or persons as the Warden of the Penitentiary may approve—said contractors and employes being, whilst within the walls of said prison yard, subject to all the rules and regulations now or hereafter established by the proper State authorities.

Fifth—The convicts so to be employed shall be able-bodied men: by which term is meant, those who are capable of performing a reasonable day's work; and in case of any disagreement between

the party of the second part and the Warden of the Penitentiary, in regard to the physical ability of any convict, the same shall be conclusively determined by the Physician of the Penitentiary.

Sixth—The convicts shall be guarded and kept in good discipline at the expense of the State, but the State of Iowa shall in no case be liable to the party of the second part for any loss by fire or other casualties.

Seventh—It is further agreed that said shops shall be warmed at the expense of the party of the second part, and the security of the fixtures for said heating shall be subject to the approval of the Warden of the Penitentiary.

Eighth—In estimating the per diem as aforesaid to be paid for each convict, the usual time for estimating a day's work, to-wit: ten hours average through the year, shall be computed.

Ninth—It is further agreed that if at any time the number of prisoners in the Penitentiary should not be sufficient to supply the full number specified in this and other prison contracts now or hereafter let by authority of the State, and also sufficient for cooking, cleaning and other necessary matters, which, in the judgment of the Warden, it may be for the interest of the State to employ them, the number of able-bodied convicts not so employed by the Warden shall be apportioned according to the number contracted to each contractor, reference also being had to the skill and value of convicts in the several trades carried on by the different contractors.

Tenth—If at any time the convicts assigned to the party of the second part within the number hereinbefore specified shall remain idle for want of any material or tools, or for any fault of the party of the second part, the party of the second part shall still be liable to pay said sum of forty and one-third (40%) cents per day for each convict so unemployed.

Eleventh—No charge is to be made for such time as a convict may be employed in learning to read or write, or does not, from sickness or other cause beyond the control of said party of the second part, perform his ordinary labor.

Twelfth—In case of the loss of the shops hereinbefore specified, or material damage to the same by fire or other casualty, by reason of which they cannot be occupied, then the party of the second part shall not be liable to pay for any labor of the convicts during

the time for which the State shall not furnish another or rebuild said shops, nor shall the State of Iowa be liable for any damages for such unemployed labor until such shops can, with reasonable diligence, be rebuilt.

Thirteenth—It is further agreed that the State of Iowa shall not carry on any of the trades hereinbefore specified within the walls of said prison, nor contract or lease convict labor for the same, during the continuance of this lease, without the consent of the party of the second part.

Fourteenth—All tools and implements are to be furnished by the party of the second part, for the use of the hands so employed by him.

Fifteenth—All manufactured articles shall be removed from the shops as soon as finished, and no articles shall be stored in the shops in a partial or unfinished condition an unreasonable length of time.

The Warden shall have full power to remove, at the expense of the party of the second part, all articles stored or kept in the shop in violation of this provision, and also all shavings or other rubbish that will endanger the safety of the buildings.

Sixteenth—The time of the convicts herein leased shall be kept by the Warden of the Prison, or his Deputy, and his books shall be presumptive evidence of the correctness thereof. And a written statement shall be given to the party of the second part, or their foreman, each day.

Seventeenth—The party of the second part shall account, with the Warden of the Penitentiary, on the first Monday in each month, for the labor of the convicts under this contract for the preceding month, and shall execute his promissory note for the amount due, which shall be made payable to the State of Iowa, and the sureties shall be liable on their bond for the amount of said note or notes, as upon an original undertaking by them, and each of them. Said notes shall be payable four months after date, and bear interest at the rate of six per cent. per annum after maturity.

Eighteenth—It is further agreed that in case the party of the second part shall refuse to make a settlement as aforesaid, or in case any note or notes given for convict labor as aforesaid, shall remain unpaid after the same shall become due, and after specific demand thereof, then the party of the second part shall, at the

election of the State Census Board of the State of Iows, forfeit all rights and privileges under this agreement, and the State shall have the right to resume absolute control over the labor of said convicts, and to re-let the same as though this contract had not been executed.

Nineteenth—It is further agreed that no tinkering shall be permitted in the shops by officers, foreman, or convicts, nor shall any material or tools be carried from the shops to the convict cells for said purpose.

Twentieth—It is further agreed that this contract shall not be assigned by said party of the second part without the consent of the Warden, with the approval of the Census Board.

E. A. LAYTON, Warden, EDWARD JOHNSTONE, J. C. WALKER,

THOMAS HALE.

Approved this 23d day of Nov., A. D. 1864.

W. M. STONE, Governor, JAS. WRIGHT, Sec'y State, J. W. CATTELL, Aud. State, W. H. HOLMES, Treas.,

FORT MADISON, IOWA, JUNE 10, 1865.

To the Census Board of the State of Iowa:

GENTLEMEN: Whereas, The bid of Thomas Hale, of the city of Fort Madison, State of Iowa, for the convict labor of said institution, included household implements, together with cooperage and agricultural implements, and Whereas, said household implements were struck out of said bid without due consideration, and now I, the said Thos. Hale, ask and pray that the said privilege be restored of manufacturing household implements under said contract, for the good and following reasons, viz.:

That in the said manufacturing of cooperage and agricultural implements, articles made from hard wood, it requires the said Thos. Hale to purchase lighter wood, to enable him to float by river such timber as those articles require, and that he is subject to great loss on said timber on account of not being able to manufacture household implements, and it will also require expensive additions to the machinery in said prison to manufacture said household implements which the said Thos. Hale does not feel justified

in doing, with less than the right so to do for the full term of his centract, and Whereas, E. A. Layton, the present Warden, recommends that said portion or kind of work be restored to the contract as originally bid for. Therefore he, the said Hale, prays that you may give the matter due consideration and grant said request.

Hoping to receive a favorable reply,

I am, very respectfully yours,

THOMAS HALE.

June 13, 1865.

The modification herein meets with my approbation and approval.

W. M. STONE, Governor.
JNO. A. ELLIOTT, Auditor.
JAMES WRIGHT, Sec'y State.
W. H. HOLMES, Treasurer.
ISAAC L. ALLEN, Att'y General.

FINANCIAL STATEMENT.

CLERK'S OFFICE, IOWA PENITENTIARY, FORT MADISON, September 30, A. D. 1865.

TO EDWARD A. LAYTON,

Warden of the Iona Penitentiary-

Sir: In pursuance of law, I herewith submit the following financial statement of the affairs of this Institution for the two years, commencing October 1, 1863, and ending September 30, 1865.

PHYSICIAN'S REPORT.

IOWA PENITENTIARY HOSPITAL, December 1st, 1865.

To the Warden, E. A. Layton:

Siz:—I herewith present you with my biennial report as Physician and Surgeon to this institution.

Since my last report the health of the convicts has been generally good, there having occurred but one death. This was the case of John H. Tull, whose sentence had been for a long term, and he seemed anxious to die. He entered the prison on the 26th of October, 1863, and died August 21st, 1864, at a time when there was an unusual amount of sickness in our community. The Deputy Warden and Hospital Steward were both sick, and you had to place in charge of the hospital, a man who was ignorant of the duties of the steward. To this I attribute, perhaps, the loss of this man. His death was unexpected to me at the time; but I had no confidence that my prescriptions, &c., would be as carefully and accu-

rately carried out as they always have been by Mr. J. W. Davis, who has now filled the position for more than two years very satisfactorily to me.

The stewardship is a very confining business. He should reside at the prison, in order that he could be called at any hour to carry out the views of the physician in cases under treatment, and to administer to new cases until the time of the physician's regular visits, or to summon him, if in his judgment it is necessary. The position is peculiarly well suited to medical students, and should be filled by appointment of the physician. There should be two authorized who would do the duties alternately, day about; thus giving relief to each other, and time for study at the physician's private office. By this arrangement, young men could be obtained who would be capable, and who would thus have fine opportunity to enter on the study of our profession, practically, and advantageously to all concerned. The salary, in this case, should be increased to about sixty dollars per month, or thirty dollars for each. It would be just to pay this for the extra duty of being compelled to rise at night, when necessary.

Pleasant Fouts, who entered the prison on the 15th of January, 1855, a life convict, attempted to commit suicide on the 8th of August, 1864, by cutting his throat with a carving-knife. It was too dull, or he would have succeeded. It was done, as doubtless the crime for which he was sent here, in a fit of insanity. For that murder he should be sent to (if there had been one) the Hospital for the Insane. Perhaps the Legislature, in its wisdom, may authorize his removal to that institution, as this is poorly calculated for such patients.

There is another class of convicts, who, in my opinion, (though perhaps this more properly belongs to the Chaplain to recommend,) should be otherwise provided for. I allude to the young boys less than sixteen years of age, of whom there are perhaps six or eight. For such, there should be provided in our State an institution to take charge of them during their minority—to educate and to completely restrain them from crime. This institution is poorly suited to their wants. They are not capable of performing the hard labor given for the punishment of crimes incident to adults; hence they cannot be placed under the discipline intended

for such, and it may be well doubted whether they are not made worse, especially by short terms.

Our hospital accommodations remain the same as at my last report, yet we are looking forward hopefully to that in progress of construction. The very good health of the prisoners for the past two years, may, I think, in part, be attributed to so much of the labor being done outside of the shops upon the new buildings, &c. There is no cause here for sickness, except the confinement, for no pains are spared to keep everything in perfect order. The diet is plain and substantial. The cells are kept scrupulously clean as well as the persons who occupy them. New convicts are frequently sent here from county jails requiring the use of water and soap, ointments, washes and medicine, to purify them and make them fit for clean cells and to avoid contamination of the whole institution.

In conclusion, allow me to express my gratitude to you and all your officers for their friendly co-operation to make my practice successful and agreeable.

EDWARD WHINERY, M. D., Physician and Surgeon to the Iowa Penitentiary.

CHAPLAIN'S REPORT.

To His Excellency, Wm. M. Stone,

Governor of the State of Iowa:

Sir:—The Rev. Mr. Williams was Chaplain during the first year included in this report. Upon his resignation, Sept. 30th, 1864, the responsible duties of this office were imposed upon the pastor of the Baptist Church, Fort Madison, from which he is now relieved by the appointment of the Rev. Mr. Sanford as his successor. During this year, the services have been shared in by the pastors of the Presbyterian and Methodist Churches.

In preaching the word it has been our purpose to present the practical truths of the gospel, and make the way of Salvation plain, so that "he who runneth may read." After this faithful sowing of the good seed of the kingdom, the results of the harvest are left to the angel reapers. The fixed attention, the tearful eye, not less than private journals of some of the convicts, which have come to my hand, indicate that God's word has not been spoken in vain. The seed of Divine Truth seems to be producing "the blade, the ear, and the full corn in the ear." However, we have

left all decision respecting the genuineness of conversion, and the sincerity of professed penitence for Him who "looketh not upon the outward appearance," but "knoweth what is in man."

are to be regarded as a favorable class, rather than to be considered beyond the reach of that Divine Grace, which, through the gospel, becomes "the power of God unto salvation to every one who believeth." None certainly have better opportunities for healthful Sabbath reflections than the inmates of this prison. Immediately after supplying the physical wants each Sabbath morning, the moral and religious necessities receive attention. God's truth, which is "able to make wise unto salvation" is unfolded in the

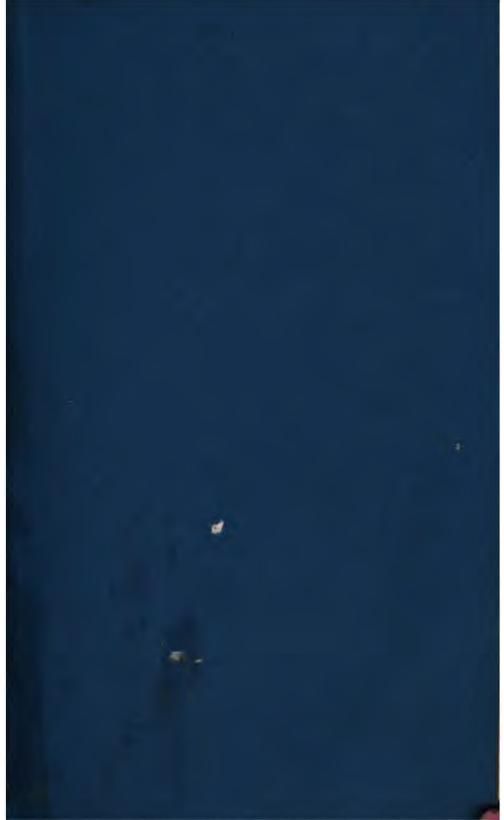

Not altogether the most guilty, hardened and unimpressible peo ple of our young State, wear the striped uniform of the I. P. Here, too, with steady habits, and regular physical employment, the mind naturally settles down under the consideration that one's lot is unchangeably fixed for a definite period, so that the convicts public preaching. God's word and religious works are furnished the convicts in their cells, so that during the quiet and rest of God's holy day, they must think, and it would be strange if the truth did not affect their hearts. No doubt the silent influences of the Sabbath contribute much to the peace, prosperity, and good order which are apparent in the Iowa Penitentiary.

In short, the object contemplated in the imprisonment of convicts can only be accomplished by a high toned, moral and deeply religious influence brought continually to bear upon them.

The only true reform flows from the religion of Jesus Christ, and the clearer and more constantly the simple and practical doctrines of grace are presented, the more satisfactory must be the result.

I am, dear sir, yours, obediently,

C. F. TOLMAN.

FIFTH BIENNIAL REPORT

OF THE

BOARD OF CURATORS

OF THE

STATE HISTORICAL SOCIETY,

TO THE

GOVERNOR AND GENERAL ASSEMBLY

OF THE

STATE OF IOWA.

DECEMBER 1, 1865.

DES MOINES: F. W. PALMER, STATE PRINTER. 1866.

IOWA CITY, DECEMBER 21st, 1865.

To His Excellency, William M. Stone, Des Moines, Iowa:

Siz:—I have the honor herewith to inclose the Biennial Report of the Board of Curators of the State Historical Society of Iowa, for the period ending December 1st, 1865.

This report has been delayed by the absence of its author, Prof. T. S. Parvin, late Corresponding Secretary of the Historical Society.

The copies of the "Annals" promised in the body of the Report to be sent with it, are forwarded in a separate package.

I am, very respectfully, your Excellency's obedient servant,
FREDERICK LLOYD,

Cor. Sec'y State Hist. Society of Iowa.

REPORT.

To II is Excellency, William M. Stone, Governor, and to the General Assembly of the State of Iowa:

Gentlemen:—In accordance with the provisions of an Act of the General Assembly, approved January 28th, 1857, and entitled "An Act to provide for an annual appropriation for the benefit of a State Historical Society," "the Executive Committee," Board of Curators, would respectfully report "the manner of expenditure of the said sums of money so appropriated," together with their "management of its affairs," for the biennial period ending December 1st, 1865.

The interest to our citizens, and the people of the great and United Nation of which we form an integral part, during the period of this report, has not abated from that of the period embraced in our last report, when the nation was struggling to be free and preserve the "Union of States." Happily for us and all people, the struggle is ended, and now as the "smoke of battle" passes away, the duty we owe the past and its heroic defenders, as well as the future student, imperatively demands of us who are present, that we diligently improve the opportunity to "collect, embody, arrange, and preserve, in authentic form, the materials illustrative of the state of the history of Iowa," in the "great rebellion," whose history will ever stand forth as a beacon light of warning to those who may dare to plot treason against the people's government.

There are enough to sound the praises of Iowa heroes in a thousand battles, but few patiently and diligently to labor to collect facts and material for the future historian to weave into an authentic history, when the passions and prejudices of the day shall have given place to sober truth and correct judgment.

As officers of a society organized and commissioned to meet this demand and duty, we have felt the responsibility devolved upon us.

We have labored without fee or reward as far as we have had the ability, and with but little assistance from those best able to give it, and from whom we had a just right to expect it, and while we have not at all met our own expectations, we yet trust our labor has not been in vain, or our strength spent for naught.

INCREASED APPROPRIATION.

The General Assembly, in our organic act, not only enjoined upon the Society the duty of "collecting and preserving in authentic form, manuscript, papers, &c., &c., and other materials illustrative of the state of the history of the State, * * * to collect facts and statements relative to the history, genius and progress and decay of our Indian tribes, &c., &c.," but also directed "the publication of such of the collections of the Society as the Society shall from time to time deem of value and interest." It also directed the binding of its books, pamphlets, manuscripts and papers, and all out of the small appropriation, not large enough to pay the necessary incidental expenses of the Society.

The Society has, as will be seen by reference to the appropriate headings of this report, (title annals, newspapers, &c.,) commenced a compliance with these injunctions, by the publication of part of the material it has collected, and binding, for better preservation, the valuable collection of the papers of the State. In doing this it has exhausted its means, while the labor has become so great that the Society can no longer secure the services of a competent person to edit its work and superintend its affairs, gratuitously. Gentlemen have for years given their time and means for the very love of the cause, but such devotion will not fill hungry mouths, and the "game has played out," to use a homely but expressive phrase.

Two years ago, Governor Kirkwood, in his annual message, recommended a further appropriation of one thousand dollars to meet the exigencies of the Society, and, as no action was had thereon, the Society would again respectfully call the attention of the Executive and General Assembly to the importance of the subject.

OFFICERS OF THE STATE HISTORICAL SOCIETY-1863-'64.

President—His Excellency, Samuel J. Kirkwood, of Iowa City. Vice Presidents—Hon. G. W. McCleary, Pres. O. M. Spencer,

D. D., Hon. F. H. Lee—all of Iowa City; Willard Barrows, Esq., of Davenport; Capt. H. B. Horn, of Bloomfield; and Col. Wm. M. Stone, Governor elect, of Des Moines.

Corresponding Secretary and Librarian-Prof. T. S. Parvin, of Iowa City.

Recording Secretary-James W. Morrison, of Iowa City.

Treasurer-J. P. Wood, of Iowa City.

Board of Curators—Pres. O. M. Spencer, D. D., Rev. M. S. Osmond, Hon. F. H. Lee, G. H. Jerome, Esq., J. P. Wood, Esq., Hon. G. W. McCleary, Prof. James T., Roberts, D. D., William Crum, Esq., I. N. Jerome, Esq., Prof. N. R. Leonard, Rev. S. S. Howe, J. R. Hartsock, Esq., Rev. F. M. Gray—all of Iowa City; Rev. W. Barris, of Burlington; Hon. W. H. Tuthill, of Tipton; Col. H. A. Wiltse, of Dubuque; Hon. J. B. Grinnell, of Grinnell; Hon. E. Price, of Guttenberg.

officers, 1864-'65.

President-Hon. S. J. Kirkwood, of Iowa City.

Vice Presidents—F. H. Lee, N. H. Brainard of Iowa City, Johnson County; Hon. J. F. Dillon, Scott County; Hon. George G. Wright, Keosauqua, Van Buren, County; W. Duane Wilson, Polk County; and L. H. Langworthy, Dubuque County.

Corresponding Secretary-Prof. T. S. Parvin, of Iowa City.

Librarian—Charles E. Borland, of Iowa City.

Recording Secretary—S. E. Paine, of Iowa City.

Treasurer-J. P. Wood, of Iowa City.

Board of Curators—J. R. Hartsock, Rev. S. M. Osmond, S. C. Trowbridge, G. H. Jerome, N. H. Brainard, G. W. McCleary, Rev. Benjamin Talbot, Prof. N. R. Leonard, Dr. J. T. Robert, Dr. Wm. Vogt and W. A. Sales—all of Johnson County; Hon. J. B. Grinnell, of Grinnell; Hon. James Wilson, of Fairfield; Hon. J. A. Kasson, of Des Moines; Hon. W. B. Allison, of Dubuque; Hon. Hiram Price, of Davenport; and Hon A. W. Hubbard, of Sioux City.

DEATH OF THE TREASURER.

During the past year the Society suffered a great loss in the death of its Treasurer, Joseph Pembroke Wood, who had been a valuable member of the Board for many years. Mr. Wood had

ever taken delight in serving the Society and aiding the cause to which its best energies were devoted. He died on the 9th of September last, and his place has been filled by the election of ——Welton, Esq., of Iowa City.

HALL OF THE SOCIETY.

The Society having been incorporated by the General Assembly "in connection with and under the auspices of the State University," the Trustees of that institution, upon its organization, assigned to it rooms in the University building. The increased number of its students making it necessary to occupy the room so appropriated, the Trustees, in September, 1862, voted the use of a suit of rooms in the so called Normal building or Academy. These rooms the Society continued to use and occupy till March, of the present year, when, in consequence of a portion of them being adversely occupied, (to the inconvenience of the Society,) the Board memorialized the Trustees to provide other rooms, which they did by authorizing the Society to occupy jointly with the University the library room.

PORTRAIT OF GOVERNOR LUCAS.

In the second report, of 1859, it was stated that the Society had the promise of the painted portrait of all the ex-Governors then living, "and from Geo. H. Yewell, Esq., of a half length painting from a photograph of Robert Lucas, deceased, first Governor of Iowa Territory."

This portrait has been painted during the past year by Mr. Yewell, and is now suspended upon the walls of the society. The artist was formerly a resident of Iowa City, and after spending several years in Europe studying his profession, has taken up his residence in New York.

The Hon. R. P. Lowe, ex-Governor, has, since this report was written, presented to the society his portrait, painted in oil by Mrs. Almira Reeder Dayton, of Muscatine, a pupil of Mr. Yewell, and an artist of merit.

The Board regret, however, to report that the portraits of the other honorable gentlemen who have filled the gubernatorial chair have not been furnished as "promised." This is much to be regretted as the portraits of these gentlemen would prove a valuable and in-

teresting addition to the society's collection, and in after years be more highly prized than even at present.

AMENDMENT TO ORGANIC LAW.

In their last report the Board called the attention of the General Assembly to the expediency if not the necessity of an amendment to the law granting to the society [certain publications for exchange.

They beg here again to reiterate the suggestion and in the same words.

We would recommend that section third of the law organizing the society, be amended so as to grant fifty bound copies of all works published by the State, or under its authority, to be used according to the discretion of the Society. It will be seen by reference to the section (see Chap. 203, Laws of 6th Gen. Ass.,) that the amendment proposes a less donation on the part of the State than is now allowed. According to the present law we are required, of the eighty copies, to send fifty to M. Vattemere, Paris, for the purpose of international exchange. Now it has been the uniform experience of the Society, that this system of exchange is a complete failure, or at least barren of any good result to us, and the same experience has proved the desirableness of the proposed change.

ANNALS.

It was stated in a previous report that the Society has issued "a quarterly publication," styled "The Annals of Iowa, by the State Historical Society." This work has been continued during the past two years with increasing success and usefulness. The last number of the third volume was issued in October. A copy of the work for the year accompanies this report, and the January No. (first of the 4th volume for 1866,) will be placed upon the desks of the General Assembly.

Owing to the increased cost of publication, the Board have advanced the price to one dollar a volume. It is edited by the Corresponding Secretary of the Society, and seven hundred copies are issued annually. During the past year it has circulated in fifteen of the loyal States, and is much sought after out of the State, while within less than half the number published have been sold.

EXCHANGES.

The General Assembly has provided by law that "that there shall be delivered to the Society, a certain number of bound copies of all documents published by order of the State, for the purpose of effecting exchanges with similar societies in other States."

The organic act directs that thirty copies of all documents published by the State shall be so delivered, yet with the order of publication for each work, subsequently, a different number has been named when providing for their distribution. Besides fifty copies are to be added for foreign exchange.

The Secretary has compiled from the various laws the following table exhibiting the number of works voted the Society, and added the number actually sent to it by the Secretary of State, who is directed by law to distribute the same.

NEWSPAPERS OF IOWA.

The Society from its organization has sought to enlist the publishers of the papers of the State to furnish their papers regularly to the Society, where they are carefully filed for binding and preservation. In this, however, we have only been partially successful.

The following list of papers received at this date will show that very many are not received at all. It seems to the Society that the publishers would find it to their interest to have complete files of their papers placed where they might be open for general examination and consultation.

These papers have proved of invaluable aid in making up the war history of Iowa during the great rebellion, as they contain full and interesting correspondence from the army late in the field.

IOWA DOCUMENTS.

The Board of Curators have cordially seconded the efforts of the Secretary to constitute and give prominence to the Iowa department in the collection of books, pamphlets, &c., illustrative of the history of the State. The Society has (a donation from the Secretary) a full and complete set (it is believed the only one in the State except that in the private library of the Secretary) of the laws of Iowa, bound, 1836-64; Journals Senate, bound, 1838-64; Journals House Representatives, bound, 1838-64; Journals Constitutional Conventions of 1844, 1846 and 1857,

In this department are also placed sets, more or less complete of the Reports of State Institutions and officers, of the State Agricultural Society, Supreme Court Reports.

SECRETARY'S REPORT.

To the Honorable, the General Assembly of the State of Iowa:

In accordance with the provisions of Section 1703, Revision of 1860, the Board of Directors of the Iowa State Agricultural Society have the honor to present the following "review of the condition of agriculture throughout the State" of Iowa for the year 1865:

The year just closed was full of blessings. The same kind Providence which nourished the germ of our great nation-protected it in its infancy—defeated its enemies in the trying days of the Revolution -kept us from the assaults of foreign enemies, and the dangers of domestic strife, for so many years, has, after four years of war and desolation, rebuked treason, scattered the armies of the rebellion, and restored to our land the benignant reign of peace. The year just closed has been replete with the evidences of the signal care and goodness of God; and instead of the enginery of war, are beheld the development of the arts of peace; instead of the treading of hostile armies leaving a track of desolation in their path, are beheld the highways of travel and commerce, crowded with busy multitudes pursuing the eager chase of pleasure or wealth, and loaded with the rich products of every branch of industry. Our State, erect in the pride of her glorious record during the fierce rebellion, now so fortunately subdued, welcomes to her embrace the thousands who left her bosom to raise aloft the Starry Flag that had been stricken down by the hand of treason. the sleep that knows no waking. We honor their memory; we revere their sacred dust; and amid the "rushings of the busy world" we stop to thank God that He gave us sons of such valor, endurance and patriotism.

It was predicted that the disbandment of so vast armies of men as were marshaled in the contest, would disarrange the whole system of American labor and industry. Coupled with the sudden re-

turn of the soldiers, was the emancipation of four millions of slaves, who constituted before the war almost the entire working force of the Many viewed with great apprehension, the States in rebellion. possible dangerous results of a surplus of laborers above the de-Profligacy, excess, idleness, riots and various hobgoblins seized upon the fancy, and furnished a most unwelcome picture of our future. But the abstraction of these thousands of men, in the North at least, not only did not stagnate industry, extinguish the fires of a thousand manufactories, reduce the products of agriculture, and send starvation to the farms of the people, but it stimulated every branch of labor, and yielded a prosperity unparalleled in the annals of the country. One illustration may not be inaptly introduced. While England sent out her Alabama to prey upon our commerce, and turned her batteries against our merchant marine, America sent out her Griswold, bearing food for the starving operatives of her great manufacturing cities. America carried on the most gigantic war of modern times, and yet so boundless were her resources that she fed the poor of the nation that, through its rulers, would have dissolved our Union and made the experiment of free government a failure. And the return of the army presents a sublime moral spectacle never before witnessed in the history of the race. These vast multitudes of men, instead of disarranging the order of business, have been absorbed in our population, without causing even a ripple on the surface of society. The farm, the work-shop, the office, the varied occupations have been as quietly resumed as they were laid aside, and the return of a million of men from the camp to the fireside, the plow, the loom, the anvil is readily likened to the single smith who left his shop an hour to visit a friend and returned so soon that the fire had not yet died out of the forge. It forms the most remarkable element in the history which our nation has made the past four years.

The return of fifty thousand men has not disturbed the relation of employers and employed; wages are better than they have been for several years; and the supply of farm hands, mechanics, artisans, and men for every position of honorable labor, is inadequate to the demand.

GENERAL FARMING.

At no period in the history of the State are so many encouraging

evidences presented, that the agriculturist is appreciating the dignity and importance of his calling. Years ago farming was conducted with apparently no higher end in view than to make a living with as little labor as possible; and all the improvements made were with a view to assist in selling out, that the owner might "go farther West." Groves to beautify, adorn, and protect from the heat of summer and the storms of winter, were hardly thought of; and these now number 20,285 acres. It has been demonstrated that Walnut, Maple, Cottonwood, Locust, and perhaps other native forest trees, will in a short time, and with trifling cost, produce shade, shelter and timber, when cultivated on the prairie. Houses, barns and all improvements have a look of comfort and permanency, representing the idea of home. Fruits, flowers, shrubbery, vegetables—so long neglected—claim a general share of attention, and their healthfulness and beauty are duly ap-The old saying that "Iowa is no country for fruit," has been so frequently disproved by a comparison of our fruits with those of the finest regions of the United States, that it is now only mentioned to illustrate the tardiness of a former age and the activity of the present. 636,458 trees were bearing fruit in 1864, and at the same period 2,523,905 more were planted, and will soon cheer the heart and minister to the enjoyment of life by their healthful products.

Improved agricultural implements to save labor, and quicken the operations of the farm, are in general use; their value being \$7,707,027, or an increase of two and a half millions of dollars in two years.

The average of the more important crops are calculated from the census returns of 1863 and 1865:

	SPRING WHEAT	WINT'R WHEAT	OATS.	CORN.	POTA- TOES.	RYE.	FLAX.
1863 1865	8 9	15 10	24 30	37 47	66 65	12 14	6 6

AGGREGATE.

	OORN,	BUSHELS.	WIIEAT,	BUSHKLS.	POTATOES,	BUSHELS.
1863 .	1	.63,883,916		. 8,795,321		2,362,918
1865 .	 	.48,471,133		.9,284,565		2,730,811
			<u> </u>		· _	
	Decrease	e15,412,773	Increase	4 89 ,244	Increase.	367,893

The processes of agriculture are too generally conducted in an impiric manner. There are but few who can assign a satisfactory reason for any particular method that is followed by good results. There is a lamentable lack of knowledge of agricultural chemistry in the daily operations of the farm. Work is done after a prescribed method, because the same succeeded once or twice before. But there seems to be a disposition on the part of many, to emerge from this routine practice and conduct a farm on the sure basis of science. Improved methods of tillage are not generally adopted. More light is required as to fertilizing, subsoiling, under-draining, surface draining, and on all the appliances and practices which force from the soil a more generous crop than can be obtained by methods deduced from experience only. It is truly gratifying to observe that a more liberal view of scientific farming is being taken by our people; and the day is dawning when the prejudice against "book farming" shall be removed, and the agriculturist shall conduct his pursuit with the accuracy and certainty of success, which attend all philosophical processes.

Emigration to the State has received a new impetus; there are no data upon which to estimate the numbers who have sought a home within our limits. Its extent may be conjectured from the fact that lack of houses has been a source of very general complaint, not only in the cities and towns, but in the country. The demand for improved farms could be but partially supplied. So great was this scarcity, that, in some places, building associations have been organized, with capital to erect houses for sale or rent. Many cities, if they could have furnished houses for strangers, would have added greatly to their population and the wealth of the This demand, following the well established principles of trade, enhanced the price of property and improved lands, and dwellings have exchanged hands at unusual prices. In 1863 the population was 707,162; number of houses, 126,918. In 1865 the population was 768,736; number of dwellings, 128,410; showing an increase of 66,574 souls, and an increase of only 1,492 houses. In 1863 and 1864 but comparatively little lumber was brought down the Mississippi, owing to the low stage of water. this embargo was removed, and the trade in lumber assumed mammoth proportions, and it is believed that, could a census be taken now, it would reveal a large increase in the number of dwellings.

CATTLE.

The report of the Commissioner of Agriculture states the whole number of cattle and oxen in 1864, at 7,965,439, and, in 1865, at 7,072,591, being a decrease of 892,848; of cows, in 1864, 6,066,748, and, in 1865, 5,768,130, being a decrease of 298,618, or an aggregate decrease of 1,191,466 head. The State census of 1863, gives the number of cattle, oxen and milch cows at 1,245,868; the return of 1865 shows the number to be 1,249,685, or an increase in two years, of 3,817. Thus, while the nation at large has suffered an immense loss by the demands of the war, and for other purposes, we still have made an actual increase. This single fact is full of encouragement to the stock-grower, and is an additional evidence of the entire adaptation of this country to stock-raising. The occasional importation of choice Durham and Devon stock, and the high prices which improved breeds of cattle bring, are cheering indications of the interest taken in this branch of farming.

A virulant disease has attacked the herds in Russia, Great Britain, and other parts of Europe. It is called the "Rinderpest," and has hitherto baffled the skill of the most eminent veterinary surgeons and stock-growers, and has been extremely fatal. It is doubtless both a contagious and infectious disease, and the people of Iowa should second the recent action of Congress, and insist that the importation of stock from Europe shall be absolutely prohibited during the prevalence of the malady. Prompt decision, energetic action now, may save our people the loss of millions of dollars, and entirely protect us from the effects of the plague, while a temporizing policy may bring upon us all the disastrous consequences of a wide spread epidemic.

The following table shows the exports of cattle in 1864 and 1865, through the sources named:

1864.	1865.

HOGS.

In no kind of farm stock has so much improvement been made.

The Magee, Chester White, Suffolk, Poland, and perhaps other breeds have been introduced, to the manifest improvement of the general stock. There are but few localities which do not boast of some blooded swine. In this shape, the vast crops of corn are readily brought to market, and form a principal source of revenue to the people of the State. The whole number in the U.S. in 1864 was 16,148,712; and in 1865, 13,670,887, showing a decrease of 3,077,825. In Iowa, in 1863, by State Census, there were 1,743,865, and in 1865, there are returned 1,037,117, being a decrease of 706,748. The hog cholera, so called, has been very destructive in some localities. As yet there is no remedy for this disease, because it is believed there is no adequate knowledge of its essential nature. Multitudes of people have been victimized by purchasing secret or patent receipts for its cure; and opinions are extremely conflicting as to the proper treatment. The recommendation of stone coal bountifully, as a preventive, has many advocates. In order to arrive at a rational plan of treatment, investigations should be made, even at a considerable outlay of money, if it were necessary, to determine the precise conditions of system which belong to the distemper. In this way only can a preventive and cure be discovered.

SHEEP.

Since the report of 1864, to the Governor, this interest has been steadily and rapidly growing in importance and value. In 1863 the number of sheep was 599,938, and the number of pounds of wool shorn in 1862, 1,429,209. In 1864, there were 1,000,541 sheep, and the clip reached 2,813,620 pounds, or nearly double the return of two years ago. Coupled with this gratifying increase, is the fact, also gratifying, that wool-growers find it remunerative to pay high prices for fine wool sheep. The interest is also magnified

in the active working of a Wool-Growers' Association, and the entire success of a sheep-shearing festival, in the summer of 1864. Spanish Merinoes are most highly esteemed, and when satisfactory evidences are produced of the genuineness of the pedigree, as having been grown by some well known and responsible breeder, fabulous prices have been paid, and growers contemplate with pride the fleece and the flock. Diseases have not been reported to any extent. In one county, some flocks of diseased sheep were introduced from a neighboring State, which infected the flocks already on hand, and many died. The severest penalties of our excellent law, should be visited upon the guilty sellers; and a lesson should be taught these dishonest men, which would forever deter any from the commission of so grave an offense as the sale of diseased stock.

With the rapid increase of sheep, there has sprung up a pressing necessity for mills and machinery to convert the wool into fabrics for family use. Hence in many places already have been erected commodious woolen factories, and many counties consume the bulk of the product of wool, in manufacturing cloths and woolens. no period in our existence as a State has so much wearing apparel been made at home, as in the year just closed. The Census of 1863 returns under the somewhat indefinite headings "Value of domestic Manufactures," and "Value of general Manufactures," \$3,919,884 worth; in 1865, under the still more unmeaning heading, "Value of Manufactures," \$7,100.465. The large proportion of this sum, doubtless embraces fabrics of linen and woolen goods made in factories or in families; in any event it matters little how many items may be embraced in the title "Manufactures;" the increase of value is a record of which all may boast. counties express the need of factories which will give employment to many persons and enable them to clothe themselves, independent of the extortion of railroads and monopoly of manufactures of the Eastern States. Here water power is abundant, every facility seems naturally afforded for the manufacture of woolen fabrics; yet capital is wanting to turn all these elements to good account.

An instructive lesson may be learned from the fact, that there were returned in 1864, 86,060 dogs, and since no general epidemic has prevailed among them, it is safe to conclude that the number,

at present, greatly exceeds the returns. The value of sheep destroyed by wolves and dogs the same year, is \$126,148, and since sheep have increased and there is no evidence of failure of the canine appetite for mutton, it is not extravagant to imagine, that the value of sheep destroyed in 1865 has by no means been les-A tax of one dollar per head on dogs, would raise a revenue sufficient to pay all the annual appropriations to agricultural societies, and in a very few years, would build an Agricultural College, endow it with professorships, stock an experimental farm, purchase a chemical laboratory, found a museum of Natural History, and prepare the way for the education of hundreds of youths. The total amount of appropriations for all the agricultural societies in Iowa, including the publication of the annual volume of the State Society in 1865, is only \$8,245, and for the College Farm \$50,000 for two years just closed, making in all \$58,245. entire sum, which all agree is a most wholesome and judicious expenditure, is not half the amount of value of sheep destroyed in a single year.

The following tables indicate the imports and exports of sheep, through the avenues named, for the years 1863, 1864 and 1865:

ADIONE AND MICHES WAS	, J			
_	•	·	Exports.	Imports.
Burlington & Missouri I	1863,	5,611	17,948	
Mississippi & Missouri R. R.,			678	36,620
C. I. & N. & C. R. & M	66		15,540	
Burlington & Missouri I	1864,	9,598	47,159	
Mississippi & Missouri I	"	5,760	51,360	
Chicago & North-Wester	rn Railway,	"	••••	36,000
McGregor Ferry,	_	"	••••	25,000
Burlington & Missouri I	1865,	11,342	9,521	
Mississippi & Missouri R. R.,			3,201	3,033
Chicago & North-Western R. R.,			6,212	20,562
Total	• • • • • • • • • • • • •		42,402	262,743
Aggregates.	Exports.		Imports.	
1863	6,289		70,108	
1864	16,585		159,519	
1865	20,755		33,116	

In 1863 the proportion of exports to imports was one in over eleven; in 1864 as one in about ten, and in 1865 as one in about one and a half.

CORN.

The corn crop of the United States, in 1863, was 451,967,959 bushels; in 1864, 530,581,403 bushels; in 1865, 704,427,853 bush-In Iowa, in 1863, the number of acres was 1,733,503, yielding 63,883,911 bushels, or an average of a little less than 37 bushels per acre. In 1864, as returned by State Census of 1865, there were 1,727,777 acres, yielding 48,471,133 bushels, or an average of a little more than 29 bushels per acre. It is believed that the crop of 1865 will average not less than forty bushels per acre; the favorable seasons for planting, cultivating and gathering all conspiring to increase the quantity, and moreover greatly to improve the quality. Estimating the same surface as 1864, being a decrease of 5726 acres, compared to 1863, the crop will reach 69,100,080 bushels or an increase of over six millions of bushels over 1863. In other words Iowa produced about one tenth of the entire corn crop of the United States. A very inconsiderable quantity is exported in bulk, the large proportion finding its way to market, fed to cattle and hogs.

Nearly all the counties deplore the loose and careless manner of raising the corn crop. The plowing is condemned as being too shallow, and the sum total of the cultivation as being the embodiment of the idea of covering as much ground as possible, with as little labor and expenditure of care as are consistent with a yield of from 30 to 50 bushels per acre. Evidences are abundant that, with careful tillage, one hundred, and up to one hundred and sixty bushels have been produced from an acre, and there is no substantial reason why the general average should not be greatly increased. The present method is exhaustive to the soil, and can hardly fail, in a few years, of producing disastrous results. The experience of the older States, and in part of our own, should warn the agriculturist to feed the soil as he draws nourishment from it, by all the appliances of modern culture. Corn is, and must, for many years to come, remain the principal source of revenue of our people; and a wise determination should be taken and followed, to harvest the greatest number of bushels from the smallest breadth of land, that the soil, labor, care and every other expenditure, shall be sedulously economized.

SORGHUM.

In 1858 there were 5,606 acres, yielding 416,776 gallons.
In 1859 " " 26,866 " " 1,993,474 "
In 1862 " " 36,607 " " 3,012,396 "
In 1864 " " 21,452 " " 1,443,605 "
The product of sugar in 1862, was......21,469 pounds.
" " 1864, was......8,386 "

It is entirely safe to place the quantity of syrup made in 1865, at 4,000,000 of gallons, or the largest that has been produced in the State. The magnificent weather, during the greater part of October, gave the farmers an unusually favorable opportunity to "work up" the cane; and the quality of the syrup is unsurpassed. than thirty counties have reported, and most agree that the quantity produced will supply the home demand, and in some instances, will afford a surplus for exportation. New and improved mills have been introduced that have expressed a greater amount of juice from the stock than could be done by the old-fashioned wooden mills, thus increasing the average yield per acre, and, the method of manufacture being better understood, a greatly superior quality of syrup has been obtained. The importance of having the pans, evaporator and furnaces, full, and all the requisite appliances in readiness for completing the working of the crop, is thoroughly appreciated. There is no case of failure, and no cause of dissatisfaction reported.

The principle difficulty in the cultivation of cane is its mixing with broom-corn and other crops; yet this is not without remedy. The average price of a superior quality of syrup is about fifty cents per gallon. This crop has become a necessity to the State, and could be, by no means, dispensed with. All the methods hitherto to make a merchantable sugar have failed. Small quantities have been returned, the result rather of accident than of design or well conceived operation. Very many patent processes have been offered to the people; the results are far from gratifying. It is believed that sugar can be made from Sorghum, and in remunerative quantities. As yet the process has not been discovered. The average per acre, of syrup, is but seventy-six gallons. With improved machinery, and other advantages, this quantity could be readily doubled. Even at the moderate average, it is a highly re-

munerative crop. The scarcity of labor at the season when it must be worked, is a great obstacle; and many acres annually go to waste because help cannot be found to gather the crop. The discouragements of a year ago also turned to brilliant hopes, and the Sorghum promises to become, not only a substitute for imported syrups and sugars, but a source of wealth, by the exportation of large quantities of both.

HAY AND TAME GRASSES.

Appended to this report will be found the report of the Standing Committee of the Board on Tame Grasses. There were, in 1864, 340,793 acres of grass, yielding 289,047 tons, or less than one ton per acre. To this let there be added 713,119 tons of prairie hay, and the product is 1,002,166 tons; estimated at an average of \$4.00 per ton, the product is worth \$4,008,664, or quite one-half the value of the entire crop of wheat, estimating the latter at \$1.00 per bushel. The introduction of large numbers of sheep, the greatly increasing interest in the matter of cattle raising, and the indisputable proofs of the adaptability of our prairies for grazing purposes, have created a demand that the broad acres should be converted into meadows and pastures; and a decided impetus has been given to this branch of husbandry. Since 1863, there has been an increase of 68,712 acres of tame grasses.

WHEAT.

The number of acres in 1862 was 1,149,836, yielding 8,795,321 bushels. In 1864 the number of acres was 944,453, or a decrease of the surface sown of 185,384 acres. The yield was 8,003,271, a decrease of 792,050 bushels, yet showing an average increase of over one bushel to the acre. The crop of 1865 is greatly deficient in quality, most of it having been impaired by the continuous wet weather that prevailed in harvest. An enemy called by many writers "the scab," has greatly damaged the crop in many localities, and not only reduced the number of bushels, but sadly deteriorated the quality of the grain. No new varieties have been introduced to any considerable extent, neither have the experiences of the past year developed anything peculiar to the cultivation of the crop.

COUNTY AND DISTRICT AGRICULTURAL SOCIETIES.

Thirty County and District Agricultural Societies have made reports to the State Society for 1865. Early in September, a comprehensive circular (a copy of which is hereto appended,) was sent to every county of the State, with a view of obtaining a full report of the agricultural condition, in which no part of our domain should be unrepresented. But very few persons were sufficiently interested to make a report, in counties in which no Fair was held. Again, the law-Chapter 109, Laws 10th General Assembly-excludes from the benefit of the State appropriation those County Societies whose receipts, exclusive of donations and appropriations in aid of purchasing or fitting up Fair Grounds, and of the money received from the State, the sum of \$500, and thus, this Society is deprived of a report from the most populous and wealthy county of the State. There are reported, as members of the different agricultural associations of Iowa, but 7,143 persons. The receipts of the several agricultural exhibitions reach \$15,275.80. amount paid out in premiums will perhaps exceed this latter sum. There can be but one opinion as to the benefit of these agricultural meetings. They afford opportunity for an interchange of sentiment; for the examination of newly introduced implements and of improved stock; and present at a glance the average industry, skill, and thrift of the people. The Legislature should remove the restriction limiting its aid only to County and District Agricultural Societies whose receipts do not exceed \$500. The appropriations for agriculture were sufficiently meagre, in comparison with other interests; and instead of curtailing them, let that body follow the teachings of retrenchment and reform in public expenditures, in other directions, that can be sacrificed with infinitely less damage to the State.

THE STATE FAIR OF 1865

Was, perhaps, the most successful, in all particulars, of any ever held in the State. The beautiful grounds of the Des Moines Co. Agricultural Society, comprising thirty acres, were fitted up with stalls, halls, track, water, &c., &c., the local Committee exhibiting a general willingness to make arrangements commensurate with the wants of the Society. The management of the Fair was entirely satisfactory to the thousands of visitors and exhibitors who

were present. It may also be recorded, as illustrative of the moral character of our people, that there was no instance of disorderly conduct, to warrant any special police interference during the entire exhibition.

The following tables indicate the entries in the different classes, for the years specified; also the receipts for each year:

	1						
ENTRIES.	1856	1857	1858	1859	1863	1864	1865
Oattle	145	169	146	125	84	74	67
Horses	182	196	179	156	129	150	217
Mules	14		30	24	28	25	28
Sheep	22	10	33	37	78	107	77
Swine	27	19	26	38	47	52	40
Agricultural Implements	113	86	25	26	126	181	221
Farm Products	106	192	130	190	128	100	151
Other Classes	247	444	475	673	487	303	1
Totals	956	1129	1044	$\frac{1}{1269}$	1107	992	1276

The large increase in the numbers of agricultural implements, and different kinds of farm machinery, is a very gratifying result. The decrease in the numbers of entries of sheep, is from no failure of the interest in that direction, but because large numbers were excluded from competition, the owners not being able to present evidences of pedigree, weight of fleece, &c., and other requirements of the Society.

The receipts at the Fairs for nine years past are found in the annexed table:

1856	1857	1858	1859	1860	1862	1863	1864	1865
							1001	2000
\$3,062	^{l.} 3059	2843.50	2116	3726.50	3576	4454.25	7877.82	
401000								

THE NATIONAL AGRICULTURAL FAIR OF 1866.

The attention of the Board is respectfully called to the late action of the Kentucky State Agricultural Society. They affirm that "the individual interests of the country demand that a National Fair be held in the fall of 1866, that the central position of Kentucky, &c., renders it desirable that the Fair should be held in their State; they earnestly and cordially invite the Agricultural Socie-

ties of all the States and Territories of the Union to co-operate with them in this great and patriotic movement, so vital to the industrial interest of the nation, &c." It is recommended that immediate steps be taken to second the action of Kentucky, and to have the products of Iowa fairly represented at the National Exhibition; also, this Society should send a proper person as its delegate, to look after the interests of Iowa exhibitors, and to make a full report of every department of the Fair.

THE FRENCH UNIVERSAL EXPOSITION OF 1867.

The French Nation has determined to have an exhibition of the industry of all Nations, to be open at Paris, April 1st, 1867, and to close October 31st, 1867. J. C. Derby, No. 5 Spruce St., N. Y., has been appointed United States Agent. All applications for space in the building, of which thirty thousand feet have been assigned the United States, or for ground in the park surrounding it, must be made through him, on printed blanks which have been widely distributed for that purpose. The United States, as heretofore, will not be behind other countries in the display of products of art and industry; and our State should, of her vast resources, and abundance, exhibit in friendly competition with the Nations of the earth. It is thought that Congress will provide for the free transportation of all accepted articles, from New York to Paris and return. Iowa, in connection with a just representation of certain classes of her industry, should have an authorized agent at Paris. during the Exposition, to make a full report to the people, and especially to report on those matters which may appear of peculiar use and benefit to our agriculture. Such a report, showing particularly the inventions and appliances, the discoveries and the improvements best adapted to the wants of this people, would more than repay all the outlay incurred in such agency. It is submitted that the Legislature should appropriate a sufficient sum of money, to be placed under the control of the Executive Committee of the Iowa State Agricultural Society, who, with the consent of the Governor, should appoint a suitable person to represent Iowa at the National Exposition.

STATISTICS FROM RAILROAD COMPANIES.

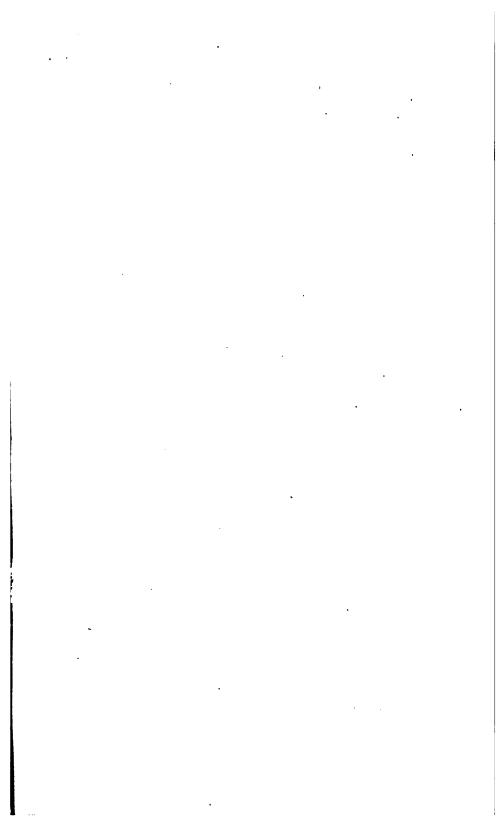

The Board congratulate themselves upon the success which has

attended their efforts to collect reliable statistical information from the great avenues of commerce, which form an important element in the material prosperity of Iowa, and they take this opportunity to thank the officers of the different Railroad Companies for their kindness and courtesy. The publication of these statistical tables, commenced three years ago, has received the approbation of agriculturists, and many persons interested in the development of the great North-West, have expressed a desire that the same should be continued. The tables herewith presented afford a flattering picture of our trade and commerce, and illustrate, better than any other way, the vast resources of our people.

Respectfully submitted by

J. M. SHAFFER, Secretary.

FAIRFIELD, IOWA, JANUARY 8th, 1865.

IOWA SOLDIERS' ORPHANS' HOME.

To the General Assembly of the State of Iowa:

Your Joint Committee, appointed to visit the "Iowa Soldiers' Orphans' Home," beg leave to report the following:

That on the 13th and 14th of February, 1866, they visited the Home, or a branch of the same, situated at Cedar Falls, in Black Hawk county, on the Dubuque and Sioux City Railroad, one hundred miles west of Dubuque.

This branch of the Institution was commenced on the 28th September, 1865, with five soldiers' orphan children, and has continued to increase and prosper to this time, and now has under its care one hundred and two such orphans, from the following named counties:

Benton, 13; Black Hawk, 20; Butler, 9; Clayton, 19; Cerro Gordo, 2; Delaware, 8; Dubuque, 4; Floyd, 3; Franklin, 9; Fayette, 4; Hardin, 3; Jackson, 4; Marshall, 3; Mahaska, 2; Pottawattamie, 1; County not known, 5. Total, 109.

This branch is under the management of Arthur Morrison, as Superintendent, and Mrs. E. G. Platt, as Matron; besides these, there are one male and nine female employees. Of these, the pay is now, Superintendent, per month, \$83\frac{1}{8}\$—\$1000 per year; Matron, per month, \$50; Steward, per month, \$20; First teacher, per month, \$20; Music teacher, per month, \$20; Seamstress, per month, \$14; two employees, each \$12 per month, \$24; four employees, each \$10 per month, \$40. Whole amount for employees, \$271\frac{1}{3}\$ per month, or the gross amount of \$3,256 per year. The gross expenditures of this branch for the month of January, 1866, was \$872.33, on an average of about ninety orphans, which is at the rate of a little over \$100 per head, per year.

The building occupied by this Home was originally built and used as a hotel; the front part is built of brick, 30 m 62 feet, three

stories, with two projections from the rear, 28 × 40 feet, two stories, and built of wood. This building is upon Main street, in the city of Cedar Falls, upon a plat of ground 8 × 16 rods, extending in the rear of the building. There is upon this plat of ground another brick building 32 × 40 feet, two stories high, not now occupied by the Home, but will be. These premises are all now rented by the Home corporation for the term of three years, for \$1,100, seven hundred of which may be expended on the premises, in repairs and improvements, and about two years' rent is already paid in this manner. This building is not the most conveniently arranged for this purpose, nevertheless it serves a good purpose. Mahy of the rooms are furnished in a good, plain, comfortable manner, by the Ladfes' Aid Societies of Black Hawk and surrounding counties. Others are furnished equally well by the Institution, much of the furniture, particularly the beds and bedding, being that once belonging to the Government, and donated in part to the Home for this purpose. This branch can accommodate, when the building and rooms are all prepared and furnished, about 150 children. is the rule of this Home to receive orphans from two to sixteen years of age, though this rule is frequently varied, in those cases where the child has lost both parents. The children at this Home will compare favorably with an equal number of children gathered promiscuously anywhere. They are all plainly but comfortably clad, and in appearance are bright and cheerful, and happy. found none sick, and there have been no deaths at this Home. We believe this institution is well conducted, and very successful. find among the citizens of Cedar Falls a very friendly and symppathetic feeling toward this branch of the Home, and an earnest desire that it may be continued and supported at that place. Constant applications are coming in for places, and from the best information we can gather, the institution will be filled to its utmost capacity in six months to come. There is an excellent school connected with this institution, conducted by a teacher with whom one of your committee has been personally acquainted for the last five years, and knows her to be superior in this capacity. All children that are old enough are required to attend school, and on the Sabbath, the Sabbath School, and Church. They are allowed to attend the Church where the parent or guardian prefers.

Your Committee further report that on the 20th and 21st of Feb-

ruary, they visted the Home at Davenport, in Scott county. Home embraces what was formerly Camp Kineman, with all its buildings, and thirty-three and one-half acres of ground. buildings are situated in the form of a hollow square. What was the officers' head-quarters, upon the east side of the square, is occupied and used by the Superintendent, and some other officers of the Institution, and for store-rooms. At the right and left of this, across the north and south sides of the square, are eighteen buildings now called cottages, and occupied by the children, the camp has been occupied as a Home, the cottage buildings have been partitioned, and lathed and plastered, and are now very com-Each of thirteen of these cottages is occupied with about 28 children, and a cottage manager. They are nearly uniform in their arrangement inside, having a sitting room with five; a bedroom for manager; a clothes press for their garments, and one large sleeping room; some are occupied by boys, others by girls These buildings are all built of good pine lumber, with first quality pine shingle roof on each. On the west side of the square are situated 24 well-built and capacious buildings, formerly used as stables, not now in use at all, but may be renovated and fitted up as cottages, should occasion ever require. south-west of the square is the spacious room, formerly a drillroom, fifty by one hundred feet, now fitted up, finished and furnished as a dining hall, supplied with seventy-five tables and other suitable furniture, where all the children and managers together take their meals; and following in the rear and outside of this hall is an extensive kitchen and kitchen arrangements, and a complete bakery; and further on, a laundry, a drying room, and an ironing room, all connected and well arranged. In the south-east of this village of cottages and other buildings, at a distance of from twenty to thirty rods are four good and well-fitted school rooms, in one building, with schools in operation under competent and experienced teachers.

There are now at this Home 331 soldiers' orphans. Of these, 38 are over 13 years of age, and 63 between 10 and 13 years; the remainder under 10 years.

These children are from various counties, as follows: Appanoose, 16; Boone, 4; Clinton, 13; Muscatine, 22; Clarke, 3; Carroll, 3; Dallas, 3; Des Moines, 3; Decatur, 8; Davis, 18; Fayette,

3; Clayton, 1; Greene, 2; Henry, 11; Jones, 15; Johnson, 11; Jasper, 20; Jackson, 6; Jefferson, 12; Keokuk, 6; Lee, 7; Linn, 17; Louisa, 1; Mahaska, 11; Madison, 2; Marion, 11; Monroe, 4; Polk, 30; Pottawattamie, 1; Powesheik, 6; Scott, 6; Story, 4; Union, 4; Van Buren, 5; Wapello, 9; Warren, 2; Washington, 4; Wayne, 11. From fifteen to twenty have been received since this report was made by counties, and the number is constantly increasing.

This institution is now under the management of Rufus Hubbard, as Superintendent, and Mrs. L. B. Ely, as Matron, and forty other employees, with pay as follows: Superintendent, per month, \$100; Matron, per month, \$50; one teacher, per month, \$25; three teachers, \$20 per month each, \$60; fourteen cottage-managers, \$20 per month each, \$280; one seamstress, per month, \$25; two seamstresses, \$12 per month each, \$24; one in linen room, per month, \$15; six in laundry, \$12 per month each, \$72; one baker, per month, \$50; one chief-cook, per month, \$50; two cooks, \$12 per month each, \$24; two dish-washers, \$12 per month each, \$24; one in dining-room, per month, \$12; one commissary, per month, \$20; one water-man, &c., per month, \$20; one fire-man, &c., per month, \$30; five extra help, \$12 per month each, \$60. Whole expense for help, \$973 per month; whole expense for help, \$11,676 per year, at present rates.

Your committee found many of the inmates of this institution suffering from measles, of which there were reported 130 cases; that the item of extra help is on this account. This disease has passed entirely through this institution, and nearly all are now convalescent. At the time your committee were visiting, four cases only had proved fatal; these children are said to have been weakly and sickly when they came to the Home. This is a much smaller percentage of deaths than occurs from this disease outside of the institution, as reported by the physician. Aside from measles we report no cases of sickness. The best of care and the kindest attentions are bestowad by all concerned, on these suffering children. The citizens of Davenport deserve commendation for their kindness in volunteering to nurse the sick. This Home property is now estimated at \$85,353; of this amount \$1,211 was paid for the land; \$16,542 for improvements; the balance was donated by the Government, by joint resolution of Congress; of this we are assured by

correspondence of Hon. Iliram Price; the land was deeded in fee to the Association by private individuals, and properly evidenced by title deeds and records.

The removal of this Home from Farmington late in the fall and early part of winter, and fitting up of this place was attended with extraordinary expenses, which will not again occur.

The capacity of this institution may be extended to about one thousand children by fitting up all the buildings now on the premises. Applications are quite frequent for places for orphans at this institution, and it is estimated by your committee that in the course of this year the number at this institution will reach at least 450 or 500 orphans, and here, as at Cedar Falls, it is estimated that \$100 per head per annum, is as small an amount as will feed, clothe, and educate each child. On this estimate they will have at both these institutions, within the next year 600 orphan children, at an estimated expense of \$60,000 or \$65,000.

The available means, as reported, of the corporation is about \$37,400 in Government bonds, and about \$40,000 on subscriptions; this they hope to collect, and in cash \$2,223. Additional subscriptions and donations are now very difficult to obtain, and as a private enterprise, this institution cannot be maintained much, if any, to exceed another year; the question then arises, shall the institution be suffered to go down?

Your committee beg leave to say, that as a general rule, they have found the institution well and systematically managed; that these orphans are cheerful, happy, and contented, and on this point your committee made especial inquiry and investigation; that all those who are old enough and able, are required to assist in the work of the institution; that they are all required to attend day schools, Sabbath schools, and religious service; * that in the opinion of your committee, the great majority of these children are better cared for, and are under better influences than ever before, or than they would be again were they turned out upon the world; that as they are the children of those who saved us and our country, it is our privilege and duty, and ought to be our pleasure, to save them from sin, from ignorance, and from vice, and make them the brightest ornaments of society, and to this end we believe the State should

^{*}The four school rooms at this Home are so arranged that on the Sabbath they can be opened into one room, where religious services are held.

lend a helping hand, that this noble institution should not now be suffered to fall into decay, but that the whole property of the State should be taxed in some judicious manner for its support.

Your committee would further report that they find the "Soldiers' Orphans' Home," under the control of a private corporation, styled the "lowa Soldiers' Orphans' Home," of which the following are the officers:

President-Hon. C. C. Cole.

Vice Presidents—Hon. R. P. Lowe, Hon. J. A. Parvin, Hon. William Vandever, Mrs. J. Meyer, Hon. J. W. Cattell, Hon. P. Melendy.

Corresponding Secretary and Gen'l Agent—Rev. P. P. Ingalls. Recording Secretary—Mary Kibben.

Treasurer-B. F. Allen.

Board of Trustees, 1st Dist.—Mrs. C. B. Darwin, Mrs. Annie Wittenmyer.

2d Dist.-Hon. Hiram Price, Mrs. L. B. Stevens.

3d Dist.—Hon. J. A. Elliott, Hon, Z. D. Scoby.

4th Dist.-Hon. J. R. Needham, Mrs. N. H. Brainard.

5th Dist.-Hon, James Wright, Hon. T. H., Benton.

6th Dist.-Hon, G. M. Woodbury, Hon. Isaac Pendleton.

With this report, we submit a copy of the Articles of Incorporation, and its by-laws, for the information of the General Assembly on the subjects contained in the same.

At the last meeting of shis association, a committee was appointed, consisting of the Judges of the Supreme Court, and Judge Woodward, to confer with this General Assembly on the subject of State appropriations for the benefit of the Home, and we are assured by said committee that the association will accede, on their part, to all reasonable requirements of the Legislature, in regard to the management of the funds, or the conduct of the association, should they see proper to make an appropriation; that they will be willing to concede to the State the choice of a majority of managing officers of the association. And your committee are assured that no benefits accruing from any legislation on the part of the State, is sought for, or expected, on the part of the association, unless they shall comply with all the requirements and conditions that may be imposed. Your committee would suggest that, should an appropriation be made, it be accompanied with a proviso that the

same be not used until such association shall accept, formally and officially, of the conditions imposed; and in this manner we may be assured of the proper application of the funds. The officers of the association report to your committee that about \$132,000 has been subscribed for the purposes of this institution, and that there has been paid on such subscription the sum of eighty thousand dollars. The moneys for this association have been received by the General Agent, P. P. Ingalls, B. F. Allen, Treasurer, and by local Co. Treasurers in those counties where such societies have been organized.

The Treasurer is now absent from the State, and your Committee are unable to ascertain and report the exact condition of the finances. Some moneys are yet in hands of County Treasurers, and we are not able to ascertain this amount. All of these officers are reported to have given approved security, as provided by the The General Agent gives bonds in the amount of \$5,000; the Treasurer in the sum of \$50,000; local agents, such bond as is required by local associations. These bonds are all conditioned for the faithful application of the fund collected for the purposes of the Orphans' Home. The Treasurer receipts for all moneys received by him, and pays out the same on the order of the President, countersigned by the Secretary. To the Superintendent of the Home money is paid, on presentation of estimates approved by a visiting committee, vouchers for all meneys expended are taken and filed in the office of the Secretary. The Superintendent is under bonds for the faithful application of all moneys and property in his hands; this bond is in the sum of \$2,000, which. in the judgment of your Committee, is insufficient. We are assured, however, that measures are taken to raise the same to the sum of five thousand dollars. The President, Trustees, Executive Committee, and Recording Secretary of the Association, are all without compensation. The only officer of the Association receiving pay is the General Agent and Corresponding Secretary. officer informs your Committee that his expenses of travel and correspondence have been paid, and that the amount of his salary is to be determined by the Trustees. No amount has ever been fixed; he only claims what is reasonable and just in the judgment of the Trustees.

Your Committee are clearly of the opinion that the "Iowa

Soldiers' Orphans' Home" is in good hands, and that it has been well and economically managed; and that its originators are its present managers, and they have prove themselves among the dearest and truest friends of humanity, and have enshrined their memories in the hearts of all the trute friends of the soldiers throughout our State.

Your Committee are decidedly of the opinion that this institution should be sustained, and that the States should render assistance.

All of which is respectfully submitted without further recommendation.

L. W. HART, A. M. LARIMER, R. M. BURNETT, H. M. THOMSON.
